AOPA Membership Publications, Inc. and its related organizations (hereinafter collectively “AOPA”) expressly disclaim all warranties, with respect to the AOPA information included in this data, express or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose. The information is provided “as is” and AOPA does not warrant or make any representations regarding its accuracy, reliability, or otherwise. Under no circumstances including negligence, shall AOPA be liable for any incidental, special or consequential damages that result from the use or inability to use the software or related documentation, even if AOPA or an AOPA authorized representative has been advised of the possibility of such damages. User agrees not to sue AOPA and, to the maximum extent allowed by law, to release and hold harmless AOPA from any causes of action, claims or losses related to any actual or alleged inaccuracies in the information. Some jurisdictions do not allow the limitation or exclusion of implied warranties or liability for incidental or consequential damages so the above limitations or exclusions may not apply to you.

AC-U-KWIK and its related organizations (hereafter collectively “AC-U-KWIK Organizations”) expressly disclaim all warranties with respect to the AC-U-KWIK information included in this data, express or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose. The information is provided “as is” and AC-U-KWIK Organizations do not warrant or make any representations regarding its accuracy, reliability, or otherwise. Licensee agrees not to sue AC-U-KWIK Organizations and, to the maximum extent allowed by law, to release and hold harmless AC-U-KWIK Organizations from any cause of action, claims or losses related to any actual or alleged inaccuracies in the information arising out of Garmin’s use of the information in the datasets. Some jurisdictions do not allow the limitation or exclusion of implied warranties or liability for incidental or consequential damages so the above limitations or exclusions may not apply to licensee.

Printed in the U.S.A.
**WARNING:** Do not use terrain avoidance displays as the sole source of information for maintaining separation from terrain and obstacles. Garmin obtains terrain and obstacle data from third party sources and cannot independently verify the accuracy of the information.

**WARNING:** Always refer to current aeronautical charts and NOTAMs for verification of displayed aeronautical information. Displayed aeronautical data may not incorporate the latest NOTAM information.

**WARNING:** Do not use geometric altitude for compliance with air traffic control altitude requirements. The primary barometric altimeter must be used for compliance with all air traffic control altitude regulations, requirements, instructions, and clearances.

**WARNING:** Do not use basemap information (land and water data) as the sole means of navigation. Basemap data is intended only to supplement other approved navigation data sources and should be considered only an aid to enhance situational awareness.

**WARNING:** Do not rely solely upon the display of traffic information to accurately depict all of the traffic within range of the aircraft. Due to lack of equipment, poor signal reception, and/or inaccurate information from aircraft or ground stations, traffic may be present that is not represented on the display.

**WARNING:** Do not use data link weather information for maneuvering in, near, or around areas of hazardous weather. Information contained within data link weather products may not accurately depict current weather conditions.

**WARNING:** Do not use the indicated data link weather product age to determine the age of the weather information shown by the data link weather product. Due to time delays inherent in gathering and processing weather data for data link transmission, the weather information shown by the data link weather product may be older than the indicated weather product age.
**WARNING:** The displayed minimum safe altitude (MSAs) are only advisory in nature and should not be relied upon as the sole source of obstacle and terrain avoidance information. Always refer to current aeronautical charts for appropriate minimum clearance altitudes.

**WARNING:** Always obtain qualified instruction prior to operational use of this equipment.

**WARNING:** Do not use a QFE altimeter setting with this system. System functions will not operate properly with a QFE altimeter setting. Use only a QNH altimeter setting for height above mean sea level, or the standard pressure setting, as applicable.

**WARNING:** Do not use GPS to navigate to any active waypoint identified as a ‘NON WGS84 WPT’ by a system message. ‘NON WGS84 WPT’ waypoints are derived from an unknown map reference datum that may be incompatible with the map reference datum used by GPS (known as WGS84) and may be positioned in error as displayed.

**WARNING:** When using the autopilot to fly an approach with vertical guidance, the autopilot will not level the aircraft at the MDA/DH even if the MDA/DH is set in the altitude preselect.

**WARNING:** Traffic information shown on system displays is provided as an aid in visually acquiring traffic. Traffic avoidance maneuvers are based upon TCAS II Resolution Advisories, ATC guidance, or positive visual acquisition of conflicting traffic.

**WARNING:** Because of variation in the earth’s magnetic field, do not rely on the accuracy of attitude and heading indications (GRS 77 installations only) in the following geographic areas: North of 72° North latitude at all longitudes; South of 70° South latitude at all longitudes; North of 65° North latitude between longitude 75° W and 120° W. (Northern Canada); North of 70° North latitude between longitude 70° W and 128° W. (Northern Canada); North of 70° North latitude between longitude 85° E and 114° E. (Northern Russia); South of 55° South latitude between longitude 120° E and 165° E. (Region south of Australia and New Zealand).
**WARNING:** Do not rely on information from a lightning detection system display as the sole basis for hazardous weather avoidance. Range limitations and interference may cause the system to display inaccurate or incomplete information. Refer to documentation from the lightning detection system manufacturer for detailed information about the system.

**WARNING:** Use appropriate primary systems for navigation, and for terrain, obstacle, and traffic avoidance. Garmin SVT is intended as an aid to situational awareness only and may not provide either the accuracy or reliability upon which to solely base decisions and/or plan maneuvers to avoid terrain, obstacles, or traffic.

**WARNING:** Do not use the Garmin SVT runway depiction as the sole means for determining the proximity of the aircraft to the runway or for maintaining the proper approach path angle during landing.

**WARNING:** Intruder aircraft at or below 500 ft. AGL may not appear on the Garmin SVT display or may appear as a partial symbol.

**WARNING:** Do not operate the weather radar in a transmitting mode when personnel or objects are within the MPEL boundary.

**WARNING:** Always position the weather radar gain setting to Calibrated for viewing the actual intensity of precipitation. Changing the gain in weather mode causes precipitation intensity to be displayed as a color not representative of the true intensity.

**WARNING:** Do not use TAWS information for primary terrain or obstacle avoidance. TAWS is intended only to enhance situational awareness.

**CAUTION:** Do not clean display surfaces with abrasive cloths or cleaners containing ammonia. They will harm the anti-reflective coating.

**CAUTION:** Repairs should only be made by an authorized Garmin service center. Unauthorized repairs or modifications could void both the warranty and affect the airworthiness of the aircraft.
NOTE: Do not rely solely upon data link services to provide Temporary Flight Restriction (TFR) information. Always confirm TFR information through official sources such as Flight Service Stations or Air Traffic Control.

NOTE: All visual depictions contained within this document, including screen images of the system panel and displays, are subject to change and may not reflect the most current system and aviation databases. Depictions of equipment may differ slightly from the actual equipment.

NOTE: The United States government operates the Global Positioning System and is solely responsible for its accuracy and maintenance. The GPS system is subject to changes which could affect the accuracy and performance of all GPS equipment. Portions of the system utilize GPS as a precision electronic NAVigation AID (NAVAID). Therefore, as with all NAVAIDs, information presented by the system can be misused or misinterpreted and, therefore, become unsafe.

NOTE: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: Interference from GPS repeaters operating inside nearby hangars can cause an intermittent loss of attitude and heading displays while the aircraft is on the ground. Moving the aircraft more than 100 yards away from the source of the interference should alleviate the condition.

NOTE: Use of polarized eyewear may cause the flight displays to appear dim or blank.

NOTE: This product, its packaging, and its components contain chemicals known to the State of California to cause cancer, birth defects, or reproductive harm. This notice is being provided in accordance with California’s Proposition 65. If you have any questions or would like additional information, please refer to our web site at www.garmin.com/prop65.
NOTE: Operating the system in the vicinity of metal buildings, metal structures, or electromagnetic fields can cause sensor differences that may result in nuisance miscompare annunciations during start up, shut down, or while taxiing. If one or more of the sensed values are unavailable, the annunciation indicates no comparison is possible.

NOTE: The system responds to a terminal procedure based on data coded within that procedure in the Navigation Database. Differences in system operation may be observed among similar types of procedures due to differences in the Navigation Database coding specific to each procedure.

NOTE: The FAA has asked Garmin to remind pilots who fly with Garmin database-dependent avionics of the following:

• It is the pilot’s responsibility to remain familiar with all FAA regulatory and advisory guidance and information related to the use of databases in the National Airspace System.

• Garmin equipment will only recognize and use databases that are obtained from Garmin or Jeppesen. Databases obtained from Garmin or Jeppesen are assured compliance with all data quality requirements (DQRs) by virtue of a Type 2 Letter of Authorization (LOA) from the FAA. A copy of the Type 2 LOA is available for each database and can be viewed at http://fly.garmin.com by selecting ‘Type 2 LOA Status.’

• Use of a current Garmin or Jeppesen database in your Garmin equipment is required for compliance with established FAA regulatory guidance, but does not constitute authorization to fly any and all terminal procedures that may be presented by the system. It is the pilot’s responsibility to operate in accordance with established AFM(S) and regulatory guidance or limitations as applicable to the pilot, the aircraft, and installed equipment.

NOTE: The pilot/operator must review and be familiar with Garmin’s database exclusion list as discussed in SAIB CE-14-04 to determine what data may be incomplete. The database exclusion list can be viewed at www.flygarmin.com by selecting ‘Database Exclusions List.’
NOTE: The pilot/operator must have access to Garmin and Jeppesen database alerts and consider their impact on the intended aircraft operation. The database alerts can be viewed at www.flygarmin.com by selecting ‘Aviation Database Alerts.’

NOTE: If the pilot/operator wants or needs to adjust the database, contact Garmin Product Support to coordinate the revised DQRs.

NOTE: Garmin requests the flight crew report any observed discrepancies related to database information. These discrepancies could come in the form of an incorrect procedure; incorrectly identified terrain, obstacles and fixes; or any other displayed item used for navigation or communication in the air or on the ground. Go to FlyGarmin.com and select ‘Aviation Data Error Report’.

NOTE: When operating the system with the magnetic sensor uncoupled from the AHRS, the displayed heading and heading information used by some system components (e.g. traffic system, AFCS, and weather radar) will be different from the heading calculated by the AHRS. The difference is an amount equal to the difference between the current Magnetic Field Variation Database (MV DB) value, and the MV DB value when the magnetic sensor was uncoupled. Due to the convergence of isogonic lines, this condition is most noticeable at or near the north and south magnetic poles.

NOTE: When using Stormscope, there are several atmospheric phenomena in addition to nearby thunderstorms that can cause isolated discharge points in the strike display mode. However, clusters of two or more discharge points in the strike display mode do indicate thunderstorm activity if these points reappear after the screen has been cleared.

NOTE: Operate G1000 NXi system power through at least one cycle in a period of four days of continuous operation to avoid an autonomous system reboot.
NOTE: The purpose of this Cockpit Reference Guide is to provide the pilot a resource with which to find operating instructions on the major features of the system more easily. It is not intended to be a comprehensive operating guide. Complete operating procedures for the system are found in the Pilot’s Guide for this aircraft.

NOTE: The system supports approval of AC 120-76C Hardware Class 3, Software Type B Electronic Flight Bag (EFB) electronic aeronautical chart applications. Possible additional requirements may make a secondary source (traditional paper or additional electronic display) necessary onboard the aircraft. If the secondary source is a Portable Electronic Device (PED), its use must be consistent with guidance in AC 120-76C.

## FLIGHT INSTRUMENTS
- Selecting the Altimeter Barometric Pressure Setting .................................................. 1
- Selecting Standard Barometric Pressure (29.92 in Hg) .................................................. 1
- Change Altimeter Barometric Pressure Setting Units ................................................... 1
- Displaying the Metric Altitude Overlay ......................................................................... 1
- Setting Baro transition alerts ......................................................................................... 2
- Change Navigation Sources ............................................................................................ 2
- Enable/Disable OBS Mode While Navigating with A GPS Flight Plan .......................... 3
- Displaying The DME Information Window ...................................................................... 3
- Generic Timer .................................................................................................................. 3
- Configure Vspeed Bugs Individually ............................................................................ 3
- Modifying Vspeeds as a Group (All On, All Off, Restore Defaults) ............................... 4
- Set Barometric Minimum Descent Altitude/Decision Height ........................................ 4
- Displaying Wind Data ...................................................................................................... 4

## ENGINE INDICATION
- Engine Displays ............................................................................................................ 5
- Engine Page ................................................................................................................... 18
- Turbine Inlet Temperature ............................................................................................. 19
- Exhaust Gas Temperature ............................................................................................. 19
- Cylinder Head Temperature ......................................................................................... 19
- Lean Engine Page .......................................................................................................... 20
- Fuel Calculations .......................................................................................................... 21
- Oil Pressure and Temperature Gauges .......................................................................... 23
- Fuel Quantity ................................................................................................................ 23
- Crew Alerting System (CAS) .......................................................................................... 24

## NAV/COM/TRANSPONDER/AUDIO PANEL
- Enter or Change a Flight ID (Optional) .......................................................................... 25
- ADF Tuning (Optional) ................................................................................................... 25
- DME Tuning (Optional) ................................................................................................. 25
- Selecting Transponder Mode ........................................................................................ 25
- Enter a Transponder Code ............................................................................................. 26
- Selecting a COM Radio .................................................................................................. 26
- Selecting a NAV Radio ................................................................................................... 26
- NAV/COM Tuning ......................................................................................................... 26
- Auto-Tuning Radios On The PFD .................................................................................. 27
- Auto-Tuning Radios On The MFD ................................................................................ 27
- Split COM ....................................................................................................................... 27
- Digital Clearance Recorder and Player ......................................................................... 28
- Intercom System (ICS) Isolation .................................................................................... 28
## Table of Contents

### FLIGHT MANAGEMENT
- Changing A Field In The MFD Navigation Status Box ............................................. 29

### USING MAP DISPLAYS
- Changing The Navigation Map Orientation ............................................................. 29
- Configuring Automatic Zoom .................................................................................. 29
- Panning The Map ........................................................................................................ 30
- Reviewing Information For An Airport, NAVAID, Or User Waypoint .................... 30
- Viewing Airspace Information For A Special-Use Or Controlled Airspace ............... 30
- Displaying/Removing Topographic Data On The PFD Inset Map Or The HSI Map .... 31
- Displaying/Removing Topographic Data Using The Navigation Map Page Menu .... 31
- Setting Up The ‘Land’, ‘Aviation’ Or ‘Airspace’ Group Items .................................... 31
- Decluttering The Map ................................................................................................. 32
- Decluttering The PFD Inset Map ................................................................................ 32
- Displaying/Removing Airways .................................................................................. 32
- Selecting An Airway Range (Low ALT Airways or High ALT Airways) ...................... 32
- Displaying/Removing The Track Vector .................................................................... 33
- Displaying/Removing The Fuel Range Ring And Selecting A Fuel Range Time ....... 33
- Displaying/Removing The Selected Altitude Intercept Arc ....................................... 33

### WAYPOINTS
- Selecting An Airport For Review By Identifier, Facility Name, Or Location ............. 34
- Selecting A Runway ..................................................................................................... 34
- Viewing A Destination Airport ................................................................................... 34
- Viewing Information For A Nearest Airport On The PFD ........................................ 34
- Viewing Information For A Nearest Airport On The MFD ........................................ 35
- Viewing Runway Information For A Specific Airport ................................................ 35
- Selecting An Intersection ........................................................................................... 35
- Selecting An NDB ....................................................................................................... 36
- Selecting A VOR ......................................................................................................... 36
- Selecting A VRP .......................................................................................................... 36
- Selecting A User Waypoint .......................................................................................... 36
- Creating User Waypoints From The User Waypoint Information Page ................. 36
- Creating User Waypoints From Map Pages ............................................................... 37
- Changing The Altitude Buffer Distance Setting ....................................................... 38

### AIRSPACES
- Turning An Airspace Alert On Or Off ......................................................................... 38
- Selecting And Viewing An Airspace Alert With Its Associated Information ............ 39
- Turning Smart Airspace On Or Off ............................................................................. 39

### DIRECT-TO NAVIGATION
- Entering A Waypoint Identifier, Facility Name, Or City As A Direct-To Destination .... 39
- Selecting An Active Flight Plan Waypoint As A Direct-To Destination .................... 40
# Table of Contents

## FLIGHT PLANNING

- Selecting A Nearest, Recent Or User Waypoint As A Direct-To Destination ........................................... 40
- Cancelling A Direct-To ................................................................................................................................. 41
- Selecting A Manual Direct-To Course ......................................................................................................... 41
- Entering A VNV Altitude And Along-Track Offset For The Waypoint ...................................................... 41
- Removing A VNV Altitude Constraint ......................................................................................................... 41

## FLIGHT PLANNING

- Creating An Active Flight Plan ..................................................................................................................... 42
- Adding A Waypoint To The Active Flight Plan ........................................................................................... 43
- Creating And Adding User Waypoints To The Active Flight Plan .............................................................. 43
- Adding An Airway To A Flight Plan .............................................................................................................. 44
- Collapse/Expand Airways in a Flight Plan ...................................................................................................... 44
- Storing An Active Flight Plan From The Active Flight Plan Page or the Active Flight Plan Window ........ 44
- Activating A Stored Flight Plan On The MFD ............................................................................................... 45
- Inverting And Activating A Stored Flight Plan On The MFD ..................................................................... 45
- Import a Flight Plan from an SD Card ........................................................................................................... 45
- Export a Flight Plan to an SD Card ............................................................................................................... 46
- Previewing a flight plan transfer from a wireless connection: ................................................................. 46
- Ignoring a flight plan transfer from a wireless connection: ....................................................................... 47
- Storing a pending flight plan: ....................................................................................................................... 47
- Activating a pending flight plan: .................................................................................................................... 47
- Deleting a pending flight plan: ....................................................................................................................... 48
- Deleting all pending flight plans: .................................................................................................................. 48
- Deleting The Active Flight Plan ................................................................................................................... 48
- Deleting An Individual Waypoint From The Active Flight Plan .............................................................. 49
- Deleting An Entire Airway From The Active Flight Plan .......................................................................... 49
- Deleting An Entire Procedure From The Active Flight Plan .................................................................. 49
- Entering An Along Track Offset Distance .................................................................................................. 50
- Activating Parallel Track ............................................................................................................................... 50
- Cancelling Parallel Track .............................................................................................................................. 50
- Activating A Flight Plan Leg ......................................................................................................................... 51
- Inverting The Active Flight Plan .................................................................................................................. 51
- Inverting And Activating A Stored Flight Plan .......................................................................................... 51
- Switching Between Leg-To-Leg Waypoint Distance And Cumulative Waypoint Distance .................... 52
- Determining The Closest Point Along The Active Flight Plan To A Selected Waypoint ......................... 52
- Creating A User-Defined Hold At An Active Flight Plan Waypoint ....................................................... 52
- Creating A User-Defined Hold At The Aircraft Present Position ............................................................. 53
- Creating A User-Defined Hold At A Direct-To Waypoint ...................................................................... 53
- Exiting A User-Defined Hold Inserted Into The Active Flight Plan ...................................................... 54
- Removing A User-Defined Hold Inserted Into The Active Flight Plan .................................................. 54
- Removing A User-Defined Hold At An Off-Route Direct-To .................................................................. 54

## INDEX

| Index-1                                              | Index-1 |
**FLIGHT INSTRUMENTS**

**SELECTING THE ALTIMETER BAROMETRIC PRESSURE SETTING**

Turn the **BARO** Knob to select the desired setting.

**SELECTING STANDARD BAROMETRIC PRESSURE (29.92 IN HG)**

1) Press the **PFD Opt** Softkey.
2) Press the **STD Baro** Softkey to set standard barometric pressure.

**CHANGE ALTIMETER BAROMETRIC PRESSURE SETTING UNITS**

1) Press the **PFD Opt** Softkey to display the second-level softkeys.
2) Press the **ALT Units** Softkey.
3) Press the **IN** Softkey to display the barometric pressure setting in inches of mercury (in Hg).

Or:

Press the **HPA** Softkey to display the barometric pressure setting in hectopascals.

4) Press the **Back** Softkey twice to return to the top-level softkeys.

**DISPLAYING THE METRIC ALTITUDE OVERLAY**

1) Press the **PFD Opt** Softkey to display the second-level softkeys.
2) Press the **ALT Units** Softkey
3) Press the **Meters** Softkey to enable metric altitude overlays.
4) Press the **Back** Softkey twice to return to the top-level PFD softkeys.
**SETTING BARO TRANSITION ALERTS**

1) Use the **FMS** Knob to select the Aux - System Setup 1 Page on the MFD.

2) Press the **FMS** Knob to activate the cursor.

3) To enable/disable the Baro Transition Alert based on altitude, turn the large **FMS** Knob to highlight the ‘On’ or ‘Off’ field for the BARO Transition Alert Altitude in the BARO Transition Alert Box.

4) If desired, turn the small **FMS** Knob to set the BARO Transition Alert Altitude On or Off.

5) Turn the large **FMS** Knob to highlight the Altitude field.

6) Use the **FMS** Knobs to change the altitude and press the **ENT** Key to accept or press the **CLR** Key to return to the previous altitude selection.

7) Turn the large **FMS** Knob to highlight the ‘On’ or ‘Off’ field for the BARO Transition Alert Level.

8) If desired, turn the small **FMS** Knob to set the BARO Transition Alert Flight Level On or Off.

9) Turn the large **FMS** Knob to highlight the Flight Level field.

10) Use the **FMS** Knobs to change the Flight Level for the alert and press the **ENT** Key to accept or press the **CLR** Key to return to the previous altitude selection.

11) Push the **FMS** Knob to deactivate the cursor.

**CHANGE NAVIGATION SOURCES**

1) Press the **CDI** Softkey to change from GPS to VOR1 or LOC1. This places the cyan tuning box over the NAV1 standby frequency in the upper left corner of the PFD.

2) Press the **CDI** Softkey again to change to VOR2 or LOC2. This places the cyan tuning box over the NAV2 standby frequency.

3) Press the **CDI** Softkey a third time to return to GPS.
ENABLE/DISABLE OBS MODE WHILE NAVIGATING WITH A GPS FLIGHT PLAN

1) Press the OBS Softkey to select OBS Mode.
2) Turn a CRS Knob to select the desired course to/from the waypoint. Press the CRS Knob to synchronize the Selected Course with the bearing to the next waypoint.
3) Press the OBS Softkey again to disable OBS Mode.

DISPLAYING THE DME INFORMATION WINDOW

1) Press the PFD Opt Softkey.
2) Press the DME Softkey to display the DME Information Window above the BRG1 Information Window.
3) To remove the DME Information Window, press the DME Softkey again.

GENERIC TIMER

1) Press the Tmr/Ref Softkey, then turn the large FMS Knob to select the timer field (hh/mm/ss). Turn the FMS Knobs to set the desired time, then press the ENT Key. The Up/Dn field is now highlighted.
2) Turn the small FMS Knob to display the Up/Down window. Turn the FMS Knob to select ‘Up’ or ‘Dn’, then press the ENT Key. ‘Start?’ is now highlighted.
3) Press the ENT Key to Start, Stop, or Reset the timer (if the timer is counting down, it will start counting up after reaching zero). Press the CLR Key or the Tmr/Ref Softkey to remove the window.

CONFIGURE VSPD BUGS INDIVIDUALLY

1) Press the Tmr/Ref Softkey.
2) Turn the large FMS Knob to highlight the desired Vspeed.
3) Use the small FMS Knob to change the highlighted Vspeed in 1-kt increments. When a speed has been changed from its default value, an asterisk appears next to the changed speed.
4) Press the ENT Key or turn the large FMS Knob to highlight the On/Off field
5) Turn the small FMS Knob clockwise to ‘On’ or counterclockwise to ‘Off’.
6) To remove the window, press the CLR Key or the Tmr/Ref Softkey.
MODIFYING VSPEEDS AS A GROUP (ALL ON, ALL OFF, RESTORE DEFAULTS)

1) Press the Tmr/Ref Softkey.
2) Press the MENU Key.
3) Turn the FMS Knob to highlight the desired selection.
4) Press the ENT Key.
5) To remove the window, press the CLR Key or the Tmr/Ref Softkey.

SET BAROMETRIC MINIMUM DESCENT ALTITUDE/DECISION HEIGHT

1) Press the Tmr/Ref Softkey.
2) Turn the large FMS Knob to highlight the Off/BARO/TEMP COMP field to the right of ‘MINS’.
3) Turn the small FMS Knob clockwise to select BARO or TEMP COMP. Off is selected by default.
4) Press the ENT Key or turn the FMS Knob to highlight the next field.
5) Use the small FMS Knob to enter the desired altitude (BARO or TEMP COMP from zero to 16,000 feet). If TEMP COMP was selected, a field for entering the airport temperature appears. Press the ENT Key or turn the large FMS Knob to highlight this field, and use the small FMS Knob to enter the temperature.
6) Press the ENT Key.
7) To remove the window, press the CLR Key or the Tmr/Ref Softkey.

DISPLAYING WIND DATA

1) Press the PFD Opt Softkey.
2) Press the Wind Softkey.
3) Press one of the Option softkeys to change how wind data is displayed.
4) To remove the Wind Data Window, press the Off Softkey.
5) Press the Back Softkey twice to return to the top-level PFD softkeys.

**Engine Indication System**

**ENGINE PAGE**

In all cases green indicates normal operation, amber indicates caution, and red indicates warning.

Pressing the ENGINE Softkey, makes available the LEAN and SYSTEM softkeys that provides access to the Lean Page and the System Page.

![Engine Page](image)

**Electrical**

Current for the battery (Battery Amps) and bus voltage (Bus Volts) are displayed in numerical digits and are located on the Engine System Page.

![Electrical Group](image)
TURBINE INLET TEMPERATURE

Turbine Inlet Temperature (TIT) horizontal bar indicators is displayed on the main Engine Page and on the Engine Lean page. The Engine Lean page also displays the numerical temperature in degrees of Fahrenheit (°F).

![Turbine Inlet Temperature](image1)

EXHAUST GAS TEMPERATURE

Exhaust Gas Temperature (EGT) readout for the selected cylinder is displayed on the Engine Lean Page. The temperature readout is displayed in degrees of Fahrenheit (°F).

![Exhaust Gas Temperatures (Normal)](image2)

CYLINDER HEAD TEMPERATURE

Cylinder Head Temperature (CHT) readout is shown near the bottom Engine Lean Page.

![Cylinder Head Temperatures (CHT)](image3)
LEAN ENGINE PAGE

1) From the MFD Navigation Map Page.
2) Press the Engine softkey.
3) Press the Lean softkey.

From the Lean Page, the CYL SLCT and Assist Softkeys can be utilized to obtain information about specific cylinders on both the EGT and CHT graphs. Pressing the CYL SLCT Softkey cycles through the cylinders; the selected cylinder number is displayed in cyan. The CYL SLCT Softkey is disabled during warning or caution conditions or when the ASSIST Softkey is pressed.

Monitoring the desired cylinder’s EGT and CHT:

From the Lean Page, press the CYL SLCT Softkey to cycle through each cylinder and view its EGT and CHT. The selected cylinder is shown in cyan.

When the ASSIST Softkey is selected, the system initially highlights and selects the cylinder number with the hottest EGT and displays its temperature below the EGT bar graph. A readout showing the difference between peak ($\Delta$PEAK) and the current temperature for the selected cylinder is displayed the EGT numerical temperature indication.

As the mixture is leaned, a cyan line will appear above each cylinder to indicate EGT peak. Refer to the POH and AFM for the recommended mixture adjustment procedures.
Monitoring of the cylinder continues until the **ASSIST** Softkey is pressed again which disables lean assist and removes the peak lines from the bar graph and the temperature deviation from peak (\(\Delta \text{PEAK}\)). The system then returns to seeking the hottest cylinder.

**FUEL CALCULATIONS**

**NOTE:** *Fuel calculations do not use the aircraft fuel quantity indicators and are calculated from the last time the fuel was reset.*

Fuel used (GAL Used) and range (in nautical miles) are calculated based on the displayed fuel remaining (GAL REM) and the fuel flow totalizer. The calculated range also takes into account the aircraft’s heading and the wind direction and speed.

### Adjusting the fuel totalizer quantity:

1) From the MFD Navigation Map Page.
2) Press the **Engine** softkey.
3) Press the **System** softkey.
4) Press the **GAL REM** softkey.

Select the softkey that best describes the current fuel load desired. Once selected, press the **BACK** softkey.

### Resetting the fuel totalizer:

On the Engine System Page, press the **RST Fuel** Softkey; this resets displayed fuel remaining (GAL REM) to the maximum fuel capacity for the aircraft and fuel used to zero.

![Fuel Calculations Group](image_url)

- **Fuel Flow**
- **Calculated Fuel Used**
- **Calculated Fuel Remaining**
A map feature related to the EIS Fuel Calculations is the Fuel Range Ring, which graphically illustrates the aircraft’s remaining range based on heading, groundspeed, and wind direction and speed. The solid green circle represents the range until all the remaining fuel is depleted. The dashed green circle indicates the aircraft range until only reserve fuel remains. Once on reserve fuel, the range is indicated by a solid amber circle.

The Fuel Range Ring shifts position in relation to the aircraft according to wind effects. For example, more fuel is required for flying into a headwind, and the aircraft’s decreased range in that direction is indicated by the Fuel Range Ring shifting toward the tail of the Aircraft Symbol.

The amount of reserve fuel (only for purposes of the Fuel Range Ring) is set on the Navigation Map Page Setup Menu in terms of remaining flight time. When enabled the Fuel Range Ring appears on the Navigation Map Page, the Weather Data Link Page, and PFD Inset Map.

### Enabling/disabling the Fuel Range Ring and selecting a reserve fuel time:

1) Display the Navigation Map Page (press and hold the **CLR** Key for 2 seconds to quickly select this map).

2) Press the **MENU** Key.

3) Highlight ‘Map Setttings’ and press the **ENT** Key. The Map Settings Menu is displayed.

4) Use the small **FMS** Knob to select the ‘Map’ group and press the **ENT** Key.

5) Highlight the ‘FUEL RNG (RSV)’ field.

6) Turn the small **FMS** Knob to select ‘On’ or ‘Off’.

7) Turn the large **FMS** Knob to highlight the reserve fuel time, how long the aircraft can fly after reaching the reserve fuel.

8) Enter the desired reserve fuel time (00:00 to 23:59; hours:minutes) and press the **ENT** Key.

9) Press the **FMS** Knob to return to the Navigation Map Page.
OIL PRESSURE AND TEMPERATURE GAUGES

Engine oil pressure and temperature are shown along horizontal bar indicators on the MFD, and are shown in numerical digit readouts when Engine System is displayed. Oil pressure is shown in pounds per square inch (psi) and temperature in degrees of Fahrenheit (°F). If the oil pressure pointer enters the amber band, a caution is issued. If the oil pressure or oil temperature pointers enter the red band, a warning is issued.

![Engine Displayed Oil Pressure and Temperature Gauges Displayed on MFD](image)

Engine System Displayed Oil Pressure and Temperature Gauges

FUEL QUANTITY

The fuel display shows the fuel quantity in each tank in gallons (gal). Fuel quantity for each tank is normally shown along a horizontal bar indicator. A caution or warning is issued for low fuel quantity.

![Fuel Display](image)
CREW ALERTING SYSTEM (CAS)

**NOTE:** Refer to the Pilot’s Operating Handbook (POH) for corrective pilot actions.

**NOTE:** Any CAS messages that are generated when the system is first powered on are considered already acknowledged. They do not flash or trigger the Master Warning or Master Caution.

The Crew Alerting System (CAS) Display is located on the right side of the PFD. Up to 14 messages can be displayed; when more than 14 messages accumulate, the scrolling CAS softkeys become available.

CAS messages are grouped by criticality (warning, caution) and sorted by order of appearance (most recent messages on top). The color of the message is based on its urgency and on required action:

- **Warning** (red) – Immediate crew awareness and action required; Master Warning triggered
- **Caution** (amber) – Immediate crew awareness and possible future corrective action required; Master Caution triggered
- **Advisory** (white) – Crew awareness required and subsequent action may be required
ENTER OR CHANGE A FLIGHT ID (OPTIONAL)

1) Press the TMR/REF Softkey, then turn the large FMS Knob to highlight the Flight ID field.
2) Turn the small FMS Knob to enter the first character.
3) Turn the large FMS Knob to select the next field.
4) Turn the small FMS Knob to enter the next desired character.
5) Repeat steps 3 and 4 until the desired Flight ID is entered.
6) Press the ENT Key to update the Flight ID. Do not perform any other system functions until ‘updating’ is no longer displayed.

ADF TUNING (OPTIONAL)

Tune the ADF using the remote ADF control head.

DME TUNING (OPTIONAL)

1) Press the DME Softkey.
2) Turn the large FMS to select the DME source field.
3) Turn the small FMS Knob to select the desired Nav radio.
4) Press the ENT Key to complete the selection.

SELECTING TRANSPONDER MODE

1) Press the XPDR Softkey to display the Transponder Mode Selection Softkeys.
2) Select the desired softkey to activate the transponder mode.
**Nav/Com/XPDR/Audio Panel**

**ENTER A TRANSPONDER CODE**

1) Press the **XPDR** Softkey to display the transponder mode selection softkeys.

2) Press the **Code** Softkey to display the transponder code selection softkeys, for digit entry.

3) Press the digit softkeys to enter the code in the code field. When entering the code, the next key in sequence must be pressed within 10 seconds, or the entry is cancelled and restored to the previous code. Five seconds after the fourth digit has been entered, the transponder code becomes active.

**SELECTING A COM RADIO**

**Transmit/Receive**

Press the **COM1 MIC, COM2 MIC, or COM3 MIC** (optional COM, if installed) Key on the audio panel.

**Receive Only**

Press the **COM1, COM2, or COM3** (optional COM, if installed) Key on the audio panel.

**SELECTING A NAV RADIO**

1) To begin navigating using a navigation radio, press the **CDI** Softkey on the PFD to select VOR1/LOC1 (NAV1) or VOR2/LOC2 (NAV2).

2) Press the **NAV1, NAV2, DME, or ADF** Key on the audio panel to select or deselect the navigation radio audio source. All radio keys can be selected individually or together.

**NAV/COM TUNING**

1) Press the small tuning knob to select the desired radio for tuning. A cyan box highlights the radio frequency to be tuned.

2) Turn the respective tuning knobs to enter the desired frequency into the standby frequency field. The large knob enters MHz and the small knob enters kHz.

3) Press the Frequency Transfer Key to place the frequency into the active frequency field.
AUTO-TUNING RADIOS ON THE PFD

1) Press the Nearest Softkey to display the Nearest Airports Window.
2) Turn either FMS Knob to highlight the desired frequency.
3) Press the ENT Key to place the frequency in the standby field of the active COM.
4) Press the Frequency Transfer Key to place the frequency in the active field.

NAV frequencies are entered automatically in the NAV frequency active or standby field (depending in CDI selection) upon approach loading or approach activation.

AUTO-TUNING RADIOS ON THE MFD

Auto-tuning on the MFD is done in much the same way as on the PFD. Use the FMS Knobs to select the desired frequency on any of the information pages. Pressing the ENT Key then loads the selected frequency in the tuning box as a standby frequency.

SPLIT COM

During Split COM operation, both the pilot and the copilot can transmit simultaneously over separate radios. The pilot can still monitor NAV1, NAV2, ADF, DME, and MKR Audio as selected, but the copilot is only able to monitor COM2.

When Split COM operation is selected, COM1 is used by the pilot and COM2 is used by the copilot. The COM1 MIC Annunciator flashes when the pilot’s microphone PTT is pressed. The COM2 MIC Annunciator flashes when the copilot’s microphone PTT is pressed.

Pressing the COM 1/2 Key selects Split COM operation. The COM 1/2 Annunciator is illuminated indicating Split COM operation. COM1 and COM2 frequencies are displayed in green indicating that both transceivers are active. Split COM operation is cancelled by pressing the COM 1/2 Key again, at which time the annunciator is extinguished.
DIGITAL CLEARANCE RECORDER AND PLAYER

NOTE: Only the audio for the selected COM MIC Key is recorded. Audio is not recorded for COM3 MIC.

- Pressing PLAY once plays the latest recorded memory block, then returns to normal operation.
- Pressing MKR/MUTE while playing a memory block stops play.
- Pressing the PLAY Key during play begins playing the previously recorded memory block. Each subsequent press of the PLAY Key begins playing the next previously recorded block.

INTERCOM SYSTEM (ICS) ISOLATION

Press the PILOT and/or COPLT Key to select those isolated from hearing the Nav/Com radios and music.

FLIGHT MANAGEMENT

Changing A Field In The MFD Navigation Status Box

1) Use the FMS Knob to select the AUX - System Setup 1 Page.
2) Press the FMS Knob momentarily to activate the flashing cursor.
3) Turn the large FMS Knob to highlight the desired field number in the MFD Data Bar Fields Box.
4) Turn the small FMS Knob to display and scroll through the data options list to select the desired data.
5) Press the ENT Key. Pressing the Defaults Softkey returns all fields to the default setting.

USING MAP DISPLAYS

CHANGING THE NAVIGATION MAP ORIENTATION

1) With the Navigation Map Page displayed, press the MENU Key. The cursor flashes on the ‘Map Settings’ option.
2) Press the ENT Key to display the Map Settings Window.
3) Turn the large FMS Knob, or press the ENT Key once, to select the ‘Orientation’ field.
4) Turn the small FMS Knob to select the desired orientation.
5) Press the ENT Key to select the new orientation.
6) Press the FMS Knob to return to the base page.

CONFIGURING AUTOMATIC ZOOM

1) Press the MENU Key with the Navigation Map Page displayed. The cursor flashes on the ‘Map Settings’ option.
2) Press the ENT Key. The Map Settings Menu is displayed.
3) Select the ‘Map’ group.
4) Press the ENT Key.
5) Highlight the ‘Auto Zoom’ on/off field, and select ‘Off’ or ‘On’ using the small FMS Knob.
6) Press the ENT Key to accept the selected option. The flashing cursor highlights the ‘Auto Zoom’ display selection field.

7) Select ‘MFD’, ‘PFD’, or ‘All’ using the small FMS Knob.

8) Press the ENT Key to accept the selected option. The flashing cursor highlights the ‘Max Look FWD’ field. Times are from zero to 999 minutes.

9) Use the FMS Knobs to set the time. Press the ENT Key.

10) Repeat step 9 for ‘Min Look FWD’ (zero to 99 minutes) and ‘Time Out’ (zero to 99 minutes).

11) Press the FMS Knob to return to the Navigation Map Page.

PANNING THE MAP

1) Push the Joystick to display the Map Pointer.

2) Move the Joystick to move the Map Pointer around the map.

3) Push the Joystick to remove the Map Pointer and recenter the map on the aircraft’s current position.

REVIEWING INFORMATION FOR AN AIRPORT, NAVAID, OR USER WAYPOINT

1) Place the Map Pointer on a waypoint.

2) Press the ENT Key to display the Waypoint Information Page for the selected waypoint.

3) Press the Go Back Softkey, the CLR Key, or the ENT Key to exit the Waypoint Information Page and return to the Navigation Map showing the selected waypoint.

VIEWING AIRSPACE INFORMATION FOR A SPECIAL-USE OR CONTROLLED AIRSPACE

1) Place the Map Pointer on the boundary of an airspace.

2) Push the Joystick to remove the Map Pointer and center the map on the aircraft.
DISPLAYING/REMOVING TOPOGRAPHIC DATA ON THE PFD INSET MAP OR THE HSI MAP

1) Press the Map/HSI Softkey.
2) Press the Topo Softkey.
3) Press the Topo Softkey again to remove topographic data from the PFD Inset Map or the HSI Map. When topographic data is removed from the PFD Map or HSI Map, all navigation data is presented on a black background.

DISPLAYING/REMOVING TOPOGRAPHIC DATA USING THE NAVIGATION MAP PAGE MENU

1) Press the MENU Key with the Navigation Map Page displayed. The cursor flashes on the ‘Map Settings’ option.
2) Press the ENT Key. The Map Settings Menu is displayed.
3) Select the ‘Map’ group.
4) Press the ENT Key.
5) Highlight the ‘Terrain Display’ field.
6) Select ‘Topo’ or ‘Off’.
7) Press the FMS Knob to return to the Navigation Map Page.

SETTING UP THE ‘LAND’, ‘AVIATION’ OR ‘AIRSPACE’ GROUP ITEMS

1) Press the MENU Key with the Navigation Map Page displayed. The cursor flashes on the ‘Map Settings’ option.
2) Press the ENT Key. The Map Settings Menu is displayed.
3) Turn the small FMS Knob to select the desired group.
4) Press the ENT Key. The cursor flashes on the first field.
5) Turn the large FMS Knob to select the desired option.
6) Turn the small FMS Knob to select the desired setting (e.g. On/Off or maximum range).
7) Press the ENT Key to accept the selected option and move the cursor to the next item.
8) Repeat steps 5-7 as necessary.
9) Press the FMS Knob to return to the Navigation Map Page.
DECLUTTERING THE MAP

Press the Detail Softkey with the Navigation Map Page displayed. The current declutter level is shown. With each softkey press, another level of map information is removed.

DECLUTTERING THE PFD INSET MAP

1) Press the Map/HSI Softkey.
2) Press the Detail Softkey. The current declutter level is shown. With each selection, another level of map information is removed.

DISPLAYING/REMOVING AIRWAYS

1) Press the Map Opt Softkey.
2) Press the AWY Softkey. Both High and Low Altitude Airways are displayed (AWY On).
3) Press the softkey again to display Low Altitude Airways only (AWY LO).
4) Press the softkey again to display High Altitude Airways only (AWY HI).
5) Press the softkey again to remove High Altitude Airways. No airways are displayed (AWY Off).

SELECTING AN AIRWAY RANGE (LOW ALT AIRWAYS OR HIGH ALT AIRWAYS)

1) Press the MENU Key with the Navigation Map Page displayed. The cursor flashes on the ‘Map Settings’ option.
2) Press the ENT Key. The Map Settings Menu is displayed.
3) Turn the small FMS Knob to select the ‘Airways’ group, and press the ENT Key.
4) Highlight the ‘Low ALT Airways’ or ‘High ALT Airways’ range field.
5) To change the range setting, turn the small FMS Knob to display the range list.
6) Select the desired range using the small FMS Knob.
7) Press the ENT Key.
8) Press the FMS Knob to return to the Navigation Map Page.
DISPLAYING/REMOVING THE TRACK VECTOR

1) Press the **MENU** Key with the Navigation Map Page displayed. The cursor flashes on the ‘Map Setting’ option.

2) Press the **ENT** Key. The Map Settings Menu is displayed.

3) Select the ‘Map’ group.

4) Press the **ENT** Key.

5) Highlight the ‘Track Vector’ field.

6) Select ‘On’ or ‘Off’. Press the **ENT** Key to accept the selected option. The flashing cursor highlights the look ahead time field. Use the **FMS** Knob to select the desired time. Press the **ENT** Key.

7) Press the **FMS** Knob to return to the Navigation Map Page.

DISPLAYING/REMOVING THE FUEL RANGE RING AND SELECTING A FUEL RANGE TIME

1) Press the **MENU** Key with the Navigation Map Page displayed. The cursor flashes on the ‘Map Settings’ option.

2) Press the **ENT** Key. The Map Settings Menu is displayed.

3) Select the ‘Map’ group.

4) Press the **ENT** Key.

5) Highlight the ‘Fuel Range (RSV)’ field.

6) Select ‘On’ or ‘Off’.

7) Highlight the fuel reserve time field. This time should be set to the amount of flight time equal to the amount of fuel reserve desired.

8) To change the reserve fuel time, enter a time (00+00 to 23+59; hours+minutes). The default setting is 00+45 minutes.

9) Press the **ENT** Key.

10) Press the **FMS** Knob to return to the Navigation Map Page.

DISPLAYING/REMOVING THE SELECTED ALTITUDE INTERCEPT ARC

1) Press the **MENU** Key with the Navigation Map Page displayed. The cursor flashes on the ‘Map Settings’ option.

2) Press the **ENT** Key. The Map Settings Menu is displayed.
Flight Management

3) Select the ‘Map’ group.
4) Press the ENT Key.
5) Highlight the ‘Select ALT Arc’ field.
6) Select ‘On’ or ‘Off’.
7) Press the FMS Knob to return to the Navigation Map Page.

WAYPOINTS

SELECTING AN AIRPORT FOR REVIEW BY IDENTIFIER, FACILITY NAME, OR LOCATION

1) From the Airport Information Page, press the FMS Knob.
2) Use the FMS Knobs and enter an identifier, facility name, or location.
3) Press the ENT Key.
4) Press the FMS Knob to remove the cursor.

SELECTING A RUNWAY

1) With the Airport Information Page displayed, press the FMS Knob to activate the cursor.
2) Turn the large FMS Knob to place the cursor in the ‘Runways’ Box, on the runway designator.
3) Turn the small FMS Knob to display the desired runway (if more than one) for the selected airport.
4) To remove the flashing cursor, press the FMS Knob.

VIEWING A DESTINATION AIRPORT

From the Airport Information Page press the MENU Key. Select ‘View Destination Airport’. The Destination Airport is displayed.

VIEWING INFORMATION FOR A NEAREST AIRPORT ON THE PFD

1) Press the Nearest Softkey to display the Nearest Airports Window.
2) Highlight the airport identifier with the FMS Knob and press the ENT Key to display the Airport Information Window.
3) To return to the Nearest Airports Window press the **ENT** Key (with the cursor on ‘BACK’) or press the **CLR** Key. The cursor is now on the next airport in the nearest airports list. (Repeatedly pressing the **ENT** Key moves through the airport list, alternating between the Nearest Airports Window and the Airport Information Window.)

4) Press the **CLR** Key or the **Nearest** Softkey to close the PFD Nearest Airports Window.

**VIEWING INFORMATION FOR A NEAREST AIRPORT ON THE MFD**

1) Turn the large **FMS** Knob to select the NRST page group.

2) Turn the small **FMS** Knob to select the Nearest Airports Page (it is the first page of the group, so it may already be selected). If there are no Nearest Airports available, “None Within 200nm” is displayed.

3) Press the **APT** Softkey; or press the **FMS** Knob; or press the **MENU** Key, highlight ‘Select Airport Window’ and press the **ENT** Key. The cursor is placed in the ‘Nearest Airports’ Box. The first airport in the nearest airports list is highlighted.

4) Turn the **FMS** Knob to highlight the desired airport. (Pressing the **ENT** Key also moves to the next airport.)

5) Press the **FMS** Knob to remove the flashing cursor.

**VIEWING RUNWAY INFORMATION FOR A SPECIFIC AIRPORT**

1) With the Nearest Airports Page displayed, press the **RNWY** Softkey; or press the **MENU** Key, highlight ‘Select Runway Window’; and press the **ENT** Key. The cursor is placed in the ‘Runways’ Box.

2) Turn the small **FMS** Knob to select the desired runway.

3) Press the **FMS** Knob to remove the flashing cursor.

**SELECTING AN INTERSECTION**

1) With the Intersection Information Page displayed, enter an identifier in the Intersection Box.

2) Press the **ENT** Key.

3) Press the **FMS** Knob to remove the flashing cursor.
SELECTING AN NDB

1) With the NDB Information Page displayed, enter an identifier, the name of the NDB, or the city in which it’s located in the NDB Box.

2) Press the ENT Key.

3) Press the FMS Knob to remove the flashing cursor.

SELECTING A VOR

1) With the VOR Information Page displayed, enter an identifier, the name of the VOR, or the city in which it’s located in the VOR Box.

2) Press the ENT Key.

3) Press the FMS Knob to remove the flashing cursor.

SELECTING A VRP

1) With the VRP Information Page displayed, enter the identifier or the name of the VRP in the VRP Box.

2) Press the ENT Key.

3) Press the FMS Knob to remove the flashing cursor.

SELECTING A USER WAYPOINT

1) With the User Waypoint Information Page displayed, enter the name of the User Waypoint, or scroll to the desired waypoint in the User Waypoint List using the large FMS Knob.

2) Press the ENT Key.

3) Press the FMS Knob to remove the flashing cursor.

CREATING USER WAYPOINTS FROM THE USER WAYPOINT INFORMATION PAGE

1) With the User Waypoint Information Page displayed, press the New Softkey, or press the MENU Key and select ‘Create New User Waypoint’.

2) Enter a user waypoint name (up to six characters).

3) Press the ENT Key. The current aircraft position is the default location of the new waypoint.
4) If desired, define the type and location of the waypoint in one of the following ways:

Select “RAD/RAD” using the small FMS Knob, press the ENT Key, and enter the two reference waypoint identifiers and radials into the Reference Waypoints window using the FMS Knobs.

Or:

Select “RAD/DIS” using the small FMS Knob, press the ENT Key, and enter the reference waypoint identifier, the radial, and the distance into the Reference Waypoints window using the FMS Knobs.

Or:

Select “LAT/LON” using the small FMS Knob, press the ENT Key, and enter the latitude and longitude into the Information window using the FMS Knobs.

5) Press the ENT Key to accept the new waypoint.

6) If desired, change the storage method of the waypoint to Temporary or Normal by moving the cursor to “Temporary” and selecting the ENT Key to check or uncheck the box.

7) Press the FMS Knob to remove the flashing cursor.

CREATING USER WAYPOINTS FROM MAP PAGES

1) Push the Joystick to activate the panning function and pan to the map location of the desired user waypoint.

2) Press the ENT Key. The User Waypoint Information Page is displayed with the captured position.

3) Enter a user waypoint name (up to six characters).

4) Press the ENT Key to accept the selected name. The first reference waypoint box is highlighted.

5) If desired, define the type and location of the waypoint in one of the following ways:

Select “RAD/RAD” using the small FMS Knob, press the ENT Key, and enter the two reference waypoint identifiers and radials into the Reference Waypoints window using the FMS Knobs.

Or:
Flight Management

Select “RAD/DIS” using the small FMS Knob, press the ENT Key, and enter the reference waypoint identifier, the radial, and the distance into the Reference Waypoints window using the FMS Knobs.

Or:

Select “LAT/LON” using the small FMS Knob, press the ENT Key, and enter the latitude and longitude into the Information window using the FMS Knobs.

6) Press the ENT Key to accept the new waypoint.

7) If desired, change the storage method of the waypoint to “Temporary” or “Normal” by moving the cursor to “Temporary” and selecting the ENT Key to check or uncheck the box.

8) Press the FMS Knob to remove the flashing cursor.

9) Press the Go Back Softkey to return to the map page.

CHANGING THE ALTITUDE BUFFER DISTANCE SETTING

1) Use the FMS Knob to select the AUX - System Setup 1 Page.

2) Press the FMS Knob momentarily to activate the flashing cursor.

3) Turn the large FMS Knob to highlight the altitude buffer field in the Airspace Alerts Box.

4) Use the FMS Knob to enter an altitude buffer value and press the ENT Key.

5) Press the FMS Knob to remove the flashing cursor.

AIRSPACES

TURNING AN AIRSPACE ALERT ON OR OFF

1) Use the FMS Knob to select the AUX - System Setup 1 Page.

2) Press the FMS Knob momentarily to activate the flashing cursor.

3) Turn the large FMS Knob to highlight the desired field in the Airspace Alerts Box.

4) Turn the small FMS Knob clockwise to turn the airspace alert ON or counterclockwise to turn the alert OFF.

5) Press the FMS Knob to remove the flashing cursor.
SELECTING AND VIEWING AN AIRSPACE ALERT WITH ITS ASSOCIATED INFORMATION

1) Select the Nearest Airspaces Page.
2) Press the Alerts Softkey; or press the FMS Knob; or press the MENU Key, highlight ‘Select Alerts Window’, and press the ENT Key. The cursor is placed in the ‘Airspace Alerts’ Box.
3) Select the desired airspace.
4) Press the FMS Knob to remove the flashing cursor.

TURNING SMART AIRSPACE ON OR OFF

1) Use the FMS Knob to select the Navigation Map Page.
2) Press the MENU Key, and press the ENT Key. The cursor is placed in the ‘Group’ Box.
3) Turn the small FMS Knob to highlight the ‘Airspace’ in the ‘Group’ Box and press the ENT Key.
4) Turn the large FMS Knob to highlight the ‘Smart Airspace’ field in the Aviation Map Setup Window.
5) Turn the small FMS Knob clockwise to turn smart airspace ‘On’ or counterclockwise to turn smart airspace ‘Off’.
6) Press the FMS Knob to remove the flashing cursor.

DIRECT-TO NAVIGATION

ENTERING A WAYPOINT IDENTIFIER, FACILITY NAME, OR CITY AS A DIRECT-TO DESTINATION

1) Press the Direct-to Key. The Direct-to Window is displayed (with the active flight plan waypoint as the default selection or a blank waypoint field if no flight plan is active).
Flight Management

2) Turn the small FMS Knob clockwise to begin entering a waypoint identifier (turning it counter-clockwise brings up the waypoint selection submenu - press the CLR Key to remove it), or turn the large FMS Knob to select the facility name, or city field and turn the small FMS Knob to begin entering a facility name or city. If duplicate entries exist for the entered facility or city name, additional entries can be viewed by turning the small FMS Knob during the selection process.

3) Press the ENT Key. The ‘Activate?’ field is highlighted.

4) Press the ENT Key to activate the direct-to.

SELECTING AN ACTIVE FLIGHT PLAN WAYPOINT AS A DIRECT-TO DESTINATION

1) While navigating an active flight plan, press the Direct-to Key. The Direct-to Window is displayed with the active flight plan waypoint as the default selection.

2) Turn the small FMS Knob counter-clockwise to display a list of flight plan waypoints (the FPL list is populated only when navigating a flight plan).

3) Select the desired waypoint.

4) Press the ENT Key. The cursor is now displayed on ‘Activate?’.

5) Press the ENT Key again to activate the direct-to.

SELECTING A NEAREST, RECENT OR USER WAYPOINT AS A DIRECT-TO DESTINATION

1) Press the Direct-to Key. The Direct-to Window is displayed (with the active flight plan destination as the default selection or a blank destination if no flight plan is active).

2) Turn the small FMS Knob counter-clockwise to display a list of flight plan waypoints (the FPL list is populated only when navigating a flight plan).

3) Turn the small FMS Knob clockwise to display the Nearest, Recent or User waypoints.

4) Turn the large FMS Knob clockwise to select the desired waypoint.

5) Press the ENT Key. The cursor is now displayed on ‘Activate?’.

6) Press the ENT Key again to activate the direct-to.
CANCELLING A DIRECT-TO

1) Press the **Direct-to** Key to display the Direct-to Window.
2) Press the **MENU** Key.
3) With ‘Cancel Direct-To NAV’ highlighted, press the **ENT** Key. If a flight plan is still active, the system resumes navigating the flight plan along the closest leg.

SELECTING A MANUAL DIRECT-TO COURSE

1) Press the **Direct-to** Key. The Direct-to Window is displayed with the destination field highlighted.
2) Highlight the course field.
3) Enter the desired course.
4) Press the **ENT** Key. The cursor is now displayed on ‘Activate?’.
5) Press the **ENT** Key again to activate the direct-to.

ENTERING A VNV ALTITUDE AND ALONG-TRACK OFFSET FOR THE WAYPOINT

1) Press the **Direct-to** Key to display the Direct-to Window.
2) Turn the large **FMS** Knob to place the cursor over the ‘VNV’ altitude field.
3) Enter the desired altitude.
4) Press the **ENT** Key. The option to select MSL or AGL is now displayed if the entry was an airport. Turn the small **FMS** Knob to select ‘MSL’ or ‘AGL’.
5) Press the **ENT** Key. The cursor is now flashing in the VNV offset distance field.
6) Enter the desired along-track distance before the waypoint.
7) Press the **ENT** Key. The ‘Activate?’ field is highlighted.
8) Press the **ENT** Key to activate.

REMOVING A VNV ALTITUDE CONSTRAINT

1) Press the **Direct-to** Key to display the Direct-to Window.
2) Press the **MENU** Key.
3) With ‘Clear Vertical Constraints’ highlighted, press the **ENT** Key.
FLIGHT PLANNING

CREATING AN ACTIVE FLIGHT PLAN

1) Press the FPL Key.

2) Press the small FMS Knob to activate the cursor (only on MFD).

3) Select the origin airport and runway.

   a) Turn the small FMS Knob to display the Waypoint Information Window. (Turning it clockwise displays a blank Waypoint Information Window, turning it counter-clockwise displays the Waypoint Information Window with a waypoint selection submenu allowing selection of active flight plan, nearest, recent, or user waypoints).

   b) Enter the identifier, facility, or city name of the departure waypoint or select a waypoint from the submenu of waypoints and press the ENT Key. The Set Runway Window is displayed with the Runway field highlighted.

   c) Turn the small FMS Knob to select the runway and press the ENT Key.

   d) Press the ENT Key again to add the runway to the flight plan.

4) Turn the large FMS Knob to highlight the destination airport identifier field.

5) Select the destination airport and runway.

   a) Turn the small FMS Knob to display the Waypoint Information Window. (Turning it clockwise displays a blank Waypoint Information Window, turning it counter-clockwise displays the Waypoint Information Window with a waypoint selection submenu allowing selection of active flight plan, nearest, recent, or user waypoints).

   b) Enter the identifier, facility, or city name of the departure waypoint or select a waypoint from the submenu of waypoints and press the ENT Key. The Set Runway Window is displayed with the Runway field highlighted.

   c) Turn the small FMS Knob to select the runway and press the ENT Key.

   d) Press the ENT Key again to add the runway to the flight plan.

6) Turn the large FMS Knob to highlight the Enroute Header, an enroute waypoint, or the dashes below the header. (If the header is selected, the new waypoint is placed following the header. If an enroute waypoint or the dashes are selected, the new waypoint will be placed ahead of the selected item.)
Flight Management

a) Turn the small FMS Knob to display the Waypoint Information Window. (Turning it clockwise displays a blank Waypoint Information Window, turning it counter-clockwise displays the Waypoint Information Window with a waypoint selection submenu allowing selection of active flight plan, nearest, recent, or user waypoints).

b) Enter the identifier, facility, or city name of the departure waypoint or select a waypoint from the submenu of waypoints and press the ENT Key. The active flight plan is modified as each waypoint is entered.

7) Repeat step number 6 to enter each additional enroute waypoint.

8) When all waypoints have been entered, press the FMS Knob to remove the cursor.

**ADDING A WAYPOINT TO THE ACTIVE FLIGHT PLAN**

1) Press the FPL Key.

2) Press the FMS Knob to activate the cursor (not required on the PFD).

3) Select the point in the flight plan before which to add the new waypoint. The new waypoint is placed directly in front of the highlighted waypoint.

4) Turn the small FMS Knob to display the Waypoint Information Window. (Turning it clockwise displays a blank Waypoint Information Window, turning it counter-clockwise displays the Waypoint Information Window with a waypoint selection submenu allowing selection of active flight plan, nearest, recent, user, or airway waypoints).

5) Enter the identifier, facility, or city name of the waypoint or select a waypoint from the submenu of waypoints and press the ENT Key. The active flight plan is modified as each waypoint is entered.

**CREATING AND ADDING USER WAYPOINTS TO THE ACTIVE FLIGHT PLAN**

1) Push the Joystick to activate the panning function on the Active Flight Plan Page and pan to the map location of the desired user waypoint.

2) Press the LD WPT Softkey; or press the MENU Key, select ‘Load Waypoint’, and press the ENT Key. The user waypoint is created with a name of USRxxx (using the next available in sequence) and is added to the end of the active flight plan.
ADDING AN AIRWAY TO A FLIGHT PLAN

1) Press the FPL Key.
2) Press the FMS Knob to activate the cursor (not required on the PFD).
3) Turn the large FMS Knob to highlight the waypoint after the desired airway entry point. If this waypoint is not a valid airway entry point, a valid entry point should be entered at this time.
4) Press the MENU Key and select “Load Airway”. The Select Airway Page is displayed.
5) Turn the FMS Knob to select the desired airway from the list, and press the ENT Key. Low altitude airways are shown first in the list, followed by “all” altitude airways, and then high altitude airways.
6) Turn the FMS Knob to select the desired airway exit point from the list, and press the ENT Key. ‘Load?’ is highlighted.
7) Press the ENT Key. The system returns to editing the flight plan with the new airway inserted.

COLLAPSE/EXPAND AIRWAYS IN A FLIGHT PLAN

1) Press the FPL Key.
2) Press the FMS Knob to activate the cursor (not required on the PFD).
3) Press the MENU Key, highlight ‘Collapse Airways’ or ‘Expand Airways’ and press the ENT Key. All airways are collapsed/expanded.

STORING AN ACTIVE FLIGHT PLAN FROM THE ACTIVE FLIGHT PLAN PAGE OR THE ACTIVE FLIGHT PLAN WINDOW

1) Press the MENU Key.
2) Highlight ‘Store Flight Plan’.
3) Press the ENT Key.
4) With ‘OK’ highlighted, press the ENT Key. The flight plan is stored in the next available position in the flight plan list on the Flight Plan Catalog Page.
ACTIVATING A STORED FLIGHT PLAN ON THE MFD

1) Press the FPL Key and turn the small FMS Knob to display the Flight Plan Catalog Page.
2) Press the FMS Knob to activate the cursor, and turn the FMS Knob to highlight the desired flight plan.
3) Press the Activate Softkey; or press the ENT Key twice; or press the MENU Key, highlight ‘Activate Flight Plan’, and press the ENT Key. The ‘Activate Stored Flight Plan?’ window is displayed.
4) With ‘OK’ highlighted, press the ENT Key. To cancel the request, press the CLR Key, or highlight ‘CANCEL’ and press the ENT Key.

INVERTING AND ACTIVATING A STORED FLIGHT PLAN ON THE MFD

1) Press the FPL Key and turn the small FMS Knob to display the Flight Plan Catalog Page.
2) Press the FMS Knob to activate the cursor, and turn the FMS Knob to highlight the desired flight plan.
3) Press the Invert Softkey; or press the MENU Key, highlight ‘Invert & Activate FPL?’, and press the ENT Key. The ‘Invert and activate stored flight plan?’ window is displayed.
4) With ‘OK’ highlighted, press the ENT Key. To cancel the request, press the CLR Key, or highlight ‘CANCEL’ and press the ENT Key.

IMPORT A FLIGHT PLAN FROM AN SD CARD

1) Insert the SD card containing the flight plan in the top card slot on the MFD.
2) Press the FPL Key on the MFD to display the Active Flight Plan Page on the MFD.
3) Turn the small FMS Knob to select the Flight Plan Catalog Page.
4) Press the FMS Knob to activate the cursor.
5) Turn either FMS Knob to highlight an empty or existing flight plan.
6) Press the Import Softkey.
   If an empty flight plan is selected, a list of the available flight plans on the SD card will be displayed.
   Or:
Flight Management

If an existing flight plan is selected, an ‘Overwrite existing flight plan? OK or CANCEL’ prompt is displayed. Press the ENT Key to choose to overwrite the selected flight plan and see a list of the available flight plans on the SD card. If overwriting the existing flight plan is not desired, select ‘CANCEL’ using the FMS Knob, press the ENT Key, select another existing or empty flight plan, and again press the Import Softkey.

7) Turn the small FMS Knob to highlight the desired flight plan for importing.
8) Press the ENT Key to confirm the import.

EXPORT A FLIGHT PLAN TO AN SD CARD

1) Insert the SD card into the top card slot on the MFD.
2) Press the FPL Key to display the Active Flight Plan Page on the MFD.
3) Turn the small FMS Knob to select the Flight Plan Catalog Page.
4) Press the FMS Knob to activate the cursor.
5) Turn the large FMS Knob to highlight the flight plan to be exported.
6) Press the Export Softkey.
7) Press the ENT Key to confirm the export.

Flight plans can be transferred to or from a mobile device via the Flight Stream 510 Bluetooth wireless connection. Transfer of a flight plan to a mobile device is controlled by the mobile device.

PREVIEWING A FLIGHT PLAN TRANSFER FROM A WIRELESS CONNECTION:

1) When a flight plan transfer has been initiated from a mobile device, a Pending Flight Plan pop-up alert appears in the lower right corner of the MFD, and a Connext annunciation appears to the right of the MFD page name.
2) Press the ENT Key to display the Preview Flight Plan Page on the MFD.
IGNORING A FLIGHT PLAN TRANSFER FROM A WIRELESS CONNECTION:

1) When a flight plan transfer has been initiated from a mobile device, a Pending Flight Plan pop-up alert appears in the lower right corner of the MFD, and an Connext annunciation appears to the right of the MFD page name.

2) Press the CLR Key to remove the pop-up alert and ignore the pending flight plan. The pending flight plan will still be available on the Flight Plan Catalog page.

STORING A PENDING FLIGHT PLAN:

1) Press the FPL Key.
2) Turn the small FMS Knob to display the Flight Plan Catalog Page.
3) Press the FMS Knob to activate the cursor, and
4) Turn the FMS Knob to highlight the pending flight plan.
5) Press the ENT Key to display the Preview Flight Plan Page on the MFD.
6) Press the Store Softkey to store the flight plan. The pending flight plan is stored and the pending annunciation is removed.

ACTIVATING A PENDING FLIGHT PLAN:

1) Press the FPL Key and turn the small FMS Knob to display the Flight Plan Catalog Page.
2) Press the FMS Knob to activate the cursor, and turn the FMS Knob to highlight the pending flight plan.
3) Press the ENT Key to display the Preview Flight Plan Page on the MFD.
4) Press the Activate Softkey. The ‘Activate Flight Plan?’ window is displayed.
5) With ‘OK’ highlighted, press the ENT Key to activate the pending flight plan. The pending flight plan becomes the active flight plan and is removed from the Flight Plan Catalog Page. To cancel the request, press the CLR Key, or highlight ‘CANCEL’ and press the ENT Key.
DELETING A PENDING FLIGHT PLAN:

1) Press the **FPL** Key.
2) Turn the small **FMS** Knob to display the Flight Plan Catalog Page.
3) Press the **FMS** Knob to activate the cursor.
4) Turn the **FMS** Knob to highlight the desired pending flight plan.
5) Press the **Delete** Softkey. The ‘Delete Flight Plan XX?’ window is displayed.
6) With ‘OK’ highlighted, press the **ENT** Key to delete the pending flight plan. The pending flight plan is removed from the Flight Plan Catalog Page. To cancel the request, press the **CLR** Key, or highlight ‘CANCEL’ and press the **ENT** Key.

DELETING ALL PENDING FLIGHT PLANS:

1) Press the **FPL** Key.
2) Turn the small **FMS** Knob to display the Flight Plan Catalog Page.
3) Press the **MENU** Key.
4) Turn the **FMS** Knob to highlight ‘Delete All Pending’.
5) Press the **ENT** Key. A ‘Delete all pending flight plans?’ confirmation window is displayed.
6) With ‘OK’ highlighted, press the **ENT** Key to delete all pending flight plans. To cancel the request, press the **CLR** Key, or highlight ‘CANCEL’ and press the **ENT** Key.

DELETING THE ACTIVE FLIGHT PLAN

1) Press the **FPL** Key to display the Active Flight Plan Page (MFD) or the Active Flight Plan Window (PFD).
2) Press the **MENU** Key, highlight ‘Delete Flight Plan’, and press the **ENT** Key. The ‘Delete all waypoints in flight plan?’ window is displayed.
3) With ‘OK’ highlighted, press the **ENT** Key to delete the active flight plan. To cancel the request, press the **CLR** Key, or highlight ‘CANCEL’ and press the **ENT** Key.
DELETING AN INDIVIDUAL WAYPOINT FROM THE ACTIVE FLIGHT PLAN

1) Press the **FPL** Key to display the Active Flight Plan Page (MFD) or the Active Flight Plan Window (PFD).

2) Press the **FMS** Knob to activate the cursor (not required on the PFD) and turn the large **FMS** Knob to highlight the waypoint to be deleted.

3) Press the **CLR** Key. The ‘Remove XXXXX?’ window is displayed.

4) With ‘OK’ highlighted, press the **ENT** Key. To cancel the request, press the **CLR** Key, or highlight ‘CANCEL’ and press the **ENT** Key.

5) Press the **FMS** Knob to remove the flashing cursor.

DELETING AN ENTIRE AIRWAY FROM THE ACTIVE FLIGHT PLAN

1) Press the **FPL** Key to display the Active Flight Plan Page (MFD) or the Active Flight Plan Window (PFD).

2) Press the **FMS** Knob to activate the cursor (not required on the PFD) and turn the large **FMS** Knob to highlight the cyan header of the airway to be deleted.

3) Press the **CLR** Key. The ‘Remove <airway name> from flight plan?’ window is displayed.

4) With ‘OK’ highlighted, press the **ENT** Key. To cancel the request, press the **CLR** Key, or highlight ‘CANCEL’ and press the **ENT** Key.

5) Press the **FMS** Knob to remove the flashing cursor.

DELETING AN ENTIRE PROCEDURE FROM THE ACTIVE FLIGHT PLAN

1) Press the **FPL** Key to display the Active Flight Plan Page (MFD) or the Active Flight Plan Window (PFD).

2) Press the **FMS** Knob to activate the cursor (not required on the PFD) and turn the large **FMS** Knob to highlight the cyan header of the procedure to be deleted.

3) Press the **CLR** Key. The ‘Remove <procedure name> from flight plan?’ window is displayed.

4) With ‘OK’ highlighted, press the **ENT** Key. To cancel the request, press the **CLR** Key, or highlight ‘CANCEL’ and press the **ENT** Key.

5) Press the **FMS** Knob to remove the flashing cursor.
Flight Management

ENTERING AN ALONG TRACK OFFSET DISTANCE

1) Press the FPL Key to display the Active Flight Plan Page (MFD) or the Active Flight Plan Window (PFD).

2) Press the FMS Knob to activate the cursor (not required on the PFD) and turn the large FMS Knob to highlight the waypoint for the along track offset.

3) Press the ATK OFS Softkey (MFD only); or press the MENU Key, highlight ‘Create ATK Offset Waypoint’, and press the ENT Key.

4) Enter a positive or negative offset distance in the range of +/- 1 to 999 nm (limited by leg distances).

5) Press the ENT Key to create the offset waypoint.

6) Press the FMS Knob to remove the flashing cursor.

ACTIVATING PARALLEL TRACK

1) Press the FPL Key to display the Active Flight Plan Page (MFD) or the Active Flight Plan Window (PFD).

2) Press the MENU Key, highlight ‘Parallel Track’, and press the ENT Key. The Parallel Track Window is displayed with the ‘Direction’ field highlighted.

3) Turn the small FMS Knob to select ‘LEFT’ or ‘RIGHT’ and press the ENT Key. The ‘Distance’ field is highlighted.

4) Turn the small FMS Knob to enter a distance from 1-99 nm and press the ENT Key. ‘Activate Parallel Track’ is highlighted.

5) Press the ENT Key to activate parallel track. Press the FMS Knob or the CLR Key to cancel the parallel track activation.

CANCELLING PARALLEL TRACK

1) Press the FPL Key to display the Active Flight Plan Page (MFD) or the Active Flight Plan Window (PFD).

2) Press the MENU Key, highlight ‘Parallel Track’, and press the ENT Key. The Parallel Track Window is displayed with ‘Cancel Parallel Track?’ highlighted.

3) Press the ENT Key.
**ACTIVATING A FLIGHT PLAN LEG**

1) Press the **FPL** Key to display the Active Flight Plan Page (MFD) or the Active Flight Plan Window (PFD).

2) Press the **FMS** Knob to activate the cursor (not required on the PFD) and turn the large **FMS** Knob to highlight the destination waypoint for the desired leg.

3) Press the **ACT Leg** Softkey (MFD only); or press the **MENU** Key, highlight ‘Activate Leg’, and press the **ENT** Key. A confirmation window is displayed with ‘Activate’ highlighted.

4) Press the **ENT** Key to activate the flight plan leg. To cancel, press the **CLR** Key, or highlight ‘Cancel’ and press the **ENT** Key.

5) Press the **FMS** Knob to remove the flashing cursor.

**INVERTING THE ACTIVE FLIGHT PLAN**

1) Press the **FPL** Key to display the Active Flight Plan Page (MFD) or the Active Flight Plan Window (PFD).

2) Press the **MENU** Key, highlight ‘Invert Flight Plan’, and press the **ENT** Key. An ‘Invert Active Flight Plan?’ confirmation window is displayed.

3) Select ‘OK’.

4) Press the **ENT** Key to invert and activate the active flight plan. To cancel, press the **CLR** Key, or highlight ‘CANCEL’ and press the **ENT** Key.

**INVERTING AND ACTIVATING A STORED FLIGHT PLAN**

1) Press the **FPL** Key and turn the small **FMS** Knob to display the Flight Plan Catalog Page.

2) Press the **FMS** Knob to activate the cursor, and turn the **FMS** Knob to highlight the desired flight plan.

3) Press the **Invert** Softkey; or press the **MENU** Key, highlight ‘Invert & Activate FPL?’, and press the **ENT** Key. The ‘Invert and activate stored flight plan?’ window is displayed.

4) With ‘OK’ highlighted, press the **ENT** Key. To cancel the request, press the **CLR** Key, or highlight ‘CANCEL’ and press the **ENT** Key.
SWITCHING BETWEEN LEG-TO-LEG WAYPOINT DISTANCE AND CUMULATIVE WAYPOINT DISTANCE

1) Press the **FPL** Key on the MFD to display the Active Flight Plan Page.
2) Press the **View** Softkey to display the **CUM** and **Leg-Leg** Softkeys.
3) Press the **CUM** Softkey to view cumulative waypoint distance, or select the **Leg-Leg** Softkey to view leg-to-leg waypoint distance.
4) Press the **Back** Softkey to return to the top level active flight plan softkeys.

DETERMINING THE CLOSEST POINT ALONG THE ACTIVE FLIGHT PLAN TO A SELECTED WAYPOINT

1) Press the **FPL** Key to display the Active Flight Plan Page (MFD) or the Active Flight Plan Window (PFD).
2) Press the **MENU** Key, highlight ‘Closest Point Of FPL”, and press the **ENT** Key. A window appears with the reference waypoint field highlighted.
3) Enter the identifier of the reference waypoint and press the **ENT** Key. The system displays the bearing (BRG) and distance (DIS) to the closest point along the flight plan to the selected reference waypoint and creates a user waypoint at this location. The name for the new user waypoint is derived from the identifier of the reference waypoint.

CREATING A USER-DEFINED HOLD AT AN ACTIVE FLIGHT PLAN WAYPOINT

1) Press the **FPL** Key to display the Active Flight Plan Page (MFD) or the Active Flight Plan Window (PFD).
2) Press the **FMS** Knob to activate the cursor (not required on the PFD) and turn the large **FMS** Knob to highlight the waypoint for the hold.
3) Press the **MENU** Key, highlight ‘Hold At Waypoint’, and press the **ENT** Key. The ‘Hold at’ window appears with the course field highlighted.
4) Use the **FMS** Knobs to edit the entry course, and press the **ENT** Key.
5) Use the small **FMS** Knob to select ‘Inbound’ or ‘Outbound’ course direction, and press the **ENT** Key.
6) Use the small **FMS** Knob to select ‘Time’ or ‘Distance’ length mode, and press the **ENT** Key.
7) Use the **FMS** Knobs to edit the length, and press the **ENT** Key.
8) Use the small FMS Knob to select ‘Right’ or ‘Left’ turn direction, and press the ENT Key.
9) Use the FMS Knobs to edit the Expect Further Clearance Time (EFC Time), and press the ENT Key.
10) Press the ENT Key while ‘Load?’ is highlighted to insert the hold into the flight plan.

CREATING A USER-DEFINED HOLD AT THE AIRCRAFT PRESENT POSITION

1) Press the FPL Key to display the Active Flight Plan Page (MFD) or the Active Flight Plan Window (PFD).
2) Press the MENU Key, highlight ‘Hold At Present Position’, and press the ENT Key. The ‘Hold at’ window appears with the course field highlighted.
3) If desired, use the FMS Knobs to edit the entry course, and press the ENT Key.
4) Use the small FMS Knob to select ‘Inbound’ or ‘Outbound’ course direction, and press the ENT Key.
5) Use the small FMS Knob to select ‘Time’ or ‘Distance’ length mode, and press the ENT Key.
6) Use the FMS Knobs to edit the length, and press the ENT Key.
7) Use the small FMS Knob to select ‘Right’ or ‘Left’ turn direction, and press the ENT Key.
8) Use the FMS Knobs to edit the Expect Further Clearance Time (EFC Time), and press the ENT Key.
9) Press the ENT Key while ‘Activate?’ is highlighted to create an Offroute Direct-to hold waypoint at the aircraft present position and activate the hold.

CREATING A USER-DEFINED HOLD AT A DIRECT-TO WAYPOINT

1) Press a Direct-to Key and set up the direct-to waypoint as desired, but select ‘Hold?’ instead of ‘Activate?’ when finished (MFD or PFD).
2) Use the FMS Knobs to edit the entry course, and press the ENT Key.
3) Use the small FMS Knob to select ‘Inbound’ or ‘Outbound’ course direction, and press the ENT Key.
4) Use the small FMS Knob to select ‘Time’ or ‘Distance’ length mode, and press the ENT Key.
5) Use the FMS Knobs to edit the length, and press the ENT Key.

6) Use the small FMS Knob to select ‘Right’ or ‘Left’ turn direction, and press the ENT Key.

7) Use the FMS Knobs to edit the Expect Further Clearance Time (EFC TIME), and press the ENT Key.

8) Press the ENT Key while ‘Activate?’ is highlighted to activate the direct-to with the user-defined hold defined at the direct-to waypoint. (If the direct-to waypoint is part of the active flight plan, the HOLD is inserted into the active flight plan. If the direct-to waypoint is not part of the active flight plan, an off-route direct-to hold is created.)

EXITING A USER-DEFINED HOLD INSERTED INTO THE ACTIVE FLIGHT PLAN

Press the SUSP Softkey. The system will provide guidance to follow the holding pattern to the inbound course and resume automatic waypoint sequencing.

REMOVING A USER-DEFINED HOLD INSERTED INTO THE ACTIVE FLIGHT PLAN

1) Press the FPL Key to display the Active Flight Plan Page (MFD) or the Active Flight Plan Window (PFD).

2) Press the FMS Knob to activate the cursor (not required on the PFD) and turn the large FMS Knob to highlight the HOLD waypoint.

3) Press the CLR Key. A ‘Remove Holding Pattern?’ confirmation window is displayed.

4) Select ‘OK’ and press the ENT Key. The holding pattern is removed from the active flight plan. Select ‘CANCEL’ and press the ENT Key to cancel the removal of the holding pattern.

REMOVING A USER-DEFINED HOLD AT AN OFF-ROUTE DIRECT-TO

1) Press a Direct To Key to display the Direct To Window (PFD or MFD).

2) Press the MENU Key to display the Page Menu with the cursor on the ‘Cancel Direct-To NAV’ selection.

3) Press the ENT Key. The holding pattern is removed.
VERTICAL NAVIGATION

ENABLING VNV GUIDANCE

1) Press the FPL Key to display the Active Flight Plan Page on the MFD.
2) Press the ENBL VNV Softkey; or press the MENU Key, highlight ‘Enable VNV’, and press the ENT Key. Vertical navigation is enabled, and vertical guidance begins with the waypoint shown in the Active VNV Profile box (defaults first waypoint in the active flight plan with an altitude enabled for vertical navigation).

DISABLE VNV GUIDANCE

1) Press the FPL Key to display the Active Flight Plan Page on the MFD.
2) Press the Cncl VNV Softkey; or press the MENU Key, highlight ‘Cancel VNV’, and press the ENT Key. Vertical navigation is disabled.
ALTITUDE CONSTRAINTS

The system can use altitude constraints associated with lateral waypoints to give guidance for vertical navigation. These altitudes are, depending on the specific instance, manually entered or retrieved from the published altitudes in the navigation database.

### Altitude Constraint Examples

**2300FT**
Cross AT 2,300 ft

**5000FT**
Cross AT or ABOVE 5,000 ft

**3000FT**
Cross AT or BELOW 3,000 ft

**6646FT**
Temperature Compensated
Altitudes associated with arrival and approach procedures are “auto-designated”. This means the system automatically uses the altitudes loaded with the arrival or approach for giving vertical speed and deviation guidance. Note that these altitudes are displayed as cyan text up to, but not including, the FAF. The FAF is always a “reference only” altitude and cannot be designated, unless the selected approach does not provide vertical guidance. In this case, the FAF altitude can be designated.

Altitudes that have been designated for use in vertical guidance can be “undesignated” using the CLR Key. The altitude is now displayed only as a reference. It is not used to give vertical guidance. Other displayed altitudes may change due to re-calculations or be rendered invalid as a result of manually changing an altitude to a non-designated altitude.

**DESIGNATING A WAYPOINT ALTITUDE TO BE USED FOR VERTICAL GUIDANCE**

1) Press the FPL Key to display the Active Flight Plan Page on the MFD.
2) Press the FMS Knob, and turn to highlight the desired waypoint altitude.
3) Turn the small FMS Knob to enter editing mode.
4) Press the ENT Key. The altitude is now shown in cyan, indicating it is usable for vertical guidance.
DESIGNATING A PROCEDURE WAYPOINT ALTITUDE TO BE USED FOR VERTICAL GUIDANCE

1) Press the FPL Key to display the Active Flight Plan Page on the MFD.
2) Press the FMS Knob, and turn to highlight the desired waypoint altitude.
3) Turn the small FMS Knob to enter editing mode.
4) Press the ENT Key. The altitude is now shown in cyan, indicating it is usable for vertical guidance.

ENTERING/MODIFYING AN ALTITUDE CONSTRAINT

1) Press the FPL Key to display the Active Flight Plan Page on the MFD.
2) Press the FMS Knob, and turn to highlight the desired waypoint altitude constraint.
3) Enter an altitude constraint value using the FMS Knobs. To enter altitudes as a flight level, turn the small FMS Knob counter-clockwise past zero or clockwise past 9 on the first character, and the system automatically changes to show units of Flight Level. Turn the large FMS Knob clockwise to highlight the first zero and enter the three digit flight level.
4) Press the ENT Key to accept the altitude constraint; if the selected waypoint is an airport, an additional choice is displayed. Turn the small FMS Knob to choose ‘MSL’ or ‘AGL’, and press the ENT Key to accept the altitude.

An altitude constraint is invalid if:

• Meeting the constraint requires the aircraft to climb
• Meeting the constraint requires the maximum flight path angle (6° down) or maximum vertical speed (-6000 fpm) to be exceeded
• The altitude constraint results in a TOD behind the aircraft present position
• The constraint is within a leg type for which altitude constraints are not supported
• The altitude constraint is added to the FAF of an approach that provides vertical guidance (i.e., ILS or GPS SBAS approach)
• The altitude constraint is added to a waypoint past the FAF
ACTIVATING A VERTICAL NAVIGATION DIRECT-TO

1) Press the FPL Key to display the Active Flight Plan Page on the MFD.
2) Press the FMS Knob to activate the cursor and turn the FMS Knob to highlight the desired waypoint.
3) Press the VNV Direct-To Softkey; or press the MENU Key, highlight ‘VNV Direct-To’, and press the ENT Key. An ‘Activate vertical Direct-to to: NNNNNFT at XXXXXX?’ confirmation window is displayed.
4) Press the ENT Key. Vertical guidance begins to the altitude constraint for the selected waypoint.
5) Press the FMS Knob to remove the flashing cursor.

MODIFYING THE VS TGT AND FPA

1) Press the FPL Key to display the Active Flight Plan Page on the MFD.
2) Press the VNV Prof Softkey; or press the MENU Key, highlight ‘Select VNV Profile Window’, and press the ENT Key. The cursor is now located in the Active VNV Profile box.
3) Turn the FMS Knobs as needed to edit the values.
4) Press the FMS Knob to remove the flashing cursor.

DELETING AN ALTITUDE CONSTRAINT PROVIDED BY THE NAVIGATION DATABASE

1) Press the FPL Key to display the Active Flight Plan Page on the MFD.
2) Press the FMS Knob, and turn to highlight the desired waypoint altitude constraint.
3) Press the CLR Key. A ‘Remove VNV altitude?’ confirmation window is displayed.
4) Select ‘OK’ and press the ENT Key.

DELETING AN ALTITUDE CONSTRAINT THAT HAS BEEN MANUALLY ENTERED

1) Press the FPL Key to display the Active Flight Plan Page on the MFD.
2) Press the FMS Knob, and turn to highlight the desired waypoint altitude constraint.
3) Press the CLR Key. A ‘Remove or Revert to published VNV altitude of nnnnnFT?’ confirmation window is displayed.

4) Select ‘REMOVE’ and press the ENT Key. The manually entered altitude is deleted (it is replaced by a system calculated altitude, if available).

**REVERTING A MANUALLY ENTERED ALTITUDE CONSTRAINT BACK TO THE NAVIGATION DATABASE VALUE**

1) Press the FPL Key to display the Active Flight Plan Page on the MFD.
2) Press the FMS Knob, and turn to highlight the desired waypoint altitude constraint.
3) Press the CLR Key. A ‘Remove or Revert to published VNV altitude of nnnnnFT?’ confirmation window is displayed.
4) Select ‘REVERT’ and press the ENT Key. The altitude is changed to the navigation database value.
5) Press the FMS Knob to remove the flashing cursor.

**MODIFYING A SYSTEM CALCULATED ALTITUDE CONSTRAINT**

1) Press the FPL Key to display the Active Flight Plan Page on the MFD.
2) Press the FMS Knob, and turn to highlight the desired waypoint altitude constraint.
3) Press the CLR Key. An ‘Edit or Revert to published VNV altitude of nnnnnFT?’ confirmation window is displayed.
4) Select ‘EDIT’ and press the ENT Key.
5) Edit the value using the FMS Knobs, and press the ENT Key.
6) Press the FMS Knob to remove the flashing cursor.

**PROCEDURES**

**LOADING A DEPARTURE INTO THE ACTIVE FLIGHT PLAN USING THE PROC KEY**

1) Press the PROC Key. The Procedures Window is displayed.
2) Highlight ‘Select Departure’.
3) Press the ENT Key. The Departure Loading Page is displayed.
4) Use the FMS Knob to select an airport and press the ENT Key.
5) Select a departure from the list and press the ENT Key.
6) Select a runway (if required) and press the ENT Key.
7) Select a transition (if required) and press the ENT Key. ‘Load?’ is highlighted.
8) Press the ENT Key to load the departure procedure.

VIEWING AVAILABLE DEPARTURES AT AN AIRPORT

1) From the Airport Information Page (first page in the WPT group), press the DP Softkey. The Departure Information Page is displayed, defaulting to the airport displayed on the Airport information Page.
2) To select another airport, press the FMS Knob to activate the cursor, enter an identifier/facility name/city, and press the ENT Key.
3) Turn the large FMS Knob to highlight the Departure. The departure is previewed on the map.
4) Turn the small FMS Knob to view the available departures. Press the ENT Key to select the departure. The cursor moves to the Runway box. The departure is previewed on the map.
5) Turn the small FMS Knob to view the available runways. Press the ENT Key to select the runway. The cursor moves to the Transition box (only if there are available transitions). The departure is previewed on the map.
6) Turn the small FMS Knob to view the available transitions. Press the ENT Key to select the transition. The cursor moves to the Sequence box. The departure is previewed on the map.
7) Press the Info-1 Softkey or the Info-2 Softkey to return to the Airport Information Page.

REMOVING A DEPARTURE PROCEDURE FROM THE ACTIVE FLIGHT PLAN

1) Press the FPL Key to display the Active Flight Plan Page (MFD) or the Active Flight Plan Window (PFD).
2) Press the MENU Key, and highlight ‘Remove Departure’.
3) Press the ENT Key. A confirmation window is displayed listing the departure procedure.
4) With ‘OK’ highlighted, press the ENT Key. To cancel the removal request, highlight ‘CANCEL’ and press the ENT Key.
LOADING AN ARRIVAL INTO THE ACTIVE FLIGHT PLAN USING THE PROC KEY

1) Press the PROC Key. The Procedures Window is displayed.
2) Highlight ‘Select Arrival’.
3) Press the ENT Key. The Arrival Loading Page is displayed.
4) Use the FMS Knob to select an airport and press the ENT Key.
5) Select an arrival from the list and press the ENT Key.
6) Select a transition (if required) and press the ENT Key.
7) Select a runway (if required) and press the ENT Key. ‘Load?’ is highlighted.
8) Press the ENT Key to load the arrival procedure.

VIEWING AVAILABLE ARRIVALS AT AN AIRPORT

1) From the Airport Information Page (first page in the WPT group), press the STAR Softkey. The Arrival Information Page is displayed, defaulting to the airport displayed on the Airport Information Page.
2) To select another airport, press the FMS Knob to activate the cursor, enter an identifier/facility name/city, and press the ENT Key.
3) Turn the large FMS Knob to highlight the Arrival. The arrival is previewed on the map.
4) Turn the small FMS Knob to view the available arrivals. Press the ENT Key to select the arrival. The cursor moves to the Transition box. The arrival is previewed on the map.
5) Turn the small FMS Knob to view the available transitions. Press the ENT Key to select the transition. The cursor moves to the Runway box. The arrival is previewed on the map.
6) Turn the small FMS Knob to view the available runways. Press the ENT Key to select the runway. The cursor moves to the Sequence box. The arrival is previewed on the map.
7) Press the Info-1 Softkey or the Info-2 Softkey to return to the Airport Information Page.

#### Approach Service Levels

**LOADING AN APPROACH INTO THE ACTIVE FLIGHT PLAN USING THE PROC KEY**

1) Press the **PROC** Key. The Procedures Window is displayed.

2) Highlight ‘Select Approach’, and press the **ENT** Key. The Approach Loading Page is displayed.

3) Select the airport and approach:
   a) Use the **FMS** Knob to select an airport and press the **ENT** Key.
   b) Select an approach from the list and press the **ENT** Key.

   Or:
   a) If necessary, push the **FMS** Knob to exit the approach list, and use the large **FMS** Knob to move the cursor to the Approach Channel field.
   b) Use the **FMS** Knob to enter the approach channel number, and press the **ENT** Key to accept the approach channel number. The airport and approach are selected.

4) Select a transition (if required) and press the **ENT** Key.
Flight Management

5) Minimums
   a) To set ‘Minimums’, turn the small FMS Knob to select ‘BARO’ or ‘TEMP COMP’ and press the ENT Key. Turn the small FMS Knob to select the altitude, and press the ENT Key.
   b) If ‘TEMP COMP’ was selected, the cursor moves to the temperature field. Turn the small FMS Knob to select the temperature, and press the ENT Key.

   Or:
   To skip setting minimums, press the ENT Key.

6) Press the ENT Key with ‘Load?’ highlighted to load the approach procedure; or turn the large FMS Knob to highlight ‘Activate’ and press the ENT Key to load and activate the approach procedure.

VIEWING AVAILABLE APPROACHES AT AN AIRPORT

1) From the Airport Information Page (first page in the WPT group), press the APR Softkey. The Approach Information Page is displayed, defaulting to the airport displayed on the Airport information Page.

2) To select another airport, press the FMS Knob to activate the cursor, enter an identifier/facility name/city, and press the ENT Key.

3) Press the FMS Knob, then turn the large FMS Knob to highlight the Approach. The approach is previewed on the map.

4) Turn the small FMS Knob to view the available approaches. Press the ENT Key to select the approach. The cursor moves to the Transition box. The approach is previewed on the map.

5) Turn the small FMS Knob to view the available transitions. Press the ENT Key to select the transition. The cursor moves to the Minimums box. The approach is previewed on the map.

6) Turn the small FMS Knob to select minimums on or off. Press the ENT Key.
   a) When minimums are selected on, the cursor moves to the minimum altitude field. Use the small FMS Knob to select the altitude. Press the ENT Key.
   b) If temperature compensated minimums was selected, the cursor moves to the temperature field. Use the small FMS Knob to select the temperature. Press the ENT Key. The cursor moves to the Sequence box. The approach is previewed on the map.

   Or:
When minimums are selected off, the cursor moves to the Sequence box. The approach is previewed on the map.

7) Press the Info-1 or the Info-2 Softkey to return to the Airport Information Page.

ACTIVATING A PREVIOUSLY LOADED APPROACH WITH VECTORS TO FINAL

1) Press the PROC Key to display the Procedures Window.

2) Highlight ‘Activate Vector-to-Final’ and press the ENT Key.

REMOVING AN APPROACH FROM THE ACTIVE FLIGHT PLAN

1) Press the FPL Key to display the Active Flight Plan Page (MFD) or the Active Flight Plan Window (PFD).

2) Press the MENU Key, and highlight ‘Remove Approach’.

3) Press the ENT Key. A confirmation window is displayed listing the approach procedure.

4) With ‘OK’ highlighted, press the ENT Key. To cancel the removal, highlight ‘CANCEL’ and press the ENT Key.

5) Press the FMS Knob to remove the flashing cursor.

ACTIVATING A MISSED APPROACH IN THE ACTIVE FLIGHT PLAN

1) Press the PROC Key.

2) Turn the FMS Knob to highlight ‘Activate Missed Approach’.

3) Press the ENT Key. The aircraft automatically sequences to the MAHP.

Or:

Press the Go-Around Button.

ACTIVATING TEMPERATURE COMPENSATED ALTITUDE

1) From the Active Flight Plan Page, press the MENU Key. The Page Menu is displayed.

2) Turn the FMS Knob to highlight ‘Temperature Compensation’.

3) Press the ENT Key. The Temperature Compensation Window is displayed.

4) Use the small FMS Knob to select the temperature at the <airport>. The compensated altitude is computed as the temperature is selected.
Flight Management

5) Press the ENT Key. ‘Activate Compensation?’ is highlighted.

6) Press the ENT Key. The compensated altitudes for the approach are shown in the flight plan.

CANCELLING TEMPERATURE COMPENSATED ALTITUDE

1) From the Active Flight Plan Page, press the MENU Key. The Page Menu is displayed.

2) Turn the FMS Knob to highlight ‘Temperature Compensation’.

3) Press the ENT Key. The Temperature Compensation Window is displayed.

4) Press the ENT Key. ‘Cancel Compensation?’ is highlighted.

5) Press the ENT Key. The temperature compensated altitude at the FAF is cancelled.

TRIP PLANNING

SELECTING AUTOMATIC OR MANUAL PAGE MODE

Press the Auto Softkey or the Manual Softkey; or press the MENU Key, highlight ‘Auto Mode’ or ‘Manual Mode’, and press the ENT Key.

SELECTING FLIGHT PLAN OR WAYPOINT MODE

Press the FPL Softkey or the WPTs Softkey; or press the MENU Key, highlight ‘Flight Plan Mode’ or ‘Waypoints Mode’, and press the ENT Key.

SELECTING A FLIGHT PLAN AND LEG FOR TRIP STATISTICS

1) Press the FMS Knob to activate the cursor in the flight plan number field.

2) Turn the small FMS Knob to select the desired flight plan number.

3) Turn the large FMS Knob to highlight ‘CUM’ or ‘REM’. The statistics for each leg can be viewed by turning the small FMS Knob to select the desired leg. The Inset Map also displays the selected data.

SELECTING WAYPOINTS FOR WAYPOINT MODE

1) Press the WPTs Softkey; or press the MENU Key, highlight ‘Waypoints Mode’, and press the ENT Key. The cursor is positioned in the waypoint field directly below the FPL field.
2) Turn the FMS knobs to select the desired waypoint (or select from the Page Menu ‘Set WPT to Present Position’ if that is what is desired), and press the ENT Key. The cursor moves to the second waypoint field.

3) Turn the FMS knobs to select the desired waypoint, and press the ENT Key. The statistics for the selected leg are displayed.

**ENTERING MANUAL DATA FOR TRIP STATISTICS CALCULATIONS**

1) Press the Manual Softkey or select ‘Manual Mode’ from the Page Menu, and press the ENT Key. The cursor may now be positioned in any field in the top right two boxes.

2) Turn the FMS Knobs to move the cursor onto the Departure Time field and enter the desired value. Press the ENT Key. The statistics are calculated using the new value and the cursor moves to the next entry field. Repeat until all desired values have been entered.

**RAIM PREDICTION**

**PREDICTING RAIM AVAILABILITY AT A SELECTED WAYPOINT**

1) Select the AUX-GPS Status Page.

2) Press the FMS Knob. The RAIM Prediction ‘Waypoint’ field is highlighted.

3) Turn the small FMS Knob to display the Waypoint Information Window. (Turning it clockwise displays a blank Waypoint Information Window, turning it counter-clockwise displays the Waypoint Information Window with a waypoint selection submenu allowing selection of active flight plan, nearest, recent, user, or airway waypoints).

4) Enter the identifier, facility, or city name of the departure waypoint; or select a waypoint from the submenu of waypoints and press the ENT Key to accept the waypoint entry.

5) Turn the FMS Knobs to enter an arrival time and press the ENT Key.

6) Turn the FMS Knobs to enter an arrival date and press the ENT Key.

7) Press the ENT Key with ‘Compute RAIM?’ highlighted to begin the computation.
PREDICTING RAIM AVAILABILITY AT THE AIRCRAFT PRESENT POSITION

1) Select the AUX-GPS Status Page.
2) Press the FMS Knob. The RAIM Prediction ‘Waypoint’ field is highlighted.
3) Press the MENU Key, highlight ‘Set WPT to Present Position’, and press the ENT Key.
4) Press the ENT Key to accept the waypoint entry.
5) Turn the FMS Knobs to enter an arrival time and press the ENT Key.
6) Turn the FMS Knobs to enter an arrival date and press the ENT Key.
7) Press the ENT Key with ‘Compute RAIM?’ highlighted to begin the computation.

ENABLING/DISABLING SBAS

1) Select the AUX-GPS Status Page.
2) Press the SBAS Softkey.
3) Press the FMS Knob, and turn the large FMS Knob to highlight ‘EGNOS’, ‘MSAS’ or ‘WAAS’.
4) Press the ENT Key to disable SBAS. Press the ENT Key again to enable SBAS.
HAZARD AVOIDANCE

Customizing the Hazard Displays on the Navigation Map Page:

1) With the Navigation Map Page displayed, press the MENU Key to display the Navigation Map Page Menu. The cursor flashes on the ‘Map Settings’ option.
2) Press the ENT Key. The Map Settings Menu is displayed. Turn the small FMS Knob to select ‘Weather’ to customize the display of weather features. Select ‘Traffic’ to customize the display of traffic.
3) Press the small FMS Knob to return to the Navigation Map Page.

STORMSCOPE® (OPTIONAL)

WARNING: Do not rely on information from the lightning detection system display as the sole basis for hazardous weather avoidance. Range limitations and interference may cause the system to display inaccurate or incomplete information. Refer to the documentation from the lightning detection system manufacturer for detailed information about the system.

Displaying Stormscope Lightning Data on the Navigation Map Page

1) Select the Map Opt Softkey.
2) Select the STRMSCP Softkey.

Enabling/disabling Stormscope information on PFD maps:

1) On the PFD, press the Map/HSI Softkey.
2) Press the Lightning Softkey.
3) Press the STRMSCP Softkey to enable Stormscope lightning information, or press the LTNG Off Softkey to disable Stormscope lightning information.

<table>
<thead>
<tr>
<th>Lightning Age</th>
<th>Symbol</th>

<td><img src="image" alt="Lightning Symbol" /></td>
</tr>
<tr>
<td>Strike is between 2 and 3 minutes old</td>
<td><img src="image" alt="Lightning Symbol" /></td>
</tr>
</tbody>
</table>
Change the Stormscope Lightning Mode Between ‘Cell’ and ‘Strike’

1) Turn the large FMS Knob to select the Map Page Group.
2) Turn the small FMS Knob to select the Stormscope Page.
2) Press the Mode Softkey. The Cell and Strike Softkeys are displayed. Press the Cell Softkey to display ‘CELL’ data or press the Strike Softkey to display ‘STRIKE’ data. ‘CELL’ or ‘STRIKE’ is displayed in the mode box located in the upper right corner of the Stormscope Page.

**NOTE:** “Cell mode” uses a clustering program to identify clusters of electrical activity that indicate cells.

Manually Clearing Stormscope Data on the Stormscope Page

Press the Clear Softkey.

Manually Clearing Stormscope Data on the Navigation Map Page

1) Press the MENU Key.
2) Turn the FMS Knob to highlight ‘Clear Stormscope® Lightning’.
3) Press the ENT Key.

SIRIUSXM WEATHER (OPTIONAL)

**WARNING:** Do not use data link weather information for maneuvering in, near or around areas of hazardous weather. Information contained within data link weather products may not accurately depict current weather conditions.

**WARNING:** Do not use the indicated data link weather product age to determine the age of the weather information shown by the data link weather product. Due to time delays inherent in gathering and processing weather data for data link transmission, the weather information shown by the data link weather product may be older than the indicated weather product age.

Changing the Data Link Weather Source to display SiriusXM Weather

1) Turn the large FMS Knob to select the Map Page Group.
2) Turn the small FMS Knob to select the Weather Data Link Page. If the name of another source besides ‘(XM)’ is in the page title, continue to Step 3.
3) Press the MENU Key.
4) If necessary, turn the large FMS Knob to highlight ‘Display XM Weather’ and press the ENT Key.

Displaying SiriusXM Weather on the Navigation Map Page

1) Press the Map Opt Softkey.
2) Press the NEXRAD or XM LTNG or METAR Softkey to display the desired weather product. Press the applicable softkey again to remove the weather product from the Navigation Map Page.

Displaying SiriusXM Weather on PFD maps

1) Press the Map/HSI Softkey.
2) Press the NEXRAD or METAR Softkey to display the desired weather product. Press the applicable softkey again to remove weather product from the map.
3) Press the Lightning Softkey to display softkeys for lightning weather products.
4) Press the Datalink Softkey to enable SiriusXM lightning information on the PFD Maps or press the LTNG Off Softkey to disable lightning information.

Displaying/Removing the Weather Product Information Box on PFD Maps

1) On the PFD, press the Map/HSI Softkey.
2) Press the Layout Softkey.
3) Press the WX LGND Softkey to display/remove the weather product information box.

Displaying Sirius Weather Legends on the Navigation Map Page

1) Press the Map Opt Softkey.
2) Press the Legend Softkey to display or remove the legend.

Display METAR and TAF information on the Airport Information Page

1) Turn the large FMS Knob to select the WPT Page Group.
2) Turn the small FMS Knob to select the Airport Information Page.
3) Press the WX Softkey to display METAR and TAF text.
Hazard Avoidance

4) Press the **FMS** Knob to enable the cursor, then turn the small **FMS** Knob as needed to **FMS** knob to scroll through the text.

5) After viewing text, press the **FMS** Knob to disable the cursor.

Displaying Weather on the Weather Data Link (XM) Page

1) Turn the large **FMS** Knob to select the Map Page Group.
2) Turn the small **FMS** Knob to select the Weather Data Link (XM) Page.
3) Press the available softkeys to select the desired SiriusXM Weather product.
4) Press the **Legend** Softkey to view the legends for the enables weather products. If necessary, turn either **FMS** Knob to scroll through the list. Press the small **FMS** Knob or the **ENT** Key to return to the map.

Enabling/disabling NEXRAD Animation on the Weather Data Link (XM) Page

1) Turn the large **FMS** Knob to select the Map Page Group.
2) Turn the small **FMS** Knob to select the Weather Data Link (XM) Page.
3) Press the **MENU** Key.
4) Turn the **FMS** Knob to select ‘Weather Setup’ and press the **ENT** Key.
5) Turn the large **FMS** Knob to highlight the NEXRAD Animation On/Off field.
6) Turn the small **FMS** Knob to select ‘On’ or ‘Off’ then press the **ENT** Key.

Map Panning Information – Weather Data Link (XM) Page

1) Push in the **Joystick** to activate the Map Pointer.
2) Move the **Joystick** to place the Map Pointer over graphical weather information. For Cloud Tops, Echo Tops, METAR flags, Storm Cells, and County Warnings, an information box appears near the Map Pointer. If the Map Pointer has highlighted a SIGMET, AIRMET, PIREP, AIREP, or TFR, press the **ENT** Key to view additional information such as report text, then press the **ENT** Key or the **CLR** Key to remove the information.

Note when a METAR flag or airport is highlighted, pressing the **ENT** Key shows the WPT - Weather Information Page. The decoded and original METAR text is available on this page as well as the TAF, if provided. When finished, press the **Go Back** Softkey or press the **CLR** Key to return to the Weather Data Link (XM) Page.
Enabling/disabling winds aloft data display in the Vertical Situation Display (VSD):

1) Select the Navigation Map Page.
2) Press the MENU Key.
3) With ‘Map Settings’ highlighted, press the ENT Key.
4) Turn the small FMS Knob to select the ‘VSD’ Group and press the ENT Key.
5) Turn the large FMS Knob to select the Winds On/Off field.
6) Turn the small FMS Knob to select ‘On’ or ‘Off’.
7) Press the FMS Knob or CLR Key to return to the Navigation Map Page with the changed settings.

NOTE: NEXRAD data cannot be displayed simultaneously on the same map as relative terrain, echo tops, turbulence, or icing is displayed.

FIS-B WEATHER

**WARNING:** Do not use data link weather information for maneuvering in, near, or around areas of hazardous weather. Information contained within data link weather products may not accurately depict current weather conditions.

**WARNING:** Do not use the indicated data link weather product age to determine the age of the weather information shown by the data link weather product. Due to time delays inherent in gathering and processing weather data for data link transmission, the weather information shown by the data link weather product may be older than the indicated weather product age.

The optional GTX 345R transponder receives Flight Information Services - Broadcast (FIS-B) weather data from a network of UAT ground-based transceivers (GBTs).

FIS-B weather data reception requires the aircraft being within range and line-of-sight of an operating GBT broadcasting FIS-B weather data. Reception may be affected by factors including altitude or terrain.

Reception of FIS-B weather data occurs automatically without any pilot action. FIS-B broadcasts provide weather data in a repeating cycle which may take approximately ten minutes to transmit all available weather data. Therefore, not all available weather data may be available immediately upon initial FIS-B signal acquisition.

**Viewing the Weather Data Link (FIS-B) Page**

1) Turn the large **FMS** Knob to select the Map Page Group.
2) Turn the small **FMS** Knob to select the Weather Data Link (FIS-B or XM) Page.
3) If the page title displays a weather data link weather source other than ‘FIS-B’, such as ‘XM’, proceed to the following steps to change the data link weather source.
4) Press the **MENU** Key.
5) Turn the small **FMS** Knob to select ‘Display FIS-B Weather’.
6) Press the **ENT** Key. The page title will display ‘Map - Weather Data Link (FIS-B)’ to indicate FIS-B is now the selected data link weather source.
Enabling/Disabling FIS-B Weather

1) Select the Weather Data Link (FIS-B) Page.

2) Press the MENU Key.

3) Turn the small FMS Knob to highlight ‘Enable FIS-B Weather’ or ‘Disable FIS-B Weather’, and press the ENT Key.

Weather Product Symbols and Data Timing

Setting Up and Customizing the Weather Data Link (FIS-B) Page

1) Select the Weather Data Link (FIS-B) Page.

2) Press the MENU Key.

3) With ‘Weather Setup’ highlighted, press the ENT Key.

4) Turn the small FMS Knob to select ‘Product Group 1’, and press the ENT Key.
5) Turn the large FMS Knob or press the ENT Key to scroll through product selections.

6) Turn the small FMS Knob to scroll through options for each product (On/Off, range settings, etc.).

7) Press the ENT Key to select an option.

8) Press the FMS Knob or CLR Key to return to the Weather Data Link (FIS-B) Page with the changed settings.

**Setting Up and Customizing FIS-B Weather on the Navigation Map Page**

1) Select the Navigation Map Page.

2) Press the MENU Key.

3) With ‘Map Settings’ highlighted, press the ENT Key.

4) Turn the small FMS Knob to select the ‘Weather’ Group and press the ENT Key.

5) Turn the large FMS Knob or press the ENT Key to scroll through product selections.

6) Turn the small FMS Knob to scroll through options for each product (On/Off, range settings).

7) Press the ENT Key to select an option.

8) Press the FMS Knob or CLR Key to return to the Navigation Map Page with the changed settings.

**Displaying/Removing the Weather Product Information Box on PFD Maps**

1) On the PFD, press the Map/HSI Softkey.

2) Press the Layout Softkey.

3) Press the WX LGND Softkey to display/remove the weather product information box.
Viewing Legends for Displayed Weather Products on the Weather Data Link (FIS-B) Page

1) Select the Weather Data Link (FIS-B) Page.
2) Press the Legend Softkey to display the legends for the displayed weather products.
   Or:
   a) Press the MENU Key.
   b) Select ‘Weather Legend’ and press the ENT Key.
3) To remove the Legend Window, press the Legend Softkey, the ENT or the CLR Key, or press the FMS Knob.

Viewing Legends for Displayed Weather Products on the Navigation Map Page

1) Select the Navigation Map Page.
2) Press the Map Opt Softkey.
3) Press the Legend Softkey (available if one or more FIS-B weather products are enabled for display).
4) To remove the Legend Window, press the Legend Softkey, the ENT or the CLR Key, or press the FMS Knob.

Displaying Weather on the Weather Data Link (FIS-B) Page

1) Turn the large FMS Knob to select the Map Page Group.
2) Turn the small FMS Knob to select the Weather Data Link (FIS-B) Page.
3) Press the available softkeys to enable/disable the display of the desired FIS-B Weather product.

Displaying the NEXRAD weather product on the Weather Data Link (FIS-B) Page

1) Select the Weather Data Link (FIS-B) Page.
2) Press the NEXRAD Softkey. Each softkey press cycles through a coverage option as the softkey name changes (US, RGNL, or US/RGNL).

Displaying the NEXRAD weather product on the Navigation Map Page

1) Press the Map Opt Softkey.
2) Press the NEXRAD Softkey.
3) To change the type of NEXRAD displayed, press the MENU Key.
4) With ‘Map Settings’ highlighted, press the **ENT** Key.

5) Turn the small **FMS** Knob to select the ‘Weather’ Group, then press the **ENT** Key.

6) Turn the large **FMS** Knob to highlight the NEXRAD Data Region field.

7) Turn the small **FMS** Knob to highlight ‘CONUS’ (continental United States), ‘RGNL’ (regional), or ‘Combined’, then press the **ENT** Key. This selection also affects display of NEXRAD on the PFD Maps.

8) When finished, press the **FMS** Knob or press the **CLR** Key.

**Display METAR and TAF information on the Airport Information Page**

1) Turn the large **FMS** Knob to select the WPT Page Group.

2) Turn the small **FMS** Knob to select the Airport Information Page.

3) Press the **WX** Softkey to display METAR and TAF text.

4) Press the **FMS** Knob to enable the cursor, then turn the small **FMS** Knob as needed to **FMS** knob to scroll through the text.

5) After viewing text, press the **FMS** Knob to disable the cursor.

**Map Panning Information – Weather Data Link (FIS-B) Page**

1) Push in the **Joystick** to activate the Map Pointer.

2) Move the **Joystick** to place the Map Pointer over graphical weather information. For Cloud Tops, Echo Tops, METAR flags, Storm Cells, and County Warnings, an information box appears near the Map Pointer. If the Map Pointer has highlighted a SIGMET, AIRMET, PIREP, or TFR, press the **ENT** Key to view additional information such as report text, then press the **ENT** Key or the **CLR** Key to remove the information.

Note when a METAR flag or airport is highlighted, pressing the **ENT** Key shows the WPT - Weather Information Page. The decoded and original METAR text is available on this page as well as the TAF, if provided. When finished, press the **Go Back** Softkey or press the **CLR** Key to return to the Weather Data Link (FIS-B) Page.

**Enabling/disabling winds aloft data display in the Vertical Situation Display (VSD)**

1) Select the Navigation Map Page.

2) Press the **MENU** Key.

3) With ‘Map Settings’ highlighted, press the **ENT** Key.
4) Turn the small **FMS** Knob to select the ‘VSD’ Group and press the **ENT** Key
5) Turn the large **FMS** Knob to select the Winds On/Off field.
6) Turn the small **FMS** Knob to select ‘On’ or ‘Off’.
7) Press the **FMS** Knob or **CLR** Key to return to the Navigation Map Page with the changed settings.

### Traffic Information Service (TIS)

**NOTE:** If the aircraft has a Traffic Advisory System (TAS) or the capability to receive Automatic Dependent Surveillance-Broadcast (ADS-B) traffic reports, including TIS-B, these features supercede TIS.

**NOTE:** Traffic Information Service (TIS) is only available when the aircraft is within the service volume of a TIS capable terminal radar site.

<table>
<thead>
<tr>
<th>Traffic Symbol</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Traffic Symbol" /></td>

<tr>
<td><img src="image" alt="Traffic Symbol" /></td>
<td>Traffic Advisory (TA) (closing rate, distance, and vertical separation meet TA criteria)</td>
</tr>
<tr>
<td><img src="image" alt="Traffic Symbol" /></td>
<td>Traffic Advisory Off Scale</td>
</tr>
</tbody>
</table>

**TIS Traffic Symbol Description**

### Displaying TIS traffic on the Traffic Map Page

1) Turn the large **FMS** Knob to select the Map Page Group.
2) Turn the small **FMS** Knob to select the Traffic Map Page.
3) Press the **Operate** Softkey to begin displaying traffic. ‘OPERATING’ is displayed in the Traffic Mode field.
4) Press the **Standby** Softkey to place the system in the Standby Mode. ‘STANDBY’ is displayed in the Traffic Mode field.
5) Rotate the **Joystick** clockwise to increase the map range or rotate counterclockwise to decrease the map range.
6) Press the **TNA Mute** Softkey to mute/unmute the “TIS Not Available” voice alert.
Displaying TIS Traffic on the Navigation Map Page

1) Ensure TIS is operating. With the Navigation Map displayed, press the Map Opt Softkey.

2) Press the Traffic Softkey. Traffic is now displayed on the map.

Displaying TIS Traffic on PFD Maps

1) Ensure TIS is operating. With the Navigation Map displayed, press the Map Opt Softkey.

2) Press the Traffic Softkey. Traffic is now displayed on the map.
TRAFFIC ADVISORY SYSTEM (TAS)

**WARNING:** Do not rely solely upon the display of traffic information for collision avoidance maneuvering. The traffic display does not provide collision avoidance resolution advisories and does not under any circumstances or conditions relieve the pilot’s responsibility to see and avoid other aircraft.

**WARNING:** Do not rely solely upon the display of traffic information to accurately depict all of the traffic within range of the aircraft. Due to lack of equipment, poor signal reception, and/or inaccurate information from aircraft or ground stations, traffic may be present that is not represented on the display.

**NOTE:** ADS-B traffic symbols are only displayed if the equipment installed in the aircraft is capable of receiving ADS-In traffic reports.

</tbody>
</table>

Displaying Traffic on the Traffic Map Page:

1) Turn the large FMS Knob to select the Map Page Group.
2) Turn the small FMS Knob to select the Traffic Map Page.
3) Press the Operate or TAS OPER Softkey to begin displaying TAS traffic. ‘OPERATING’ is displayed in the Traffic Mode field.
4) Press the ADS-B Softkey to begin display ADS-B traffic (if equipped).
5) Press the ALT Mode Softkey to change the altitude volume. Select the desired altitude volume by pressing the Above, Normal, Below, or UNREST (unrestricted) Softkey. The selection is displayed in the Altitude Mode field. Press the Back Softkey to return to the previous level softkeys.
6) Press the Motion Softkey (if equipped).
7) Press one of the following softkeys:
   Absolute: Displays the motion vector pointing in the absolute direction.
   Relative: Displays the motion vector relative to own aircraft
   Off: Disables the display of the motion vector.
8) Press the Back Softkey to return to the previous level softkeys.
9) Press the TAS STBY or Standby Softkey to place the system in the Standby Mode. ‘STANDBY’ is displayed in the Traffic Mode field.
10) Rotate the Joystick clockwise to display a larger area or rotate counterclockwise to display a smaller area.
Hazard Avoidance

System Self Test

1) With the Traffic Map Page displayed, set the range to 2/6 nm.
2) Press the Standby or TAS STBY Softkey.
3) Press the Test Softkey.
4) Self test takes approximately eight seconds to complete. When completed successfully, traffic symbols are displayed and a voice alert “TAS System Test OK” is heard. If the self test fails, the system reverts to Standby Mode and a voice alert “TAS System Test Fail” is heard.

Displaying Traffic on the Navigation Map

1) Ensure the TAS system is operating. With the Navigation Map displayed, press the Map Opt Softkey.
2) Press the Traffic Softkey. Traffic is now displayed on the map.

TERRAIN AVOIDANCE (TERRAIN PROXIMITY, TERRAIN-SVT, TAWS)

WARNING: Do not use terrain avoidance displays as the sole source of information for maintaining separation from terrain and obstacles. Garmin obtains terrain and obstacle data from third party sources and cannot independently verify the accuracy of the information.

NOTE: Terrain data is not displayed when the aircraft is outside the installed terrain database coverage area.

NOTE: Terrain and obstacle alerting is not available north of 89º North latitude and south of 89º South latitude. This is due to limitations present within the Terrain database and the system’s ability to process the data representing the affected areas.

Enabling/disabling relative terrain information on MFD navigation maps

1) Press the Map Opt Softkey.
2) Press the TER Softkey to cycle through a terrain option with each press. The selected mode is displayed in cyan: Off, Topo, REL. Press the TER Softkey as needed until ‘REL’ is displayed on the softkey.
Displaying relative terrain information (PFD Maps)

1) Press the Map/HSI Softkey.
2) Press the Rel Ter Softkey.

Relative Terrain Legends (Terrain Proximity, Terrain-SVT, TAWS-B)

Customizing terrain and obstacle display on the Navigation Map Page:

1) Select the Navigation Map Page.
2) Press the MENU Key.
3) With ‘Map Settings’ highlighted, press the ENT Key.
4) Turn the small FMS Knob to select the ‘Map’ Group and press the ENT Key.
5) Turn the large FMS Knob or press the ENT Key to scroll through product selections.
   • Terrain Display – Selects terrain ‘Off’ for no terrain, ‘Topo’ for topographic information, or relative terrain ‘Rel’. The distance field selects the maximum map range to display terrain information before it is removed from the map.
   • Obstacle Data – Turns the display of obstacles on or off. The distance field selects the maximum map range to display obstacle symbols before they are removed from the map.
6) Turn the small FMS Knob to scroll through options for each product (ON/OFF, range settings).
7) Press the ENT Key to select an option.
8) Press the FMS Knob or CLR Key to return to the Navigation Map Page with the changed settings.
Hazard Avoidance

Displaying the terrain page (Terrain Proximity, Terrain-SVT, TAWS-B)

1) Turn the large FMS Knob to select the Map Page Group.

2) Turn the small FMS Knob to select the Terrain Proximity, Terrain-SVT, or TAWS-B Page.

Showing/hiding aviation information on the terrain page

1) Press the MENU Key.

2) Turn the FMS Knob to highlight ‘Show Aviation Data’ or ‘Hide Aviation Data’ (choice dependent on current state) and press the ENT Key.

Manually testing the terrain system (TAWS-B only)

1) With the aircraft on the ground, select the TAWS-B Page.

2) Press the MENU Key.

3) Turn the FMS Knob to highlight ‘Test TAWS System’ and press the ENT Key to confirm the selection.

Inhibiting/enabling terrain/obstacle alerting (Terrain SVT and TAWS-B only)

1) Select the Terrain-SVT or TAWS-B Page.

2) Press the Inhibit Softkey to inhibit or enable terrain/obstacle alerting.
## AUTOMATIC FLIGHT CONTROL SYSTEM

**NOTE:** If the attitude information required for the default flight director modes becomes invalid or unavailable, the autopilot automatically disengages.

### ACTIVATING THE FLIGHT DIRECTOR

An initial press of a key listed in the following table (when the flight director is not active) activates the pilot-side flight director in the listed modes.

<table>
<thead>
<tr>
<th>Control Pressed</th>
<th>Modes Selected</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Lateral</td>
</tr>
<tr>
<td><strong>FD Key</strong></td>
<td>Roll Hold (default)</td>
</tr>
<tr>
<td><strong>AP Key</strong></td>
<td>Roll Hold (default)</td>
</tr>
<tr>
<td><strong>CWS Button</strong></td>
<td>Roll Hold (default)</td>
</tr>
<tr>
<td><strong>GA Button</strong></td>
<td>Go Around (in air)</td>
</tr>
<tr>
<td><strong>ALT Key</strong></td>
<td>Roll Hold (default)</td>
</tr>
<tr>
<td><strong>VS Key</strong></td>
<td>Roll Hold (default)</td>
</tr>
<tr>
<td><strong>FLC Key</strong></td>
<td>Roll Hold (default)</td>
</tr>
<tr>
<td><strong>VNV Key</strong></td>
<td>Roll Hold (default)</td>
</tr>
<tr>
<td><strong>NAV Key</strong></td>
<td>Navigation**</td>
</tr>
<tr>
<td><strong>BC Key</strong></td>
<td>Backcourse***</td>
</tr>
<tr>
<td><strong>APR Key</strong></td>
<td>Approach**</td>
</tr>
<tr>
<td><strong>HDG Key</strong></td>
<td>Heading Select</td>
</tr>
</tbody>
</table>

*Valid VNV flight plan must be entered before VNV Key press activates flight director.

**The selected navigation receiver must have a valid VOR or LOC signal or active GPS course before NAV or APR Key press activates flight director.

***The selected navigation receiver must have a valid LOC signal before BC Key press activates flight director.
VERTICAL MODES

<table>
<thead>
<tr>
<th>Vertical Mode</th>
<th>Description</th>
<th>Control</th>
<th>Annunciation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pitch Hold</td>
<td>Holds the current aircraft pitch attitude; may be used to climb/descend to the Selected Altitude</td>
<td>(default)</td>
<td>PIT</td>
</tr>
<tr>
<td>Selected Altitude Capture</td>
<td>Captures the Selected Altitude</td>
<td>*</td>
<td>ALTS</td>
</tr>
<tr>
<td>Altitude Hold</td>
<td>Holds the current Altitude Reference</td>
<td>ALT Key</td>
<td>ALT nnnn FT</td>
</tr>
<tr>
<td>Vertical Speed</td>
<td>Maintains the current aircraft vertical speed; may be used to climb/descend to the Selected Altitude</td>
<td>VS Key</td>
<td>VS nnnn FPM</td>

</tbody>
</table>

* ALTV is armed automatically under VPTH when VNV Target Altitude is to be captured instead of Selected Altitude.

**Go Around mode disengages the autopilot unless a compatible lift computer is installed.

*** Level mode can only become activated as a function of Electronic Stability and Protection (ESP). Refer to the Additional Features section for a detailed discussion of the optional ESP feature.
ADDITIONAL FEATURES

SYNTHETIC VISION

**WARNING:** Use appropriate primary systems for navigation, and for terrain, obstacle, and traffic avoidance. SVT is intended as an aid to situational awareness only and may not provide the accuracy and/or fidelity upon which to solely base decisions and/or plan maneuvers to avoid terrain, obstacles, or traffic.

**WARNING:** Do not use SVT runway depiction as the sole means for determining the proximity of the aircraft to the runway or for maintaining the proper approach path angle during landing.

Synthetic Vision Technology (SVT) functionality is offered as an optional enhancement to the system.

SVT is primarily comprised of a computer-generated forward-looking, attitude aligned view of the topography immediately in front of the aircraft from the pilot’s perspective. SVT information is shown on the primary flight display (PFD).

In addition to SVT enhancement to the PFD, the following features have been added to the PFD:

- Pathways
- Flight Path Marker
- Horizon Heading Marks
- Terrain and Obstacle Alerting
- Three-dimensional Traffic
- Airport Signs
- Runway Display

**Activating and deactivating SVT:**

1) Press the **PFD Opt** Softkey.
2) Press the **SVT** Softkey.
3) Press the **Terrain** Softkey. The SVT display will cycle on or off with the **Terrain** Softkey.
**Additional Features**

**Activating and deactivating Pathways:**

1) Press the **PFD Opt** Softkey.
2) Press the **SVT** Softkey.
3) Press the **Pathways** Softkey. The Pathway feature will cycle on or off with the **Pathways** Softkey.

**Activating and deactivating Horizon Headings:**

1) Press the **PFD Opt** Softkey.
2) Press the **SVT** Softkey.
3) Press the **HDG LBL** Softkey. The horizon heading display will cycle on or off with the **HDG LBL** Softkey.

**Activating and deactivating Airport Signs:**

1) Press the **PFD Opt** Softkey.
2) Press the **SVT** Softkey.
3) Press the **APT Sign** Softkey. Display of airport signs will cycle on or off with the **APT Sign** Softkey.

**TERMINAL PROCEDURE CHARTS**

NOTE: With the availability of SafeTaxi®, ChartView, or FliteCharts®, it may be necessary to carry another source of charts on-board the aircraft.

**SafeTaxi®**

SafeTaxi® is an enhanced feature that gives greater map detail as the map range is adjusted in on the airport. The airport display on the map reveals runways with numbers, taxiways identifiers, and airport landmarks including ramps, buildings, control towers, and other prominent features. Resolution is greater at lower map ranges. The aircraft symbol provides situational awareness while taxiing.

Pressing the DCLTR Softkey (declutter) once removes the taxiway markings and airport identification labels. Pressing the DCLTR Softkey twice removes VOR station ID, the VOR symbol, and intersection names if within the airport plan view. Pressing the DCLTR Softkey a third time removes the airport runway layout, unless the airport in view is part of an active route structure. Pressing the DCLTR Softkey again cycles back to the original map detail.
The SafeTaxi database contains detailed airport diagrams for selected airports. These diagrams provide the pilot with situational awareness by displaying the aircraft position in relation to taxiways, ramps, runways, terminals, and services. This information should not be used by the pilot as the basis for maneuvering the aircraft on the ground. This database is updated on a 56-day cycle.

**ChartView**

ChartView resembles the paper version of Jeppesen terminal procedures charts. The charts are displayed in full color with high-resolution. The MFD depiction shows the aircraft position on the moving map in the plan view of most approach charts and on airport diagrams.

The ChartView database is updated on a 14-day cycle. If the ChartView database is not updated within 70 days of the expiration date, ChartView will no longer function.

**FliteCharts®**

FliteCharts® resemble the paper version of AeroNav Services terminal procedures charts. The charts are displayed with high-resolution and in color for applicable charts. The MFD depiction shows the aircraft position on the moving map in the plan view of most approach charts and on airport diagrams.

The FliteCharts database contains procedure charts for the United States only. This database is updated on a 28-day cycle. If not updated within 180 days of the expiration date, FliteCharts will no longer function.

**Selecting Terminal Procedures Charts:**

While viewing the Navigation Map Page, Nearest Airport Page, or Flight Plan Page, select the **Charts** Softkey.

**Or:**

1) Press the **MENU** Key to display the Page Menu.
2) Turn the large **FMS** Knob to scroll through the Options Menu to Charts.
3) Press the **ENT** Key to display the chart.
Additional Features

Selecting Additional Information:

1) While viewing the Airport Taxi Diagram, select the WX Softkey to display the information windows (AIRPORT, INFO).

2) Press the FMS Knob to activate the cursor.

3) Turn the large FMS Knob to highlight the INFO Box.

4) Turn the small FMS Knob to select the INFO Box choices. When the INFO Box is selected the G1000NXi softkeys are blank. If multiple choices are available, scroll to the desired choice with the large FMS Knob and press the ENT Key to complete the selection.

5) Press the FMS Knob again to deactivate the cursor.

Selecting full screen On or Off:

1) While viewing a terminal chart press the MENU Key to display the Page Menu OPTIONS.

2) Turn the large FMS Knob to highlight the Chart Setup Menu Option and press the ENT Key.

3) Turn the large FMS Knob to move between the Full Screen and Color Scheme Options.

4) Turn the small FMS Knob to choose between the On and Off Full Screen Options.

Selecting Day, Night, or Automatic View:

1) While viewing a terminal chart press the MENU Key to display the Page Menu OPTIONS.

2) Turn the large FMS Knob to highlight the Chart Setup Menu Option and press the ENT Key.

3) Turn the large FMS Knob to move to the Color Scheme Option.

4) Turn the small FMS Knob to choose between Day, Auto, and Night Options.

5) If Auto Mode is selected, turn the large FMS Knob to select the percentage field. Use the small FMS Knob to change the percentage value. The percentage value is the day/night crossover point based on the percentage of backlighting intensity. For example, if the value is set to 15%, the day/night display changes when the display backlight reaches 15% of full brightness.
The display must be changed in order for the new setting to become active. This may be accomplished by selecting another page or changing the display range.

6) Press the FMS Knob when finished to remove the Chart Setup Menu.

AIRPORT DIRECTORY

The Aircraft Owners and Pilots Association (AOPA) or AC-U-KWIK Airport Directory database offers detailed information regarding services, hours of operation, lodging options, and more for various airports. This information is viewed on the WPT-Airport Information Page.

The Airport Directory databases are revised every 56 days. The Airport Directory is always available for use after the expiration date. Check fly.garmin.com for the current database.

Selecting the Airport Directory Page:

1) Turn the large FMS Knob to select the ‘WPT’ page group.

2) Turn the small FMS Knob to select the Airport Information Page. Initially, information for the airport closest to the aircraft’s present position is displayed.

3) If necessary, select the Info softkey until Info 2 is displayed.

SIRIUSXM™ RADIO ENTERTAINMENT

The XM Radio Page provides information and control of the audio entertainment features of the SiriusXM™ Satellite Radio.

Selecting the XM Radio Page

1) Turn the large FMS Knob to select the Auxiliary Page Group.

2) Turn the small FMS Knob to select the displayed Aux - XM Radio Page.

Active Channel and Channel List

The Active Channel Box on the XM Radio Page displays the currently selected channel. The Channels List Box of the XM Radio Page shows a list of the available channels for the selected category.
### Selecting a channel from the channel list:

1) While on the XM Radio Page, select the **Channel** Softkey.
2) Select the **CH +** Softkey to go up through the list in the Channel Box, or move down the list with the **CH –** Softkey.

**Or:**

1) Press the **FMS** Knob to highlight the channel list and turn the large **FMS** Knob to scroll through the channels.
2) Press the **ENT** Key to activate the selected channel.

### Selecting a channel directly:

1) While on the XM Radio Page, select the **Channel** Softkey.
2) Select the **Direct CH** Softkey. The channel number in the Active Channel Box is highlighted.
3) Select the numbered softkeys located on the bottom of the display to directly select the desired channel number.
4) Press the **ENT** Key to activate the selected channel.

### Selecting a Category

The Category Box of the XM Radio Page displays the currently selected category of audio.

1) Select the **Category** Softkey on the XM Radio Page.
2) Select the **CAT +** and **CAT -** Softkeys to cycle through the categories.

**Or:**

Turn the small **FMS** Knob to display the Categories list. Highlight the desired category with the small **FMS** Knob and press the **ENT** Key. Selecting All Categories places all channels in the list.

### Setting a preset channel number:

1) On the XM Radio Page, while listening to an Active Channel that is wanted for a preset, select the **Presets** Softkey to access the first five preset channels (**Preset 1 - Preset 5**).
2) Select the **More** Softkey to access the next five channels (**Preset 6 – Preset 10**), and again to access the last five channels (**Preset 11 – Preset 15**). Selecting the **More** Softkey repeatedly cycles through the preset channels.
3) Select any one of the (Preset 1 - Preset 15) softkeys to assign a number to the active channel.

4) Select the Set Softkey on the desired channel number to save the channel as a preset.

Adjusting Volume

1) With the XM Radio Page displayed, select the Volume Softkey.

2) Select the VOL – Softkey to reduce volume or select the VOL + Softkey to increase volume. (Once the VOL Softkey is selected, the volume can also be adjusted using the small FMS Knob.)

SiriusXM Radio volume may also be adjusted on each passenger headset.

Mute SiriusXM audio:

1) Select the XM Radio Page or XM Information Page.

2) Select the Mute Softkey to mute the audio. Select the Mute Softkey again to unmute the audio.

SCHEDULER

The Scheduler feature can be used to enter and display reminder messages (e.g., Change oil, Switch fuel tanks, or Altimeter-Transponder Check) in the Alerts Window on the PFD. Messages can be set to display based on a specific date and time (event), once the message timer reaches zero (one-time; default setting), or recurrently whenever the message timer reaches zero (periodic). Message timers set to periodic alerting automatically reset to the original timer value once the message is displayed. When power is cycled, all messages are retained until deleted, and message timer countdown is resumed.

Entering a scheduler message:

1) Select the Aux - Utility Page.

2) Press the FMS Knob momentarily to activate the flashing cursor.

3) Turn the large FMS Knob to highlight the first empty scheduler message naming field.

4) Use the FMS Knob to enter the message text to be displayed in the Messages Window and press the ENT Key.
5) Press the **ENT** Key again or use the large **FMS** Knob to move the cursor to the field next to Type.

6) Turn the small **FMS** Knob to select the message type:
   - Event—Message issued at the specified date/time
   - One time—Message issued when the message timer reaches zero (default setting)
   - Periodic—Message issued each time the message timer reaches zero

7) Press the **ENT** Key again or use the large **FMS** Knob to move the cursor to the next field.

8) For periodic and one-time messages, use the **FMS** Knob to enter the timer value (HHH:MM:SS) from which to countdown and press the **ENT** Key.

9) For event-based messages:
   a) Use the **FMS** Knob to enter the desired date (DD-MM-YY) and press the **ENT** Key.
   b) Press the **ENT** Key again or use the large **FMS** Knob to move the cursor to the next field.
   c) Use the **FMS** Knob to enter the desired time (HH:MM) and press the **ENT** Key.

10) Press the **ENT** Key again or use the large **FMS** Knob to move the cursor to enter the next message.

### Deleting a scheduler message:

1) Select the Aux - Utility Page.

2) Press the **FMS** Knob momentarily to activate the flashing cursor.

3) Turn the large **FMS** Knob to highlight the name field of the scheduler message to be deleted.

4) Press the **CLR** Key to clear the message text. If the **CLR** Key is pressed again, the message is restored.

5) Press the **ENT** Key while the message line is cleared to clear the message time.
SURFACEWATCH (OPTIONAL)

The SurfaceWatch™ feature provides aural and visual annunciations to help the flight crew maintain situational awareness and avoid potential runway incursions and excursions during ground and air operations in the airport environment.

Inhibit/Uninhibit SurfaceWatch:

1) Select the Aux - System Setup 1 Page.
2) Press the FMS Knob momentarily to activate the flashing cursor.
3) Turn the large FMS Knob to highlight the SurfaceWatch field.
3) Turn the small FMS Knob to toggle the SurfaceWatch alerts on or off.

PILOT PROFILES

Creating a profile:

1) Select the Aux - System Setup Page.
2) Press the FMS Knob momentarily to activate the flashing cursor.
3) Turn the large FMS Knob to highlight ‘Create’ in the Crew Profile Box.
4) Press the ENT Key. A ‘Create Profile’ window is displayed.
5) Use the FMS Knob to enter a profile name up to 16 characters long and press the ENT Key. Crew profile names cannot begin with a blank as the first letter.
6) In the next field, use the small FMS Knob to select the desired settings upon which to base the new profile. Profiles can be created based on Garmin factory defaults, default profile settings (initially based on Garmin factory defaults unless edited by the pilot), or other previously created profile settings.
7) Press the ENT Key.
8) With ‘Create’ highlighted, press the ENT Key to create the profile
   Or:
   Use the large FMS Knob to select ‘Create & Activate’ and press the ENT Key to activate the new profile.
9) To cancel the process, select ‘Cancel’ with the large FMS Knob and press the ENT Key.
Additional Features

Selecting an active profile:

1) Select the Aux - System Setup Page.
2) Press the FMS Knob momentarily to activate the flashing cursor.
3) Turn the large FMS Knob to highlight the active profile field in the Crew Profile Box.
4) Turn the small FMS Knob to display the crew profile list and highlight the desired profile.
5) Press the ENT Key. The system loads and displays the system settings for the selected profile.

Renaming a profile:

1) Select the Aux - System Setup Page.
2) Press the FMS Knob momentarily to activate the flashing cursor.
3) Turn the large FMS Knob to highlight ‘Rename’ in the Crew Profile Box.
4) Press the ENT Key.
5) In the ‘Rename Profile’ window, turn the FMS Knob to select the profile to rename.
6) Press the ENT Key.
7) Use the FMS Knob to enter a new profile name up to 16 characters long and press the ENT Key.
8) With ‘Rename’ highlighted, press the ENT Key.
9) To cancel the process, use the large FMS Knob to select ‘Cancel’ and press the ENT Key.

Deleting a profile:

1) Select the Aux - System Setup Page.
2) Press the FMS Knob momentarily to activate the flashing cursor.
3) Turn the large FMS Knob to highlight ‘Delete’ in the Crew Profile Box.
4) Press the ENT Key.
5) In the ‘Delete Profile’ window, turn the FMS Knob to select the profile to delete.
6) Press the ENT Key.
7) With ‘Delete’ highlighted, press the ENT Key.
8) To cancel the process, use the large FMS Knob to select ‘Cancel’ and press the ENT Key.

**Importing a profile from an SD card:**

1) Insert an SD card containing the crew profile(s) into the top card slot on the MFD.
2) Turn the FMS Knob to select the Aux - System Setup Page.
3) Select the Import Softkey.
   Or:
   a) Press the MENU Key.
   b) Turn the FMS Knob to highlight ‘Import Crew Profile’ and press the ENT Key.
4) The system displays the Crew Profile Importing window with ‘Import’ highlighted. Turn the large FMS Knob to highlight the ‘Profile Name’ field, then scroll to the desired profile name with the large and small FMS Knobs, then press the ENT Key. Then press the ENT Key with ‘Import’ highlighted.
5) If the imported profile name is the same as an existing profile on the system, the system displays an ‘Overwrite existing profile? OK or CANCEL’ prompt. Press the ENT Key to replace profile on the system with the profile imported from the SD card, or turn the FMS Knob to highlight ‘CANCEL’ and press the ENT Key to return to the Crew Profile Importing window.
6) If successful, the system displays ‘Crew profile import succeeded.’ in the window below. With ‘OK’ highlighted, press the ENT or CLR Keys or press the FMS Knob to return to the Aux - System Setup Page. The imported profile becomes the active profile.

**Exporting a profile to an SD card:**

1) Insert the SD card for storing the Crew Profile into the top card slot on the MFD.
2) Turn the FMS Knob to select the Aux - System Setup Page.
3) Select the Export Softkey. The system displays the Crew Profile Exporting window.
   Or:
Additional Features

**a)** Press the **MENU** Key.

**b)** Turn the **FMS** Knob to highlight ‘Export Crew Profile’ and press the **ENT** Key.

**5)** To export the crew profile using the current selected profile, press the **ENT** Key with ‘Export’ highlighted. To change the selected profile, turn the large **FMS** Knob to highlight the ‘Profile Name’ field, then scroll to the desired profile name with the large and small **FMS** Knobs, then press the **ENT** Key. Then press the **ENT** Key with ‘Export’ highlighted.

**6)** If the selected profile to be exported is the same as an existing profile file name on the SD card, the system displays an ‘Overwrite existing profile? OK or CANCEL’ prompt. Press the **ENT** Key to replace the profile on the SD card with the profile to be exported, or turn the **FMS** Knob to highlight ‘CANCEL’ and press the **ENT** Key to return to the Pilot Profile Exporting window without exporting the profile.

**7)** If successful, the window displays ‘Crew profile export succeeded.’ With ‘OK’ highlighted, press the **ENT** or **CLR** Keys, or press the **FMS** Knob to return to the Aux - System Setup Page.

**BLUETOOTH® MANAGEMENT**

The Connext Setup Page allows for setting up the installed optional Flight Stream device for a Bluetooth connection between the system and a mobile device running the Garmin Pilot™ application.

The mobile device must be ‘paired’ with the system in order to use the various functions. Pairing is accomplished by first placing the system in pairing mode by displaying the Connext Setup Page. The system is ‘discoverable’ whenever this page is displayed. The pairing operation is completed from the mobile device and the Garmin Pilot application. See the device Bluetooth pairing instructions and the connection instructions in the Garmin Pilot application.

**Viewing the Connext Setup Page**

1) Turn the large **FMS** Knob on the MFD to select the Aux page group.

2) Turn the small **FMS** Knob to select the Connext Setup page.

**Changing the Bluetooth Name**

1) While viewing the Connext Setup Page, press the **FMS** Knob to activate the cursor.

2) Turn the large **FMS** Knob to place the cursor in the ‘Bluetooth Name’ field.
3) Enter the desired name by using the large **FMS** Knob to select the character field, and the small **FMS** Knob select the desired alphanumeric character for that field.

4) Press the **ENT** Key. The cursor is removed and the new name is displayed.

**Enabling/Disabling Flight Plan Importing from Garmin Pilot**

1) While viewing the Connext Setup Page, press the **FMS** Knob to activate the cursor.

2) Turn the large **FMS** Knob to place the cursor in the ‘Flight Plan Import’ field.

3) Turn the small **FMS** Knob to select ‘Enabled’ or ‘Disabled’.

4) Press the **FMS** Knob to remove the cursor.

**Enabling/Disabling Automatic Reconnection of a Specific Paired Device**

1) While viewing the Connext Setup Page, press the **FMS** Knob to activate the cursor.

2) Turn the large **FMS** Knob to highlight the desired paired device.

3) Turn the small **FMS** Knob to select ‘Enabled’ or ‘Disabled’. Selecting ‘Enabled’ allows the system to automatically connect to a previously paired device when detected.

4) Press the **FMS** Knob to remove the cursor.

**Remove a Specific Paired Device from the List of Paired Devices:**

1) While viewing the Connext Setup Page, press the **FMS** Knob to activate the cursor.

2) Turn the large **FMS** Knob to highlight the desired paired device.

3) Press the **Remove** Softkey. A confirmation screen is displayed.

4) If necessary, turn the large **FMS** Knob to select ‘YES’.

5) Press the **ENT** Key to remove the device from the list of paired devices.
ELECTRONIC CHECKLISTS

**NOTE:** The checklists presented here are for example only and may not reflect checklists actually available for the Cessna NAV III Aircraft. This material is not intended to replace the checklist information presented in the AFM or the Pilot Safety and Warning Supplements document.

**NOTE:** Garmin is not responsible for the content of checklists. Cessna NAV III Aircraft checklists are created, modified, and updated by the aircraft manufacturer.

The optional checklist functions are displayed on two levels of softkeys that are available on any MFD page.

The MFD is able to display optional electronic checklists which allow a pilot to quickly find the proper procedure on the ground and during each phase of flight. The system accesses the checklists from an SD card inserted into the bezel slot. If the SD card contains an invalid checklist file or no checklist, the Power-up Page messages display ‘Checklist File: Invalid’ or ‘Checklist File: N/A’ (not available) and the Checklist Softkey is not available.

**Accessing and navigating checklists:**

1) From any page on the MFD, press the Checklist Softkey or turn the large FMS Knob to select the Checklist Page.

2) Turn the large FMS Knob to select the ‘Group’ field.

3) Turn the small FMS Knob to select the desired procedure and press the ENT Key.

4) Turn the large FMS Knob to select the ‘Checklist’ field.

5) Turn the FMS Knob to select the desired checklist and press the ENT Key. The selected checklist item is indicated with white text surrounded by a white box.

6) Press the ENT Key or Check Softkey to check the selected checklist item. The line item turns green and a checkmark is placed in the associated box. The next line item is automatically selected for checking.

Either FMS Knob can be used to scroll through the checklist and select the desired checklist item.

Press the CLR Key or Uncheck Softkey to remove a check mark from an item.
7) When all checklist items have been checked, ‘*Checklist Finished*’ is displayed in green text at the bottom left of the checklist window. If all items in the checklist have not be checked, ‘*CHECKLIST NOT FINISHED*’ will be displayed in yellow text.

8) Press the **ENT** Key. ‘GO TO NEXT CHECKLIST?’ will be highlighted by the cursor.

9) Press the **ENT** Key to advance to the next checklist.

10) Press the **EXIT** Softkey to exit the Checklist Page and return to the page last viewed.

**Immediately Accessing Emergency Procedures**

1) From any page on the MFD, press the **Checklist** Softkey or turn the large **FMS** Knob to select the Checklist Page.

2) Press the **Emergency** Softkey.

3) Turn the **FMS** Knob to select the desired emergency checklist and press the **ENT** Key.

4) Press the **ENT** Key or **Check** Softkey to check the selected emergency checklist item. The line item turns green and a checkmark is placed in the box next to it. The next line item is automatically highlighted for checking. Either **FMS** Knob can be used to scroll through the checklist and select the desired checklist item.

   Press the **CLR** Key or **Uncheck** Softkey to remove a check mark from an item.

5) When all checklist items have been checked, ‘*Checklist Finished*’ is displayed in green text at the bottom left of the checklist window. If all items in the checklist have not be checked, ‘*CHECKLIST NOT FINISHED*’ will be displayed in yellow text.

6) Press the **ENT** Key. ‘GO TO NEXT CHECKLIST?’ will be highlighted by the cursor.

7) Press the **ENT** Key to advance to the next checklist.

8) Press the **Return** Softkey to return to the previous checklist.

9) Press the **Exit** Softkey to exit the Checklist Page and return to the page last viewed.
AUXILIARY VIDEO (OPTIONAL)

There are four modes of operation of the optional auxiliary video display: Full-Screen, Full-Screen with Digital Zoom, Split-Screen with Map, and Split-Screen with Map and Digital Zoom.

Displaying auxiliary video:

1) Turn the large FMS Knob to select the Aux page group.
2) Turn the small FMS Knob to select Video and display the Aux-Video Page.

Selecting video menu options:

1) While viewing the Aux - Video Page press the MENU Key to display the Page Menu Options.
2) Turn the large FMS Knob to highlight the desired video adjustment option and press the ENT Key.

Once the ENT key is pressed on any option, the page menu closes and returns to the Aux - Video Page.

Video Setup

Video brightness, contrast, and saturation may be adjusted be selecting the setup function. While viewing the setup function softkeys, after 45 seconds of softkey inactivity, the system reverts to the Aux - Video Page softkeys.

Adjusting the video settings:

1) With the Aux-Video Page displayed, press the Setup Softkey.
2) Press the Bright - or Bright +, to adjust display brightness in five percent increments from 0 to 100%.
3) Press the Contrast- or Contrast +, to adjust display contrast in five percent increments from 0 to 100%.
4) Press the SAT - or SAT +, to adjust display saturation in five percent increments from 0 to 100%.
5) If desired, return the display to the default settings by pressing the Reset Softkey.
6) Press the Back Softkey to return to the previous softkey level.
Display Selection

Pressing the Hide Map Softkey removes the map and displays video on the full screen. The softkey label changes to grey with black characters. Pressing the Hide Map Softkey again restores the map view and the small video image. The softkey label returns to white characters on a black background.

Zoom/Range

Pressing the Zoom + or Zoom - Softkeys increases or decreases video display magnification between 1x and 10x.

The RANGE Knob can be used to increase or decrease the range setting on the map display or zoom in and out on the video display. While in the Split-Screen mode, pressing the Map Actv or Vid Actv Softkey determines which display the RANGE Knob adjusts. Pressing the softkey to display Map Actv allows the RANGE Knob to control the range setting of the map display. Pressing the softkey to display Vid Actv allows the RANGE Knob to control the zoom setting of the video display.

Input Selection

While on the Aux - Video Page, press the Input Softkey to select the EVS or Aux video source.

NOTE: Images provided on the Aux-Video page are for supplemental use only.
ABNORMAL OPERATION

REVERSIONARY MODE

Should a system detected failure occur in either display, the system automatically enters reversionary mode. In reversionary mode, critical flight instrumentation is combined with engine instrumentation on the remaining display.

Reversionary display mode can be manually activated by pressing the DISPLAY BACKUP Button on the audio panel.

NOTE: The Pilot’s Operating Handbook (POH) always takes precedence over the information found in this section.

ABNORMAL COM OPERATION

When a COM tuning failure is detected by the system, the emergency frequency (121.500 MHz) is automatically loaded into the active frequency field of the COM radio for which the tuning failure was detected. In the event of a failure of both PFD and MFD, the emergency frequency (121.500 MHz) automatically becomes the active frequency on both COM radios.

HAZARD DISPLAYS WITH LOSS OF GPS POSITION

If GPS position is lost, or becomes invalid, selected hazards being displayed on the Navigation Map Page are removed until GPS position is again established.

Loss of Hazard Functions with Loss of GPS Position
Abnormal Operation

UNUSUAL ATTITUDES

The PFD 'declutters' when the aircraft enters an unusual attitude. Only the primary functions are displayed in these situations.

The following information is removed from the PFD (and corresponding softkeys are disabled) when the aircraft experiences unusual attitudes:

- Traffic Annunciations
- AFCS Annunciations
- Flight director Command Bars
- Inset Map
- Temperatures
- DME Information Window
- Wind Data
- Selected Heading Box
- Selected Course Box
- Transponder Status Box
- System Time
- PFD Setup Menu
- Windows displayed in the lower right corner of the PFD:
  - Timer/References
  - Nearest Airports
  - Flight Plan
  - Messages
  - Procedures
  - DME Tuning
  - Barometric Minimum Descent Altitude Box
  - Glideslope, Glide-path, and Vertical Deviation Indicators
  - Altimeter Barometric Setting
  - Selected Altitude
  - VNV Target Altitude

Extreme Pitch Indication

DEAD RECKONING

While in Enroute or Oceanic phase of flight, if the system detects an invalid GPS solution or is unable to calculate a GPS position, the system automatically reverts to Dead Reckoning (DR) Mode. In DR Mode, the system uses its last-known position combined with continuously updated airspeed and heading data (when available) to calculate and display the aircraft’s current estimated position.
NOTE: Dead Reckoning Mode only functions in Enroute (ENR) or Oceanic (OCN) phase of flight. In all other phases, an invalid GPS solution produces a “NO GPS POSITION” annunciation on the map and the system stops navigating in GPS Mode.

DR Mode is indicated on the system by the appearance of the letters ‘DR’ superimposed in yellow over the ‘own aircraft’ symbol as shown in the following figure. In addition, ‘DR’ is prominently displayed, also in yellow, on the HSI slightly above and to the right of the aircraft symbol on the CDI as shown in the following figure. The CDI deviation bar is displayed in yellow, but will be removed from the display after 20 minutes. Lastly, but at the same time, a ‘GPS NAV LOST’ alert message appears on the PFD.

Normal navigation using GPS/SBAS source data resumes automatically once a valid GPS solution is restored.

It is important to note that estimated navigation data supplied by the system in DR Mode may become increasingly unreliable and must not be used as a sole means of navigation. If, while in DR Mode, airspeed and/or heading data is also lost or not available, the DR function may not be capable of estimating your position and, consequently, the system may display a path that is different than the actual movement of the aircraft. Estimated position information displayed by the system through DR while there is no heading and/or airspeed data available should not be used for navigation.

DR Mode is inherently less accurate than the standard GPS/SBAS Mode due to the lack of satellite measurements needed to determine a position. Changes in wind speed and/or wind direction compounds the relative inaccuracy of DR Mode. Because of this degraded accuracy, the crew must maintain position awareness using other navigation equipment until GPS-derived position data is restored.
Dead Reckoning Indications

As a result of operating in DR Mode, all GPS-derived data is computed based upon an estimated position and is displayed as yellow text on the display to denote degraded navigation source information. This data includes the following:

- Navigation Status Box fields except Active Leg, TAS, and DTK
- GPS Bearing Pointer
- Wind data and pointers in the Wind Data Box on the PFD
- Current Track Indicator
- All Bearing Pointer Distances
- Active Flight Plan distances, bearings, and ETE values

Also, while the system is in DR Mode, the autopilot will couple to GPS for up to 20 minutes. TAWS are also disabled. Additionally, the accuracy of all nearest information (airports, airspaces, and waypoints) is questionable. Finally, airspace alerts continue to function, but with degraded accuracy.
ANNUNCIATIONS & ALERTS

SYSTEM ANNUNCIATIONS

When an LRU or an LRU function fails, a large red “X” is typically displayed on windows associated with the failed data. Refer to the Pilot’s Operating Handbook (POH) for additional information regarding pilot responses to these annunciations.

FLIGHT PLAN IMPORT/EXPORT MESSAGES

In some circumstances, some messages may appear in conjunction with others.

<table>
<thead>
<tr>
<th>Flight Plan Import/Export Results</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>‘Flight plan successfully imported.’</td>
<td>A flight plan file stored on the SD card was successfully imported as a stored flight plan.</td>
</tr>
<tr>
<td>‘File contained user waypoints only. User waypoints imported successfully. No stored flight plan data was modified.’</td>
<td>The file stored on the SD card did not contain a flight plan, only user waypoints. These waypoints have been saved to the system user waypoints. No flight plans stored in the system have been modified.</td>
</tr>
<tr>
<td>‘No flight plan files found to import.’</td>
<td>The SD card contains no flight plan data.</td>
</tr>
<tr>
<td>‘Flight plan import failed.’</td>
<td>Flight plan data was not successfully imported from the SD card.</td>
</tr>
<tr>
<td>‘File contained user waypoints only.’</td>
<td>The file stored on the SD card did not contain a flight plan, only user waypoints. One or more of these waypoints did not import successfully.</td>
</tr>
<tr>
<td>‘Flight plan partially imported.’</td>
<td>Some flight plan waypoints were successfully imported from the SD card, however others had errors and were not imported. A partial stored flight plan now exists in the system.</td>
</tr>
<tr>
<td>‘Too many points. Flight plan truncated.’</td>
<td>The flight plan on the SD card contains more waypoints than the system can support. The flight plan was imported with as many waypoints as possible.</td>
</tr>
</tbody>
</table>
### Flight Plan Import/Export Results

<table>
<thead>
<tr>
<th>Flight Plan Import/Export Results</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>‘Some waypoints not loaded. Waypoints locked.’</td>
<td>The flight plan on the SD card contains one or more waypoints that the system cannot find in the navigation database. The flight plan has been imported, but must be edited within the system before it can be activated for use.</td>
</tr>
<tr>
<td>‘User waypoint database full. Not all loaded.’</td>
<td>The flight plan file on the SD card contains user waypoints. The quantity of stored user waypoints has exceeded system capacity, therefore not all the user waypoints on the SD card have been imported. Any flight plan user waypoints that were not imported are locked in the flight plan. The flight plan must be edited within the system before it can be activated for use.</td>
</tr>
<tr>
<td>‘One or more user waypoints renamed.’</td>
<td>One or more imported user waypoints were renamed when imported due to naming conflicts with waypoints already existing in the system.</td>
</tr>
<tr>
<td>‘Flight plan successfully exported.’</td>
<td>The stored flight plan was successfully exported to the SD card.</td>
</tr>
<tr>
<td>‘Flight plan export failed.’</td>
<td>The stored flight plan was not successfully exported to the SD card. The SD card may not have sufficient available memory or the card may have been removed prematurely.</td>
</tr>

LOADING UPDATED DATABASES

**CAUTION:** Never disconnect power to the system when loading a database. Power interruption during the database loading process could result in maintenance being required to reboot the system.

**NOTE:** When loading database updates, the ‘DB Mismatch’ system messages will be displayed until database synchronization is complete, followed by turning system power off, then on. Synchronization can be monitored on the Aux-Database Page.

All databases are updated through a single multimedia card in the bottom slot of the MFD. When the card is inserted, the databases on the card will be copied to standby and synchronized across all powered, configured units. When in standby, databases are not immediately available for use, but stored to be activated at a later time.
Databases may be loaded through Garmin Pilot and Flight Stream 510. When loading databases through Garmin Pilot and the Flight Stream 510, the Flight Stream 510 must be enabled on the system and inserted in the bottom slot of the MFD.

The cycles and dates for both standby and active databases are displayed on the “Aux – Databases” page on the MFD. Any active databases with expiration dates in the past will be highlighted with amber text. When an expired active database has a standby database that is ready to become effective, a cyan double-sided arrow will be displayed between the database cycles. When this arrow is visible, it indicates that the standby and active databases in that row will be switched on the next power cycle, activating the current standby database. Databases can also be manually selected (or deselected) by highlighting a list item and pressing the ENT key, provided a valid, verified standby database is present.

In some cases it may be necessary to obtain an unlock code from Garmin in order to make the database product functional. It may also be necessary to have the system configured by a Garmin authorized service facility in order to use some database features.

**Updating Databases:**

1) With the system OFF, remove an SD Card from the bottom SD card slot of the MFD.

2) Download and install the databases on an SD card.

3) Put the SD Card in the bottom SD card slot of the MFD.

4) Turn the system ON.

5) Press the ENT Key or the right most softkey on MFD display to acknowledge the startup screen.

6) Turn the large FMS Knob to select the Aux page group on the MFD.

7) Turn the small FMS Knob to select the Database page group on the MFD.

8) Monitor the Sync Status on the Database page. Wait for all databases to complete syncing, indicated by ‘Sync Complete’ being displayed. A cyan double arrow will appear between the Standby and Active columns to show which Standby databases will be transferred to Active at the next power cycle.
Appendix

9) Verify the correct database cycle information is shown in the Standby Database column.

**NOTE:** The **Restart** Softkey is enabled only when the aircraft is on the ground and both engines not running.

10) Press the **Restart** Softkey. A 10 second restart countdown will appear.

11) Press the **Restart** Button in the display window to continue with the restart of the system, or remove power from the system if the **Restart** Softkey is diminished.

12) Remove the SD card from the bottom slot of the MFD.

13) After restarting the system, turn the large **FMS** Knob and select the Aux page group on the MFD.

14) Turn the small **FMS** Knob and select the Databases page.

15) Verify that the standby databases transferred and are now in the active database column.

16) To view database information for an individual display, press and then turn the **FMS** Knob to select the database, and then press the **Details** Softkey. Press the **ENT** Key or the **FMS** Knob to exit.

17) To manually activate any databases that did not transfer to the active column:
   a) Press the **FMS** Knob. The first database title on the screen will be selected.
   b) Turn the small **FMS** Knob as necessary to select the database title.
   c) Press the **ENT** Key. A cyan double-sided arrow will appear indicating that the standby database will become active.
   d) Remove and reapply power to the system.
   e) Verify that the standby databases transferred and are now in the active database column.

18) Remove power from the system.
Flight Stream 510

In order to load databases through Garmin Pilot and the Flight Stream 510, the Flight Stream 510 must be enabled on the system and inserted in the bottom slot of the MFD. The PED with Garmin Pilot must be paired with the Flight Stream 510 over Bluetooth (refer to the Additional Features section). When there is at least one paired device available to connect, the Flight Stream 510 will automatically connect to the system’s preferred mobile device. The preferred device can be selected on the Aux – Databases page from a menu list of paired devices.

Once a connection to the paired mobile device is made, Garmin Pilot makes available databases that can be transferred to the Flight Stream 510. If any of these databases is more recent than the respective standby database on the system, (or if there is no standby database on the system) those databases will be automatically selected to load.

Updating Databases using Flight Stream 510

1) Insert the Flight Stream 510 Multimedia Card in the bottom slot of the MFD.
2) Press the Update softkey when the Database Update screen appears.
3) The Flight Stream 510 will enter WI-FI mode. The following screen will appear.
4) Put the mobile device in WI-FI mode (refer to the Additional Features section).
5) Connect the mobile device to the Flight Stream 510 WI-FI (refer to the Additional Features section). The WI-FI Not Connected screen will close when the WI-FI connection is established.
6) When the transfer is complete, the following screen will appear.
7) Press the Close softkey.
8) When an existing database is expired and a new one is ready to become active, a Database Expired window will appear. Continue to the next step to restart the system.

**NOTE:** The Restart Softkey is enabled only when the aircraft is on the ground and both engines not running.

9) Select the Restart softkey to restart the system and load the updated database(s), or remove power from the system if the Restart Softkey is diminished.
10) After restarting the system, turn the large FMS Knob and select the Aux page group on the MFD.

11) Turn the small FMS Knob and select the Databases page.

12) Verify that the standby databases transferred and are now in the active database column.

13) To view database information for an individual display, press and then turn the FMS Knob to select the database, and then press the Details Softkey. Press the ENT Key or the FMS Knob to exit.

14) To manually activate any databases that did not transfer to the active column:
   a) Press the FMS Knob. The first database title on the screen will be selected.
   b) Turn the small FMS Knob as necessary to select the database title.
   c) Press the ENT Key. A cyan double-sided arrow will appear indicating that the standby database will become active.
   d) Remove and reapply power to the system.
   e) Verify that the standby databases transferred and are now in the active database column.

15) Remove power from the system.

**Updating Databases from the Aux - Databases page:**

1) With the system OFF, insert the Flight Stream 510 Multimedia Card in the bottom slot of the MFD.

2) Turn the large FMS Knob to select the Aux page group on the MFD.

3) Turn the small FMS Knob to select the Database page group on the MFD.

4) Press the Device Softkey.

5) The Aux - Databases page will show the databases connected to the mobile device in place of the active databases on the system. Databases selected to load will be indicated by a cyan arrow.

6) Press the Update softkey. The Flight Stream 510 will enter WI-FI mode.

7) Put the mobile device in WI-FI mode (refer to the Additional Features section).

8) Connect the mobile device to the Flight Stream 510 WI-FI (refer to the Additional Features section).
9) The Database Update status will appear in the Status window at the top of the page.

NOTE: The Restart Softkey is enabled only when the aircraft is on the ground and both engines not running.

10) Select the Restart softkey to restart the system and load the updated database(s), or remove power from the system if the Restart Softkey is diminished.

11) After restarting the system, turn the large FMS Knob and select the Aux page group on the MFD.

12) Turn the small FMS Knob and select the Databases page.

13) Verify that the standby databases transferred and are now in the active database column.

14) To view database information for an individual display, press and then turn the FMS Knob to select the database, and then press the Details Softkey. Press the ENT Key or the FMS Knob to exit.

15) To manually activate any databases that did not transfer to the active column:
   a) Press the FMS Knob. The first database title on the screen will be selected.
   b) Turn the small FMS Knob as necessary to select the database title.
   c) Press the ENT Key. A cyan double-sided arrow will appear indicating that the standby database will become active.
   d) Remove and reapply power to the system.
   e) Verify that the standby databases transferred and are now in the active database column.

16) Remove power from the system.

MAGNETIC FIELD VARIATION DATABASE UPDATE

A copy of the current magnetic field variation database (MV DB) is included with the navigation database. At startup, the system compares this version of the MV DB with that presently being used by the ADAHRS. If the system determines the MV DB needs to be updated, a prompt is displayed on the Navigation Map Page.
Loading the magnetic field variation database update:

With ‘OK’ highlighted, press the ENT Key on the MFD. A progress monitor is displayed as shown. When the upload is complete, the system is ready for use.
