Introduction

**WARNING:** Always consult your physician before you begin or modify any exercise program. See the *Important Safety and Product Information* guide in the product box for product warnings and other important information.

This product contains a non-replaceable lithium-ion battery.

More Information

For information about accessories, go to [http://buy.garmin.com](http://buy.garmin.com), or contact your Garmin dealer.

Product Registration

Help us better support you by completing our online registration today. Go to [http://my.garmin.com](http://my.garmin.com). Keep the original sales receipt, or a photocopy, in a safe place.

Contact Garmin

Contact Garmin Product Support if you have any questions while using your Forerunner. In the USA, go to [www.garmin.com/support](http://www.garmin.com/support), or contact Garmin USA by phone at (913) 397.8200 or (800) 800.1020.

In the UK, contact Garmin (Europe) Ltd. by phone at 0808 2380000.

In Europe, go to [www.garmin.com/support](http://www.garmin.com/support) and click **Contact Support** for in-country support information, or contact Garmin (Europe) Ltd. by phone at +44 (0) 870.8501241.
Introduction

Keys

1. **power**
   - Press and hold to turn the Forerunner on and off.
   - Press to turn on and to adjust the backlight. A status page appears.
   - Press to pair with your ANT+™ weight scale (page 34).

2. **mode**
   - Press to view the timer and the menu. The map and the compass also appear if they are active.
   - Press to exit a menu or a page.

3. **lap/reset**
   - Press to create a new lap.
   - Press and hold to reset the timer.

4. **start/stop**
   - Press to start or to stop the timer.

5. **enter**
   - Press to select options and to acknowledge messages.

6. **▲▼ arrows (up/down)**
   - Press to scroll through menus and settings. Press and hold to scroll quickly through the settings.
   - Press to scroll through training pages during a workout.
   - On the Virtual Partner® page, press and hold to adjust the Virtual Partner pace.

Your settings are saved.

- Press and hold to switch sport modes.
Getting Started

Charging the Battery

⚠️ **CAUTION:** To prevent corrosion, thoroughly dry the charging contacts and the surrounding area before charging.

**TIP:** The Forerunner will not charge when outside the temperature range of 32°F to 122°F (0°C to 50°C).

1. Plug the USB connector on the charging clip cable into the AC adapter.
2. Plug the AC adapter into a standard wall outlet.
3. Align the charging clip posts with the contacts on the back of the Forerunner.
4. Clip the charger securely over the face of the Forerunner.

A fully charged battery will last up to 20 hours, depending on usage.

**Turning on the Device**

Press and hold to turn on your Forerunner.
Configuring the Forerunner

The Forerunner uses your user profile to calculate accurate calorie data. See page 9 for information on activity class and lifetime athlete information.

1. Follow the on-screen instructions to configure the Forerunner and set your user profile.
2. Press ▲▼ to view choices and change the default selection.
3. Press enter to make a selection.

If you are using an ANT+ heart rate monitor, select Yes during the configuration to allow the heart rate monitor to pair (connect) with your Forerunner. See page 5 for more information.

When you initially turn on the Forerunner and are completing the initial setup, use the table on page 9 to set your activity class. Indicate if you are a lifetime athlete.

A lifetime athlete is an individual who has trained intensely for many years (with the exception of minor injuries) and has a resting heart rate of 60 beats per minute (bpm) or less.

Acquiring Satellite Signals

It may take 30–60 seconds to acquire satellite signals. Go outdoors to an open area. For the best reception, ensure that the face of the Forerunner is oriented toward the sky.

When the Forerunner has acquired satellite signals, the training page appears with the satellite icon (❖) at the top.

NOTE: By default, the settings on your Forerunner update the time and correct time zone automatically according to satellite information.
Pairing the Heart Rate Monitor (Optional)

While you are trying to pair your heart rate monitor with your Forerunner for the first time, move 10 m away from other heart rate monitors.

Using the Heart Rate Monitor

The heart rate monitor is on standby and ready to send data. Wear the heart rate monitor directly on your skin, just below your breastplate. It should be snug enough to stay in place during your run.

1. Snap the heart rate monitor onto the strap.

2. Wet the electrodes on the back of the strap to create a strong connection between your chest and the transmitter.

NOTE: Some heart rate monitors have a contact patch. Wet the contact patch.

3. Wrap the strap around your chest, and connect the strap hook to the loop.

The Garmin logo should be right-side up.

4. Bring the device within range (3 m) of the heart rate monitor.

NOTE: If the heart rate data is erratic or does not appear, you may have to tighten the strap on your chest or warm up for 5–10 minutes.

5. Press mode > select Settings > Run Settings > Heart Rate > ANT+ HR > Yes.
Getting Started

Heart Rate Settings
For the most-accurate calorie data, set your maximum heart rate and resting heart rate. You can set five heart rate zones to help you to measure and increase your cardiovascular strength. If you configured your device in the initial setup to include a heart rate monitor, this step is unnecessary.

1. Press mode > select Settings > Run Settings > Heart Rate > HR Zones.
2. Follow the on-screen instructions.

NOTE: Press and hold mode and change the sport settings. Follow steps 1 and 2 to configure your heart rate settings for biking and other sports modes.

Customizing Your Sport Settings (Optional)
1. Press and hold mode to change the sport mode.
2. Press mode > select Settings > Select the sport setting.

Select Data Fields to customize up to four data pages for your activity (page 28).

Go Work Out!
1. Press mode to view the training page.
2. Press start to start the timer.
3. After completing your activity, press stop.
4. Press and hold reset to save your activity and reset the training page.
Getting Started

Downloading Free Software
2. Follow the on-screen instructions.

Sending Workout Data to Your Computer
1. Plug the USB ANT Stick into a USB port on your computer.
   The ANT Stick drivers automatically install the Garmin ANT Agent™. You can download the USB ANT Agent if the drivers do not automatically install. Go to www.garminconnect.com/start.
2. Bring your device within range (3 m) of your computer.
3. Follow the on-screen instructions.

Locking the Keys
You can lock the keys on your Forerunner. This decreases the chance of accidentally pressing a key when taking the device on and off.
1. Press mode and ▲ simultaneously to lock the keys.
2. Press mode and ▲ simultaneously to unlock the keys.

Forerunner Backlight
Press ⏰ to turn on the backlight for fifteen seconds. Use ▲▼ to adjust the backlight level. Press mode to exit the backlight status page. This page also shows several status icons (page 8).

Training

NOTE: Always consult your physician before you begin or modify any exercise program.

Use your Forerunner to set alerts, train with a Virtual Partner™, program interval or custom workouts, and plan courses based on existing activities. The Forerunner offers several training features and optional settings.

About the Training Page

Press mode to view the training page. Use ▲▼ to scroll through the available pages.

To customize the data fields on the training pages, see page 28.

Sport Mode

Press and hold mode to change the sport mode. All settings are specific to the current sport that you have selected.

Auto Lap®

You can use Auto Lap to automatically mark the lap at a specific position or after you have traveled a specific distance. This setting is helpful for comparing your performance over different parts of a run (every 2 miles or every major hill, for example).

NOTE: Auto Lap does not function during interval or custom workouts.

1. Press mode > select Settings > select sport settings (depends on your current sport mode) > Auto Lap.
2. In the Auto Lap Trigger field, select **By Distance** to enter a value or **By Position** to choose an option:

- **Lap Press Only**—marks a lap each time you press *lap* and each time you pass any of those locations again.
- **Start and Lap**—marks a lap at the GPS location where you press *start* and at any locations during the run where you pressed *lap*.
- **Mark and Lap**—marks a lap at the specific GPS location you mark when you select this option and at any location during the run where you pressed *lap*.

**NOTE:** When doing a course (see page 18), use **By Position** to mark laps at all of the lap positions marked in the course.

### Auto Pause®

Auto Pause is helpful if your training includes stop lights or other places where you need to slow down or stop.

**NOTE:** Auto Pause does not function during interval or custom workouts.

1. Press *mode* > select **Settings** > select the sport setting option (depends on your current sport mode see page 10).
2. Select **Auto Pause**.
3. Select one of the following options:
   - **Off**
   - **When Stopped**—pauses timer automatically when you stop moving.
   - **Custom Pace**—pauses timer automatically when your speed drops below a specified value.
**Auto Scroll**

Use the auto scroll feature to automatically cycle through all of the training data pages while the timer is running.

1. Press **mode** > select **Settings** > select the sport setting option (depends on your current sport mode see page 10).
2. Select **Auto Scroll**.
3. Select a display speed: **Slow**, **Medium**, or **Fast**.

**Heart Rate**

1. Press **mode** > select **Settings** > select the sport setting option (depends on your current sport mode see page 10).
2. Select **Heart Rate**.
3. Select **ANT+HR** to turn on pairing with the optional heart rate monitor.

4. Select **HR Zones** to start the heart rate zone configuration wizard.

**Heart Rate Zones**

**CAUTION:** Consult your physician to specify heart rate zones/targets that are appropriate for your fitness level and health condition.

Many athletes are using heart rate zones to measure and increase their cardiovascular strength and improve their level of fitness. A heart rate zone is a set range of heartbeats per minute. The five commonly accepted heart rate zones are numbered from 1–5 according to increasing intensity. The Forerunner sets the heart rate zone ranges (see the table on page 48) based on your maximum and resting heart rates set in your user profile (page 36).
You can customize your heart rate zones in your Garmin Connect user profile and then transfer data to your Forerunner.

**How Do Heart Rate Zones Affect Your Fitness Goals?**
Knowing your heart rate zones can help you measure and improve your fitness by understanding and applying these principles:

- Your heart rate is a good measure of exercise intensity.
- Training in certain heart rate zones can help you improve cardiovascular capacity and strength.
- Knowing your heart rate zones can prevent you from overtraining and can decrease your risk of injury.

**Virtual Partner®**

1. Press **mode** > select **Settings**  > select the sport setting option (depends on your current sport mode, see page 10).
2. Select **Virtual Partner** > **On**.

Your Virtual Partner is a unique tool designed to help you meet your training goals. The Virtual Partner competes with you every time you and the timer are running.

If you make changes to the Virtual Partner pace before you start the timer, those changes are saved. Changes made to the Virtual Partner pace after the timer has started are applied only to the current session, and are not saved when the timer is reset. If you make changes to the Virtual Partner during an activity, the Virtual Partner uses the new pace from your location.
Training

Changing the Virtual Partner Pace
1. Press **mode** to view the training page.
2. Use ▲▼ to view the Virtual Partner page.

   ![Virtual Partner Page]

   VP Pace: 08:00/mi
   Distance Behind: 0.12mi
   Time Behind: 00:53

3. Press and hold ▲▼ to increase or decrease the VP pace.
4. To save the changes, press **mode** to exit or wait for the page to timeout.

**NOTE**: Alerts do not function during interval or custom workouts.

Alerts
Use your Forerunner alerts to train toward certain time, distance, and heart rate goals. You can set separate alerts in each sport mode.

1. Press **mode** > select **Training** > select the sport alerts option (depends on your current sport mode, see page 10).
2. Use ▲▼ and press **enter** to enter information for any of the following alarms:
   - **Time Alert**—notifies you when you have run for a specific amount of time.
   - **Distance Alert**—notifies you when you have run a specific distance.
   - **Calorie Alert**—notifies you when you have burned a specific number of calories.
   - **HR Alert**—notifies you if your heart rate exceeds, or drops below, a specific number of beats per minute (bpm).
NOTE: To use HR alerts, you must have a Forerunner 310XT and a heart rate monitor.

- **Cadence Alert**—notifies you if your cadence exceeds, or drops below, a specific number of revolutions of crank arm per minute (rpm) or strides per minute (spm).

NOTE: To use cadence alerts, you must have a Forerunner 310XT and a foot pod or bike cadence sensor.

- **Power Alert**—notifies you if your power exceeds, or drops below, a specific value in Watts.

NOTE: To use power alerts, you must have a Forerunner 310XT and a power meter.

---

**Workouts**

1. Press `mode` > select **Training** > **Workouts** to choose the type of workout right for you.

2. Press `start`.

NOTE: While performing a workout, press ▲ ▼ to view more data pages.

When you complete all steps in your workout, the “Workout Finished” message appears.

**Creating Interval Workouts**

You can create an interval workout based on time or on distance and rest portions of the workout. You can have only one interval workout created at one time. If you create an additional interval workout, the previous workout is overwritten.

1. Press `mode` > select **Training** > **Workouts** > **Interval**.

2. Select the **Type** of interval workout.
3. Enter the duration value.
4. Select the **Rest Type**.
5. Enter the duration value.
6. Select **More**, and enter the **Reps** value.
7. Select **Warmup Yes** and **Cooldown Yes** (optional).
8. Select **Do Workout**.
9. Press **start**.

**Stopping a Workout**
1. Press **stop**.
2. Press and hold **reset**.

If you are doing a warm up or cool down, press **lap** at the end of your warm-up lap to start your first interval. At the end of your last interval, the Forerunner automatically starts a cool-down lap. When you are finished cooling down, press **lap** to end your workout.

As you approach the end of the interval, an alarm counts down the time until a new interval begins. To end an interval early, press the **lap/reset** key.

**Creating Custom Workouts**
Custom workouts can include goals for each workout step and varied distances, times, and calories. Use Garmin Connect to create and edit workouts and transfer them to your Forerunner. You can also schedule workouts using Garmin Connect. You can plan workouts in advance and store them on your Forerunner.

**NOTE:** For more information about transferring data to your Forerunner, see page 7.

1. Press **mode > Training > Workouts > Custom**.
2. Select **New**.
3. Enter a workout name in the top field.
4. Select **1. Open No Target**, and then select **Edit Step**.
5. In the **Duration** field, select how long you want the step to last. If you select **Open**, you can end the step during your workout by pressing **lap**.

6. Below **Duration**, enter the value where you want the step to end.

7. In the **Target** field, select your goal during the step (speed, heart rate, cadence, power, or none).

8. Below **Target**, enter a goal value for this step (if necessary). For example, if your target is heart rate, select a heart rate zone, or enter a custom range.

9. When you are finished with this step, press **mode**.

10. To add another step, select **<Add New Step>**. Repeat steps 5-9.

11. To mark any step as a rest step, select the step. Then select **Mark as Rest Step** from the menu. Rest steps are noted in your workout history.

**Repeating Steps**

1. Select **<Add New Step>**.

2. In the **Duration** field, select **Repeat**.

3. In the **Back to Step** field, select the step you want to return to.

4. In the **Number of Reps** field, enter the number of repetitions.

5. Press **mode** to continue.

**Starting a Custom Workout**

1. Press **mode > Training > Workouts > Custom**.

2. Select the workout.

3. Select **Do Workout**.

4. Press **start**.

After you begin a custom workout, the Forerunner displays each step of the workout, including the name of the step, the goal (if any), and current workout data.

As you approach the end of each step, an alarm counts down the time until a new step begins.
Stopping a Custom Workout
Press lap/reset.

Deleting a Custom Workout
1. Press mode > Training > Workouts > Custom.
2. Select the workout.
3. Select Delete Workout > Yes.

Courses
Another way you can use the Forerunner for custom training is to follow courses based on a previously recorded activity. You can follow the course trying to match or exceed a previous performance. You can also race against the Virtual Partner when training with courses.

Creating Courses with Garmin Connect
Use Garmin Connect to create courses and course points and transfer them to your Forerunner.

NOTE: For more information about transferring data to your Forerunner, see page 7.

Creating Courses with Your Device
1. Press mode > select Training > Courses > New.
2. From the History page, select an entry on which to base your course.
3. Enter a name for your course.
4. Press mode to exit.

Starting a Course
1. Press mode > select Training > Courses.
2. Select a course from the list.
3. Select Do Course.
4. Press start. History is recorded even if you are not on the course.

To end a course manually, press stop > press and hold reset.
Warm Up
You can include a warm up before you begin your course. Press start to begin the course, and then warm up. Stay away from your course path as you warm up. When you are ready to begin your course, head toward your course. When you are on any part of the course path, the Forerunner displays an “On Course” message.

When you start a course, your Virtual Partner also starts the course. If you are warming up and are not on the course, the first time that you join the course, your Virtual Partner restarts the course from your current location.

If you stray away from the course, the Forerunner displays an “Off Course” message. Use the navigation page to find your way back to the course.

Deleting a Course
1. Press mode > select Training > Courses.
2. Select a course from the list.
3. Select Delete Course.
4. Select Yes to delete the course.
5. Press mode to exit.

Multisport Workouts
Triathletes, duathletes, and other multisport competitors can take advantage of the Forerunner’s multisport workouts. When you set up a multisport workout, you can switch between sport modes and still view your total time and distance for all sports. For example, you can switch from biking mode to running mode and view your total time and distance for biking and running throughout your workout.

The Forerunner stores multisport workouts in history and includes total time, distance, average heart
Training

rate, and calories for all sports in the workout. It also includes specific details for each sport.

You can use multisport workouts manually, or you can preset multisport workouts for races and other events.

**Creating a Manual Multisport Workout**

You can create a manual multisport workout by changing sport modes during your workout without resetting the timer. When you change sport modes, press ▲▼ to see the Multisport timer.

1. Start and complete a workout in any sport. Press stop to finish your workout, but do not reset the timer.
2. Press and hold mode until the Change Sport menu appears.
3. Select another sport.
4. Press start to begin your workout in the new sport.

**Creating Auto Multisport Workouts**

If you are participating in a race or event, you can set up an auto multisport workout that includes each sport in the event. You can also include transition time from one sport to the next. Move seamlessly from sport to sport by pressing the lap key.

1. Press mode > select Training > Auto Multisport.
2. To change a sport mode in the list, select the sport.
3. Select an option from the menu. **Edit Leg** changes this sport mode to a different sport. **Insert Leg** inserts another sport mode before this sport. **Remove Leg** removes this sport mode from the list.
4. To add a sport mode to the end of the list, select <Add Sport>.
5. To include transition time between each sport mode, select **Include Transition**.

6. To start your workout, select **Start Multisport**.

To change from one sport mode to the next, press **lap**. If you have included transition time, press **lap** when you are finished with one sport to start the transition time. Press **lap** again to end the transition time and begin the next sport.

**Stopping Auto Multisport**
Press **mode** > select **Training** > **Stop Multisport**. You can also clear a multisport workout by pressing **stop** and then pressing and holding **reset** to reset the timer.

---

**Swimming with Your Forerunner**

The Forerunner is waterproof to 50 m for surface swimming. Use the timer to record your swim time.

**NOTE:** The Forerunner records GPS data only when you are swimming outside using the freestyle stroke.

**TIP:** Because GPS signals may be interrupted, swimmers and triathletes should put the device in a swimming cap, for the most-accurate speed and distance data.

1. Press and hold **mode** > select **Other**.
2. Press **mode** > select **Settings** > **Other Settings** > **Swim**.
3. Select **Enabled** > **Yes**.
   
   **NOTE:** The swim setting must be turned on to get accurate distance data.
4. Press **start** to start the timer.
Training

5. When you have finished swimming, press lap or stop to view your distance and average speed in the data fields.
You must press stop to stop the timer.

**NOTICE:** Scuba diving with the Forerunner may damage the product and will void the warranty.

**Using the Countdown Timer**

You can use the countdown timer to automatically start the Forerunner timer after a specified countdown. For example, you can use a 30-second countdown before you start a timed sprint. You can also set a 5-minute countdown before starting a boat race.

**NOTE:** During the countdown, history is not recorded.
The swim setting must be turned off to access the countdown timer.

1. Press and hold mode > select Other.
2. Press mode > select Settings > Other Settings > Countdown Timer.
3. Select Countdown Timer > On.
4. Enter the countdown time.
5. Press start to begin the countdown timer.
You will hear 5 beeps before the timer starts automatically.
Saving History

Your device stores data based on the type of activity, the accessories used, and your training settings.

To save an activity, press and hold the lap/reset key for 3 seconds.

When the Forerunner memory is full, an error message appears.

NOTE: Your Forerunner will not automatically delete or overwrite your data. See page 24 to learn how to delete history.

Viewing Activity History

You can view the following data on your Forerunner: time, distance, average pace/speed, calories, average heart rate data, and average cadence.

1. Press mode > select History > Activities.
2. Use ▲▼ to scroll through the activities. Select View More to view Averages and Maximums. Select View More > View Laps to view lap summaries.

Viewing Totals

The Forerunner records the total distance traveled and time you have worked out with your Forerunner.

To view the totals, press mode > select History > Totals.
History

Deleting History

1. Press **mode** > select **History** > **Delete**.

2. Select an option:
   - **Individual Activities**
   - **All Activities**—delete all activities from the history.
   - **Old Activities**—delete activities recorded more than one month ago.
   - **Totals**—reset all your totals.
Navigation

Use the GPS navigation features on your Forerunner to view your path on a map, save locations you want to remember and find your way home.

Adding the Map Page

Before you use the navigation features, you may want to configure the Forerunner to display the map.

1. Press mode > select Settings > System > Map.
2. In the Show Map field, select Yes.

Press mode to see the timer, map, and main menu. When you start the timer and begin to move, a dotted line appears on the map, showing you exactly where you have traveled. This dotted line is called a track. To zoom in or out on the map, press ▲▼.

Marking Locations

A location is any point that you store in memory. If you want to remember landmarks or return to a certain spot, mark a location there. The location appears on the map with a name and a symbol. You can find, view, and go to locations at any time.

1. Go to the place where you want to mark a location.
2. Press mode > select GPS > Save Location.
Navigation

3. Enter a name in the top field.
4. Select **OK**.

**Marking Locations Using Lat/Lon**
1. Press **mode** > select **GPS** > **Save Location**.
2. Select the **Position** field. Enter the latitude and longitude of the location you want to mark.
3. Make other changes as necessary, and select **OK**.

**Finding and Going to a Location**
1. Press **mode** > select **GPS** > **Go to Location**.
2. All of your saved locations are shown.
3. Press ▲▼ to find a location in the list, and press **enter** to select.
4. Select **Go To**. Follow the line on the map to the location.

When you are going to a location, the map and compass pages are added automatically. Press **mode** to view these pages. On the compass, the arrow points toward the location. Go in the direction of the arrow to reach the location. The compass also shows the distance and time left until you reach the location.

**Stop Going to a Location**
Press **mode** > select **GPS** > **Stop Go To**.

**Editing or Deleting a Location**
1. Press **mode** > select **GPS** > **Go to Location**.
2. Select the location you want to edit.

3. Change the information as necessary. To delete the location, select **Delete**.

**Using Back to Start**

If you want to return to the starting point, the Forerunner can take you back along the exact path you traveled using Back to Start.

Press **mode** > select **GPS** > **Back to Start**.

A line appears on the map from your current location to your starting point.

*Follow the line back to your starting point.*

**Viewing GPS Information**

The Satellite page displays information about the GPS signals the Forerunner is currently receiving. Press **mode** > select **GPS** > **Satellites** to view the Satellite page.

For more information about GPS, go to www.garmin.com/aboutGPS.

Press ▲▼ on the Satellite page to view satellite strength information. The black bars represent the strength of each satellite signal received (the number of the satellite appears below each bar).
Settings

Press **mode** > select **Settings**.

**TIP:** When finished selecting options or entering values on your Forerunner, press **mode** to save the setting.

Data Fields

You can show/hide the following pages and customize up to four data fields on four sport-specific pages.

**NOTE:** You can see only the pages for the sport mode you have currently selected (page 10).

Setting Data Fields

1. Press **mode** > select **Settings** > select the sport setting option (depends on your current sport mode see page 10).
2. Select **Data Fields**.
3. Select one of the training pages.
4. Press ▲▼ to select the number of data fields.

### System

Press *mode > select Settings > System.*

**Language**—change the on-screen text language. Changing the text language does not change the language of user-entered data, such as course names.

To download a language not included on your device, go to [www.garmin.com/intosports](http://www.garmin.com/intosports) and click **Garmin Connect**. Your device can only contain one downloaded language at a time.

**Tones and Vibrations**—page 31

**Display**—page 33

**Map**—page 33

**Time**—page 33

**Units**—page 34

**Weight Scale ANT+**—page 34

**Fitness Equipment**—page 34

**Data Transfer**—page 35.

**Initial Setup**—run the initial setup to configure the Forerunner.
Turning Tones and Vibrations On or Off
1. Press mode > select Settings > System > Tones and Vibration.
2. Select from the following options:
   - **Key Tones**—turn key tones on or off.
   - **Message Tones**—turn message tones on or off.
   - **Message Vibration**—turn message vibrations on or off.

Changing the Display
1. Press mode > select Settings > System > Display.
2. Select from the following options:
   - **Backlight Timeout**—select the amount of time the backlight stays on. Use a short backlight setting to conserve battery power.
   - **Contrast**—select the amount of screen contrast.

Changing the Map Settings
1. Press mode > select Settings > System > Map.
2. To change the orientation of the map, press enter, and select an option.
   - **North Up**—orients the map with North at the top of the screen.
   - **Track Up**—orients the map with your direction of travel at the top of the screen.
3. To show/hide waypoints on the map, select **Show** or **Hide** in the **User Locations** field.
4. To view the map as part of the page loop, select **Yes** in the **Show Map** field.

Changing Time Settings
1. Press mode > select Settings > System > Time.
2. Select a time format and a time zone.
Settings

Changing Units of Measure
1. Press **mode** > select **Settings** > System > Units.
2. Select units of measure for distance, elevation, weight/height, pace/speed, and position.

Using the Weight Scale
If you have an ANT+ compatible weight scale, the device can read the data from the weight scale.
1. Press **mode** > select **Settings** > System > Weight Scale Ant+.
2. Select **Enabled** > **Yes**.
3. From the timer page, press and quickly release ( ).
   A “Scanning for scale” message appears.
4. Stand on the scale when the light flashes.
   **NOTE**: If using a body composition scale, remove shoes and socks to ensure that all body composition parameters are read and recorded.
5. Step off the scale when the light remains solid.
   **NOTE**: If an error occurs, step off the scale. Step on when indicated.

Weight, body fat, and body hydration readings display on your device.
Additional weight scale readings are stored on the device, and all readings are automatically sent to your computer when you transfer history (page 7).

Linking to Fitness Equipment
To link your device to compatible fitness equipment, look for the ANT+ Link Here logo.

**NOTE**: If fitness equipment is already enabled, go to step 3.
1. Press **mode** > select **Settings** > System > Fitness Equipment.
2. Select **Enabled** > **Yes**.
3. Press **mode** to cycle to the timer page.
   The (¶) flashes indicating that pairing is ready.

4. Move the device near the ANT+ Link Here logo.
   A “Fitness Equipment detected” message appears. The (¶) remains solid when your device has paired.

5. Start the timer on the fitness equipment to begin your workout.
   The timer on your device starts automatically
   If you have trouble connecting reset the fitness equipment and pair again.

See [www.garmin.com/antplus](http://www.garmin.com/antplus) for more linking instructions.

---

**Transferring Data**

Move away (10 m) from other ANT+ accessories while the Forerunner is trying to pair with the computer for the first time.

1. Verify that the computer is set up for data upload and that pairing is enabled in the ANT Agent. See page 7.

2. Press **mode** > select **Settings** > **System** > **Data Transfer**.

3. Select **Pairing** > **On**.

4. Bring your Forerunner within range (3 m) of the computer.

5. When the ANT Agent finds your Forerunner, the ANT Agent displays the unit ID and asks you if you want to pair. Select **yes**.

6. Your Forerunner should display the same unit ID as the ANT Agent. If so, select **yes** on your Forerunner to complete the pairing process.
**Settings**

**Preventing Data Transfer**
To prevent transferring data to/from any computer, even a paired computer, press **mode > Settings > System > Data Transfer > Enabled > No.**

**Send All Data**
By default, your Forerunner only sends new data to your computer. To send all data to your computer again, press **mode > select History > Transfer All.**

**User Profile**
Press **mode > select Settings > User Profile.** The Forerunner uses information that you enter about yourself to calculate calorie consumption. The initial setup also helps configure your profile before you begin using the Forerunner.

Calorie expenditure and heart rate analysis technology is provided and supported by Firstbeat Technologies Ltd. For more information, go to [http://www.firstbeattechnologies.com/files/Energy_Expenditure_Estimation](http://www.firstbeattechnologies.com/files/Energy_Expenditure_Estimation).

**About Forerunner**
Press **mode > select Settings > About Forerunner** to view the software version, the GPS version, and the unit ID.
Using Accessories

The following ANT+ accessories are compatible with the Forerunner 310XT:

- Heart rate monitor
- Foot pod
- GSC™ 10 speed and cadence bike sensor
- USB ANT Stick (see page 7 and page 35)
- Third-party ANT+ power meters

To purchase accessories, go to http://buy.garmin.com, or contact your Garmin dealer.

Pairing Accessories

If you purchased an accessory with ANT+ wireless technology, you need to pair it with your Forerunner.

Pairing is connecting ANT+ accessories, such as the heart rate monitor, with your Forerunner. The pairing process only takes a few seconds when the accessories are activated and functioning correctly. When paired, your Forerunner only receives data from your accessory, even if you are near other accessories.

After you pair the first time, your Forerunner automatically recognizes your accessory each time the accessory is activated.

TIP: The accessory needs to send data to complete the pairing process. You need to wear the heart rate monitor, take a step wearing the foot pod, or pedal your bike with the GSC 10.

Heart Rate Monitor

For information about putting on the heart rate monitor, see page 5.
Using Accessories

**Heart Rate Monitor Tips**
If you are noticing inaccurate or erratic heart rate data, use the following tips.

- Reapply water, saliva, or electrode gel to the electrodes.
- Wear a cotton shirt or wet your shirt if suitable for your activity. Synthetic fabrics that rub or flap against the heart rate monitor can create static electricity that interferes with heart rate signals.
- Move away from sources of strong electromagnetic fields and some 2.4 GHz wireless sensors, which can interfere with your heart rate monitor. Sources of interference may include very high voltage power lines, electric motors, microwave ovens, 2.4 GHz cordless phones, and wireless LAN access points.

**Replacing the Heart Rate Monitor Battery**
The heart rate monitor contains a user-replaceable CR2032 battery.

**NOTE:** Contact your local waste disposal department to properly dispose of batteries.

1. Use a small Phillips screwdriver to remove the four screws on the back of the module.
2. Remove the cover and battery. Wait 30 seconds. Insert the new battery with the positive side facing up.

**NOTE:** Be careful not to damage or lose the O-ring gasket.

3. Replace the back cover and the four screws.
NOTE: After replacing the battery, you might need to pair the heart rate monitor with the Forerunner again.

TIP: To maximize the battery life, remove the heart rate module from the strap when not in use.

Caring for the Heart Rate Monitor

- **NOTICE:** You must unsnap the module before cleaning the strap.
- **NOTICE:** A buildup of sweat and salt on the strap can decrease the ability of the heart rate monitor to report accurate data.

- Go to www.garmin.com/HRMcare for detailed washing instructions.
- Rinse the strap after every use.
- Wash the strap after every seven uses. The method of cleaning is determined by the symbols printed on the strap.

<table>
<thead>
<tr>
<th>Machine wash</th>
<th>![40°]</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hand wash</td>
<td>![Hand wash]</td>
</tr>
</tbody>
</table>

- Do not put the strap in a dryer.
- To prolong the life of your heart rate monitor, unsnap the module when not in use.

Foot Pod

Your Forerunner is compatible with the foot pod. You can use the foot pod to send data for your Forerunner when training indoors, when your GPS signal is weak, or when you lose satellite signals. The foot pod is on standby and ready to send data (like the heart rate monitor). You
must pair the foot pod with your Forerunner.

Calibrating the Foot Pod
Calibrating your foot pod is optional and can improve accuracy. There are three ways to adjust the calibration: distance, GPS, and manual.

Distance Calibration
For best results, the foot pod should be calibrated using the inside lane of a regulation track. A regulation track (2 laps = 800 m) is more accurate than a treadmill.

1. Press mode > select Settings > Run Settings > Foot Pod.
2. Select Yes in the Foot pod sensor present? field.
3. Select Calibrate.
4. Select By Distance
5. Select a distance.
6. Select continue.
7. Press start to begin recording.
8. Run or walk the distance.

GPS Calibration
You must have GPS signals to calibrate the foot pod using GPS.

1. Press mode > select Settings > Run Settings > Foot Pod.
2. Select Yes in the Foot pod sensor present field.
3. Select Calibrate.
4. Select By GPS
5. Select Continue.
6. Press Start.
7. Run or walk. The Forerunner informs you that you have traveled far enough.

Manual Calibration
If your foot pod distance seems slightly high or low each time you run, you can manually adjust the calibration factor.

Press mode > select Settings > Run
Settings > Foot Pod > Calibration Factor. Adjust the calibration factor. Increase the calibration factor if your distance is too low; decrease the calibration factor if your distance is too high.

GSC 10 Bike Sensor
Your Forerunner is compatible with the GSC 10 speed and cadence bike sensor. You must pair the GSC 10 with your Forerunner. You must be in bike sport mode.

Setting Up the Bike Sensor
Calibrating your bike sensor is optional and can improve accuracy.

1. Press mode > select Settings > Bike Settings > bike name > ANT+Spd/Cad.
3. If necessary, press More for sensor type.

Bike Details
To enter information specific to your bike in order to calibrate your sensors more accurately, complete the following steps:

1. Press and hold mode to select the bike sport mode.
2. Press mode > select Settings > Bike Settings > bike name > Bike Details.
3. Modify the information in the Name, Weight, and Odometer fields.
4. You can select Custom in the Wheel Size field to manually enter your wheel size.

NOTE: The default setting is Automatic. Your wheel size is automatically calculated using GPS distance.
Using Accessories

**Data Recording**
The Forerunner uses smart recording. It records key points where you change direction, speed, or heart rate.

When a third-party power meter (page 42) is paired, the Forerunner records points every second. Recording points every second uses more of the available memory on the Forerunner, but creates a very accurate record of your ride.

For a list of compatible third-party power meters, go to www.garmin.com.

**Power Meter**

**Power Calibration**
For calibration instructions specific to your power meter, refer to the manufacturer’s instructions.

Before you can calibrate your power meter, it must be properly installed and actively recording data. You must be in bike sport mode.

1. Press **mode > select Settings > Bike Settings > bike name > ANT+Power**.
2. Select **Yes** in the Power Meter Present? field.
3. Select **Calibrate**.
4. Keep your power meter active by pedaling until the message appears.

**Power Zones**
You must be in bike sport mode.

1. Press **mode > select Settings > Bike Settings > bike name > Power Zones**.
2. Select **Based on FTP** or **Custom**.

You can set seven custom power zones (1=lowest, 7=highest). If you know your FTP (functional threshold power), you can enter it, and allow the device to calculate your power zones automatically. You can also enter your power zones manually.
Appendix

Resetting the Forerunner
If your Forerunner is not operating properly, press and hold mode and lap/reset simultaneously until the screen goes blank (about 7 seconds) to reset your Forerunner. This does not erase any of your data or settings.

Clearing User Data

⚠️ NOTICE: This deletes all user-entered information including history.

1. Turn off the Forerunner.
2. Press and hold mode and until the message appears.
3. Select Yes to clear all user data.

Caring for the Forerunner
Clean the Forerunner or the optional heart rate monitor using a cloth dampened with a mild detergent solution. Wipe dry. Avoid chemical cleaners and solvents that may damage plastic components.

Do not store the Forerunner where prolonged exposure to temperature extremes may occur (such as in the trunk of a car), because permanent damage may result.

User information, such as history, locations, and tracks, is retained indefinitely in the memory of the unit without the need for external power. Back up important user data by transferring it to Garmin Connect. See page 7.
Appendix

Updating the Forerunner Software Using Garmin Connect

Go to www.garmin.com/intosports for information about Forerunner software updates and Garmin Connect Web-based software.

If there is new software available, Garmin Connect alerts you to update the Forerunner’s software. Follow the on-screen instructions. Make sure your device stays in range of the computer during the update process.

Battery Information

Actual battery life depends on use of the following items: GPS, backlight, and ANT+ computer connection.

With a fully charged battery, the Forerunner can operate up to 20 hours with GPS on.

Specifications

Forerunner

Water resistance: surface swimming

Data storage: approximately 20 hours of data (assuming 1 trackpoint is being recorded every 4 seconds).

Memory: up to 1000 laps; 100 user locations (waypoints).

Computer interface: USB ANT Stick

Battery type: 700 mA rechargeable lithium-ion battery

Battery life: up to 20 hours, typical use.

Operating temperature range: From -4°F to 140°F (from -20°C to 60°C)

Charging temperature range: From 32°F to 122°F (from 0°C to 50°C)

Radio frequency/protocol: 2.4 GHz/ANT+ wireless
communications protocol

GPS Antenna: internal patch

GPS Receiver: high-sensitivity integrated

USB ANT Stick
Transmission range: Approximately 16.4 ft. (5 m)

Operating temperature: From 14°F to 122°F (from -10°C to 50°C)

Radio frequency/protocol: 2.4 GHz/ANT+ wireless communications protocol

Power source: USB

Heart Rate Monitor
Water Resistance: 98.4 ft. (30 m)

NOTE: This product does not transmit heart rate data to your GPS device while swimming.

Transmission range: approximately 9.8 ft. (3 m)

Battery: user-replaceable CR2032 (3 volts) Perchlorate Material – special handling may apply. See www.dtsc.ca.gov/hazardouswaste/perchlorate.

Battery life: approximately 4.5 years (1 hour per day)

Operating temperature: from 23°F to 122°F (from -5°C to 50°C)

Radio frequency/protocol: 2.4 GHz/ANT+ wireless communications protocol

System Compatibility: ANT+
Appendix

Software License Agreement

BY USING THE FORERUNNER, YOU AGREE TO BE BOUND BY THE TERMS AND CONDITIONS OF THE FOLLOWING SOFTWARE LICENSE AGREEMENT. PLEASE READ THIS AGREEMENT CAREFULLY.

Garmin grants you a limited license to use the software embedded in this device (the “Software”) in binary executable form in the normal operation of the product. Title, ownership rights, and intellectual property rights in and to the Software remain in Garmin.

You acknowledge that the Software is the property of Garmin and is protected under the United States of America copyright laws and international copyright treaties. You further acknowledge that the structure, organization, and code of the Software are valuable trade secrets of Garmin and that the Software in source code form remains a valuable trade secret of Garmin. You agree not to decompile, disassemble, modify, reverse assemble, reverse engineer, or reduce to human readable form the Software or any part thereof or create any derivative works based on the Software. You agree not to export or re-export the Software to any country in violation of the export control laws of the United States of America.

Declaration of Conformity

Hereby, Garmin, declares that this product is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC. To view the full Declaration of Conformity, go to www.garmin.com/compliance.
# Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution/Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>My Forerunner never gets satellite signals.</td>
<td>Press <code>mode</code> &gt; select <strong>GPS</strong> &gt; <strong>GPS Status</strong>. Ensure GPS is enabled. Take your Forerunner outside and away from tall buildings. Remain stationary for several minutes.</td>
</tr>
<tr>
<td>The battery gauge does not seem accurate.</td>
<td>Allow the Forerunner to fully discharge, and then fully charge it (without interrupting the charge cycle).</td>
</tr>
<tr>
<td>The heart rate monitor, foot pod, or GSC 10 will not pair with the Forerunner.</td>
<td>Stay 10 m away from other ANT+ accessories while pairing. Bring the Forerunner within range (3 m) of the sensor while pairing. Restart the scan for the accessory (see page 37). Make sure the accessory is sending data (for example, you need to be wearing the heart rate monitor). If the problem persists, replace the battery in the accessory.</td>
</tr>
<tr>
<td>The heart rate data is inaccurate.</td>
<td>See page 38.</td>
</tr>
<tr>
<td>The heart rate monitor strap is too big.</td>
<td>A smaller elastic strap is sold separately. Go to <a href="http://buy.garmin.com">http://buy.garmin.com</a>.</td>
</tr>
<tr>
<td>My Forerunner won’t pair with compatible fitness equipment.</td>
<td>Ensure fitness equipment is enabled (page 34). Press <code>mode</code> to cycle through all menu pages until you return to the timer page. If you still cannot pair, reset both the device (page 43) and the compatible fitness equipment.</td>
</tr>
</tbody>
</table>
Appendix

### Problem Solution/Answer

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution/Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Some of my data is missing from my Forerunner.</td>
<td>The Forerunner will no longer record data if you do not transfer it to your computer. Transfer data regularly to avoid losing data.</td>
</tr>
</tbody>
</table>

### Heart Rate Zone Table

<table>
<thead>
<tr>
<th>% of Maximum Heart Rate or Resting Heart Rate</th>
<th>Perceived Exertion</th>
<th>Benefits</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 50–60%</td>
<td>Relaxed, easy pace; rhythmic breathing</td>
<td>Beginning-level aerobic training; reduces stress</td>
</tr>
<tr>
<td>2 60–70%</td>
<td>Comfortable pace; slightly deeper breathing, conversation possible</td>
<td>Basic cardiovascular training; good recovery pace</td>
</tr>
<tr>
<td>3 70–80%</td>
<td>Moderate pace; more difficult to hold conversation</td>
<td>Improved aerobic capacity; optimal cardiovascular training</td>
</tr>
<tr>
<td>4 80–90%</td>
<td>Fast pace and a bit uncomfortable; breathing forceful</td>
<td>Improved anaerobic capacity and threshold; improved speed</td>
</tr>
<tr>
<td>5 90–100%</td>
<td>Sprinting pace, unsustainable for long period of time; labored breathing</td>
<td>Anaerobic and muscular endurance; increased power</td>
