Introduction

Always consult your physician before you begin or modify any exercise program.
See the Important Safety and Product Information guide in the product box for product warnings and other important information.

Getting Started
When using your Garmin Swim for the first time, complete these tasks.

1. Select any key to turn on the device.
2. Follow the on-screen instructions.
3. Select \A, and set the pool size.
4. Go for a swim (Going for a Swim, page 1).
5. View your history (Viewing History, page 2).
6. Send your history to your computer (Sending History to Your Computer, page 2).

Training

Going for a Swim

1. Select \A.
   The first time you use the device, you are prompted to set the pool size. Each time you switch pools, you must set the pool size (Setting the Pool Size, page 3).
2. Select \A to start the timer.

History is recorded only while the timer is running. Your total distance 1 and total time 2 appear on the TOTAL page.

3. Select \A to view more swim data.
   You can customize an additional page of data fields (Data Fields, page 3).

4. When resting, select \A to pause the timer.

The paused screen includes the interval number 3, interval distance 4, and swim time for the interval 5. The screen appears inverted (Inverting the Display of the Training Pages, page 4) until you select \A and resume swimming.

5. After completing your session, select \A.
6 Select an option:
   • Select RESUME to continue swimming. The timer resumes.
   • Select SAVE to save the session to history.
   • Select DELETE to delete the session without saving.

About Distance Recording
The Garmin Swim measures and records distance by completed lengths. The pool size must be correct to display accurate distance (Setting the Pool Size, page 3).

TIP: For accurate results, swim the entire length, and use one stroke type for the entire length. Pause the timer when resting.
TIP: To help the device count your lengths, use a strong push off the wall and glide before your first stroke.
TIP: When doing drills, you must either pause the timer or use the drill logging feature. For more information about the drill logging feature, see Training with the Drill Log, page 2.

Training with the Drill Log
You can use the drill log setting to manually record kick sets, one-arm swimming, or any type of swimming that is not one of the four major strokes. The drill time is recorded, and you must enter the distance. The drill log feature can be enabled before a swim session or during a swim session with the timer paused.

1 Select 🏊‍♂️ > SWIMMING > DRILL LOG > ENABLE.
2 During your swim session, select 🕒 until the DRILL page appears.
3 Select ⏰.
   The timer records your total drill time.
4 After completing a drill interval, select ⏰.
5 Enter the drill distance.
   Distance increments are based on pool size (Setting the Pool Size, page 3).
   The drill is saved, and the timer is paused.
6 Continue your swim session.

Training with the Rest Timer
You can enable the rest timer if your training includes timed sets. For example, you want to do 12 intervals of 50 m on 55 seconds. The following training scenario is one way to use the rest timer. The rest timer can be enabled before a swim session or during a swim session with the timer paused.

1 Select 🏊‍♂️ > SWIMMING > REST TIMER > ENABLE.
2 During your swim session, select 🕒 > ⏰.
3 After completing a set of 50 m, select 🏰.

A temporary message appears showing your distance and time for the set. The rest timer page shows you the interval number 1, swim time plus rest time 2, and rest time 3.
4 Rest until the time 2 is 55 seconds.
5 Select 🏰, and swim another 50 m.
6 Repeat steps 4–6 until you complete 12 intervals.

Alert Tones
Alert tones sound when you select 🏰 during an activity.
To open the alert tones setting, select 🕒 > SWIMMING > ALERT TONES.

Swim Terminology
• A length is one trip down the pool.
• An interval is made up of one or more lengths. When you select 🏰 to rest, you create an interval.
• A stroke is counted every time your arm wearing the device completes a full cycle.
• Your swolf score is the sum of the time for one length and the number of strokes for that length. For example, 30 seconds plus 15 strokes equals a swolf score of 45. Swolf is a measurement of swimming efficiency and, like golf, a lower score is better.

Stroke Types
Stroke types appear when you are viewing interval history. You can also select stroke type as a custom data field (Data Fields, page 3).

<table>
<thead>
<tr>
<th>Stroke Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>FREE</td>
<td>Freestyle</td>
</tr>
<tr>
<td>BACK</td>
<td>Backstroke</td>
</tr>
<tr>

<td>Butterfly</td>
</tr>
<tr>
<td>MIXED</td>
<td>More than one stroke type in an interval</td>
</tr>
<tr>
<td>DRILL</td>
<td>Used with drill logging (Training with the Drill Log, page 2)</td>
</tr>
</tbody>
</table>

History
Your Garmin Swim can store approximately 30 swims based on typical use. When the memory is full, your oldest data is overwritten and a warning message appears.
NOTE: History is not recorded while the timer is stopped or paused.

Viewing History
The history displays the date, total session time, total swim time, total distance, total lengths, average pace, average stroke count, average swim efficiency, total calories, and intervals data (if used).

1 Select 🏊‍♂️ > HISTORY > VIEW.
2 Select an option:
   • Select TOTALS to view your accumulated distance, total time, and swim time. Totals appear using the current pool size.
   • Select WEEKS to view your totals for a specific week. Totals appear using the current pool size.
   • Select SESSIONS to view details for a specific session. A session appears using the pool size selected when the session was completed. You can also view interval details (if used).

Using Garmin Connect™
Garmin Connect is web-based software for storing and analyzing your data.
1 Go to www.garminconnect.com/start.
2 Follow the on-screen instructions.

Sending History to Your Computer
You must have a Garmin Connect account (Using Garmin Connect™, page 2), and you must pair the device with your computer using the USB ANT Stick™ (Sending History to Your Computer, page 3).
**Computer, page 2.** The watch cannot be in sleep mode while pairing or transferring data.

1. Plug the USB ANT Stick into a USB port on your computer. The USB ANT Stick drivers automatically install the ANT Agent™. You can download the ANT Agent if the drivers do not automatically install. Go to www.garminconnect.com/start.
2. Bring your device within range (9 ft. or 3 m) of your computer.
3. Follow the on-screen instructions.

Turning Off Computer Pairing
You can prevent transferring data to and from any computer, even a paired computer.

Select 📦 > SYSTEM > COMPUTER > DISABLE PAIRING.

Transferring All of Your Data
Before you can transfer all of your history to your computer, you must be in range of the USB ANT Stick that is connected to your computer.

Select 📦 > HISTORY > TRANSFER ALL > YES.

Deleting History
1. Select 📦 > HISTORY > DELETE.
2. Select an option:
   - Select ALL to delete all data from the history.
   - Select TOTALS to reset the distance, time, and swim time totals.
   - Select SESSIONS to select a specific session to delete.
3. Select YES.

Customizing Your Device

Setting the Pool Size
1. Select 📦 > SWIMMING > POOL SIZE.
2. Select your pool size or enter a custom size.

Customizing Your Weekly Distance
Your weekly (starting on Monday) total distance appears on the time page as DISTANCE THIS WEEK. You can change the first day or turn off weekly distance.

1. Select 📦 > SWIMMING > WEEK DISTANCE.
2. Select an option:
   - Select SET DAY 1, and select the day.
   - Select DISABLE to turn off weekly distance.

Setting the Time and Date
You can set the time of day for two time zones.

1. Select 📦 > CLOCK.
2. Select TIME 1 or TIME 2.
3. Select ON.
4. Select 12-hour or 24-hour time format.
5. Enter the time.
6. Enter the date.

Setting the Alarm
1. Select 📦 > CLOCK > ALARM.
2. Select ONCE or DAILY.
3. Enter the time.
4. Select ☐ to return to the time of day page.
   When the alarm is set, ☑ appears.

Using the Stopwatch
**NOTE:** The stopwatch does not record time, and no swim data is saved to history. Do not use the stopwatch for swimming.

1. Select 📦 > CLOCK > STOPWATCH.
2. Select ⌚ to start the timer.
3. Select ⌚ to stop the timer.
4. Select ⌚ to reset the timer.
   **NOTE:** If you leave the stopwatch page, the stopwatch automatically resets after 10 seconds.

System Settings
Select 📦 > SYSTEM.

**LANGUAGE:** Sets the device language.
**BUTTON TONES:** Sets the device to use audible tones for key presses.
**SLEEP MODE:** Turns sleep mode on or off (Sleep Mode, page 3). Turning off sleep mode reduces battery life by approximately 20%.
**COMPUTER:** Sets the device to pair with your computer using the USB ANT Stick.
**ABOUT:** Displays important software information and your unit ID.

Sleep Mode
The device goes into sleep mode if it has been motionless for one minute. This extends the battery life. As soon as you move the device again, it wakes up.

Setting Your Weight
1. Select 📦 > WEIGHT.
2. Select the units, and enter your weight.

Customizing a Training Page
You can customize page 5 in the training page loop (About the Training Pages, page 1). You can add up to three data fields on the page.

1. Select 📦 > SWIMMING > CUSTOM PAGE > ADD PAGE.
2. Select the number of data fields you want to see on the page.
3. Select a data type and a data field.
   For example, select TOTAL > LENGTHS.

Data Fields
Data fields with the * symbol display statute or metric units. The units are determined by the pool size setting (Setting the Pool Size, page 3). Interval fields display data for the current interval (when swimming) or the most recently completed interval (when paused).

**CALORIES:** Amount of total calories burned.
**DISTANCE*: Distance traveled during the current activity or interval.
**LENGLTHS:** Amount of pool lengths completed during the current activity or interval.
**PACE*: Average pace during the current activity, interval, or last length.
**STROKE RATE:** Average strokes per minute (spm) during the current activity, interval, or last length.
**STROKES:** Average number of strokes per length during the current activity, interval, or last length.
**STROKE TYPE:** Stroke type during the interval or last length.
**SWOLF:** Swolf score is the sum of the time for one length plus the number of strokes for that length (Swim Terminology, page 2). You can select a data field to display the average swolf score during the current activity, interval, or last length.
TIME ELAPSED: Total time recorded during the current activity or interval. For example, for an activity, if you swim 10 minutes, then pause the timer for 5 minutes, then start the timer again and swim for 20 minutes, your elapsed time is 35 minutes.

Inverting the Display of the Training Pages
The default appearance of the training pages is black on white while swimming and white on black (inverted) while paused.
1 Select ⊁ > SWIMMING > INVERTED SCREEN.
2 Select an option:
   • Select PAUSED to invert the screen colors when the timer is paused.
   • Select SWIMMING to invert the screen colors when the timer is running.

Device Information

Device Care

NOTICE
Avoid extreme shock and harsh treatment, because it can degrade the life of the product.
Thoroughly rinse the device with fresh water after exposure to chlorinated or salt water environments.
Do not use a sharp object to clean the device.
Avoid chemical cleaners, solvents, and insect repellents that can damage plastic components and finishes.
Always wipe the device dry after cleaning.
Do not store the device where prolonged exposure to extreme temperatures can occur, because it can cause permanent damage.

Replacing the Battery

WARNING
Do not use a sharp object to remove user-replaceable batteries.
Contact your local waste disposal department to properly recycle the batteries. Perchlorate Material – special handling may apply. Go to www.dtsc.ca.gov/hazardouswaste/perchlorate.

1 Wrap the end of a small flat screwdriver ① with tape. The tape protects the watch exterior, O-ring, and battery compartment from damage.
2 Carefully pry the battery cover ② off.
3 Remove the battery ③.
4 Make sure the O-ring ④ is not damaged and that it is completely seated in the lowest groove.
5 Tip the new battery under the two plastic tabs ⑤, and press it into place.
   Do not damage the contacts ⑥.

Troubleshooting

Resetting the Device to Factory Settings
If the device stops responding, you may need to reset it.
NOTE: This deletes all user-entered information including your history.
1 Hold ⊁, ⬇️, and ⬆️ simultaneously.
2 Select YES.
Updating the Software Using Garmin Connect
You must have a Garmin Connect account (Using Garmin Connect™, page 2), and you must pair the device with your computer using the USB ANT Stick (Sending History to Your Computer, page 2). The watch cannot be in sleep mode while pairing or transferring data.

NOTE: This deletes all user-entered information including your history.

1 Go to www.garminconnect.com.
   If new software is available, Garmin Connect alerts you to update the software.

2 Follow the on-screen instructions.

3 Keep your device in range (3 m) of the computer during the update process.

Getting More Information
You can find more information about this product on the Garmin® website.
• Go to www.garmin.com/intosports.
• Go to www.garmin.com/learningcenter.
• Go to http://buy.garmin.com, or contact your Garmin dealer for information about optional accessories and replacement parts.

Appendix

Registering Your Device
Help us better support you by completing our online registration today.
• Go to http://my.garmin.com.
• Keep the original sales receipt, or a photocopy, in a safe place.

Software License Agreement
BY USING THE DEVICE, YOU AGREE TO BE BOUND BY THE TERMS AND CONDITIONS OF THE FOLLOWING SOFTWARE LICENSE AGREEMENT. PLEASE READ THIS AGREEMENT CAREFULLY.
Garmin Ltd. and its subsidiaries (“Garmin”) grant you a limited license to use the software embedded in this device (the “Software”) in binary executable form in the normal operation of the product. Title, ownership rights, and intellectual property rights in and to the Software remain in Garmin and/or its third-party providers.
You acknowledge that the Software is the property of Garmin and/or its third-party providers and is protected under the United States of America copyright laws and international copyright treaties. You further acknowledge that the structure, organization, and code of the Software, for which source code is not provided, are valuable trade secrets of Garmin and/or its third-party providers and that the Software in source code form remains a valuable trade secret of Garmin and/or its third-party providers. You agree not to decompile, disassemble, modify, reverse assemble, reverse engineer, or reduce to human readable form the Software or any part thereof or create any derivative works based on the Software. You agree not to export or re-export the Software to any country in violation of the export control laws of the United States of America or the export control laws of any other applicable country.
