

## GTM™ 12 FM TRAFFIC RECEIVER INSTRUCTIONS

### Connecting Your GTM 12

1. Place your nüvi in the mount. Connect the power cable to external power.
2. Connect the USB plug on the GTM 12 to the USB connector on the right side of the nüvi.

3. Route the antenna on the windscreen and secure it using the suction cups. For best results, route the antenna vertically.
4. Route the GTM 12 cable so it does not interfere with vehicle operating controls.

### Service Information

When you are in an FM TMC service area in the UK, your GTM 12 receives traffic signals as soon as you connect it to the nüvi. You need to be in range of an FM station transmitting TMC (Traffic Message Channel) data to receive traffic information.

When you are outside the UK, your GTM 12 receives free FM TMC data available in the area. You can also add FM traffic subscriptions for other areas at any time. Check the Garmin Web site at [www.garmin.com/fmtraffic](http://www.garmin.com/fmtraffic) for other available services.

---

**NOTE:** The FM traffic receiver and nüvi must be in data range of an FM station transmitting TMC (Traffic Message Channel) data to receive traffic information.

---

---

**NOTE:** Garmin is not responsible for the accuracy of the traffic information. The FM traffic receiver simply receives signals from the traffic service provider and shows that information on your nüvi.

---

## Register Your GTM 12

Visit our Web site at [www.garmin.com/registration](http://www.garmin.com/registration) to register your GTM 12. Keep your original sales receipt in a safe place. The 8-digit serial number is located on the product packaging.

**Serial Number:** \_\_\_\_\_

## Product Information

Garmin's standard Limited Warranty applies to this accessory. Refer to your *nüvi 310/360 Owner's Manual* to view the warranty, warnings and cautions, FCC compliance information, and the software license agreement.

## Traffic Service End User Subscriber Agreement

The Traffic Service Provider holds the rights to the traffic incident data and RDS/TMC network through which it is delivered. You may not modify, copy, scan, or use any other method to reproduce, duplicate, republish, transmit, or distribute in any way any portion of traffic incident data. You agree to indemnify, defend, and hold harmless the Traffic Service Provider (and its affiliates) and Garmin Ltd. (and its subsidiaries) against any and all claims, damages, costs, or other expenses that arise directly or indirectly out of (a) your unauthorized use of the traffic incident data or the RDS/TMC network, (b) your violation of this End User Subscriber Agreement and/or (c) any unauthorized or unlawful activities by you in connection herewith.

The Traffic Service Data is informational only. You assume all risk of use. The Traffic Service Provider, Garmin Ltd. (and its subsidiaries), and their suppliers make no representations about content, traffic and road conditions, route usability, or speed.
