Getting Started

When using your device for the first time, you should complete these tasks to set up the device and learn about the basic features.

1 Charge the device (Charging the Device, page 8).
2 Select an option to complete the setup process with your Garmin Connect™ account:
   • Set up the device on your compatible smartphone (Pairing Your Smartphone, page 1).
   • Set up the device on your computer (Setting Up the Device On Your Computer, page 1).

NOTE: Until you complete the setup process, the device has limited functionality.
3 Synchronize your data with your Garmin Connect account (Synchronizing Your Data with the Garmin Connect Mobile App, page 1) (Synchronizing Your Data with Your Computer, page 2).

Device Overview

| Touchscreen | Swipe to scroll through features, data screens, and menus. Tap to select. |
| Device key  | Hold to lock the screen and turn the device on and off. Press to open and close the menu. Press to start and stop the timer. |

Screen Orientation

You can customize the screen orientation in the device settings on your Garmin Connect account (Device Settings on Your Garmin Connect Account, page 6). The device can display data in landscape or portrait orientation.

Touchscreen Tips

You can use the touchscreen to interact with many device features.

• Swipe left or right in landscape orientation.
• Swipe up or down in portrait orientation.
• From the time of day screen, swipe to scroll through activity tracking data and features.
• Press the device key, and swipe to scroll through menu options.
• During a timed activity, swipe to view data screens.
• Tap the touchscreen to make a selection.
• Select ☑ to return to the previous screen.
• Make each touchscreen selection a separate action.

Using the Backlight

• At any time, tap or swipe the touchscreen to turn on the backlight.

NOTE: Alerts and messages activate the backlight automatically.
• Adjust the backlight brightness (Device Settings, page 7).
• Customize the auto backlight setting (Device Settings on Your Garmin Connect Account, page 6).

Wearing the Device and Heart Rate

• Wear the vívosmart HR/HR+ device above your wrist bone.

NOTE: The heart rate sensor is located on the back of the device.
• See Tips for Erratic Heart Rate Data, page 9 for more information about wrist-based heart rate.
• For more information about the accuracy of wrist-based heart rate, go to garmin.com/ataccuracy.

Pairing and Setup

Pairing Your Smartphone

To use the connected features of the vívosmart HR/HR+ device, it must be paired directly through the Garmin Connect Mobile app, instead of from the Bluetooth® settings on your smartphone.

1 From the app store on your smartphone, install and open the Garmin Connect Mobile app.
2 Hold the device key to turn on the device.

The first time you turn on the device, you will select the device language. The next screen prompts you to pair with your smartphone.

TIP: You can press the device key to view the menu, and select § > Pair Smartphone to manually enter pairing mode.
3 Select an option to add your device to your Garmin Connect account:
   • If this is the first device you have paired with the Garmin Connect Mobile app, follow the on-screen instructions.
   • If you have already paired another device with the Garmin Connect Mobile app, from the settings menu, select Garmin Devices > Add Device, and follow on-screen instructions.

After you pair successfully, a message appears, and your device syncs automatically with your smartphone.

Synchronizing Your Data with the Garmin Connect Mobile App

Your device periodically synchronizes data with the Garmin Connect Mobile app automatically. You can also manually synchronize your data at any time.

1 Bring the device within 3 m (10 ft.) of your smartphone.
2 Press the device key to view the menu.
3 Select ☑.
4 View your current data in the Garmin Connect Mobile app.

Setting Up the Device On Your Computer

If you have not paired your vívosmart HR/HR+ device with your smartphone, you can use your computer to complete the setup process with your Garmin Connect account.
NOTE: Some device features require a paired smartphone.

1 Connect the charging clip securely to the device (Charging the Device, page 8).
2 Plug the USB cable into a USB port on your computer.
3 Go to www.garminconnect.com/vivosmartHR or www.garminconnect.com/vivosmartHRPlus.
4 Download and install the Garmin Express™ application:
   • If you are using a Windows® operating system, select Download for Windows.
   • If you are using a Mac® operating system, select Download for Mac.
5 Follow the on-screen instructions.

**Synchronizing Your Data with Your Computer**
You should synchronize your data regularly to track your progress in the Garmin Connect application.
1 Connect the device to your computer using the USB cable. The Garmin Express application synchronizes your data.
2 View your current data in the Garmin Connect application.

**Activity Tracking and Features**
Some features require a paired smartphone.

**Time and date**: Displays the current time and date. The time and date are set automatically when the device acquires satellite signals (vivosmart HR+ device only) and when you sync your device with a smartphone.

**Activity tracking**: Tracks your daily step count, floors climbed, distance traveled, calories, and intensity minutes. The move bar displays the amount of time you are inactive.

**Goals**: Displays your progress toward your activity goals. The device learns and proposes a new step goal for you each day. You can customize goals for daily steps, daily floors climbed, and weekly intensity minutes using your Garmin Connect account.

**Heart rate**: Displays your current heart rate in beats per minute (bpm) and seven-day average resting heart rate. You can tap the screen to view a graph of your heart rate.

**Notifications**: Alerts you to notifications from your smartphone, including calls, texts, social network updates, and more, based on your smartphone notification settings.

**Music controls**: Provides controls for the music player on your smartphone.

**VIRB® remote**: Provides remote controls for a paired VIRB action camera (sold separately).

**Weather**: Displays the current temperature. You can tap the screen to view a four-day weather forecast.

**Icons**
Icons represent different device features. You can swipe to scroll through the different features. Some features require a paired smartphone.

**NOTE**: You can use your Garmin Connect account to customize the screens that appear on your device (Device Settings on Your Garmin Connect Account, page 6).

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>⏰</td>
<td>The total number of steps taken for the day, your step goal for the day, and your progress toward your goal.</td>
</tr>
<tr>
<td>❤️</td>
<td>Your current heart rate and seven-day average resting heart rate in beats per minute (bpm). A flashing icon means the device is searching for a signal.</td>
</tr>
<tr>
<td>🔥</td>
<td>The amount of total calories burned for the current day, including both active and resting calories.</td>
</tr>
<tr>
<td>🌍</td>
<td>The distance traveled in kilometers or miles for the current day.</td>
</tr>
</tbody>
</table>

**Auto Goal**
Your device creates a daily step goal automatically, based on your previous activity levels. As you move during the day, the device shows your progress toward your daily goal.

If you choose not to use the auto goal feature, you can set a personalized step goal on your Garmin Connect account.

**Move Bar**
Sitting for prolonged periods of time can trigger undesirable metabolic state changes. The move bar reminds you to keep moving. After one hour of inactivity, the move bar appears. Additional segments appear after every 15 minutes of inactivity.

You can reset the move bar by walking a short distance.

**Intensity Minutes**
To improve your health, organizations such as the U.S. Centers for Disease Control and Prevention, the American Heart Association®, and the World Health Organization, recommend at least 150 minutes per week of moderate intensity activity, such as brisk walking, or 75 minutes per week of vigorous intensity activity, such as running.

The device monitors your activity intensity and tracks your time spent participating in moderate to vigorous intensity activities (heart rate data is required to quantify vigorous intensity). You can work toward achieving your weekly intensity minutes goal by participating in at least 10 consecutive minutes of moderate to vigorous intensity activities. The device adds the amount of moderate activity minutes with the amount of vigorous activity minutes. Your total vigorous intensity minutes are doubled when added.

**Earning Intensity Minutes**
Your vivosmart HR/HR+ device calculates intensity minutes by comparing your heart rate data to your average resting heart rate. If heart rate is turned off, the device calculates moderate intensity minutes by analyzing your steps per minute.

• Start a timed activity for the most accurate calculation of intensity minutes.
• Exercise for at least 10 consecutive minutes at a moderate or vigorous intensity level.
• Wear your device all day and night for the most accurate resting heart rate.

Viewing the Heart Rate Graph
The heart rate graph displays your heart rate for the last 4 hours, your lowest heart rate in beats per minute (bpm), and your highest heart rate during that 4 hour period.
1 Swipe to view the heart rate screen.
2 Tap the screen to view the heart rate graph.

Recording a Fitness Activity
You can record a timed activity, which can be saved and sent to your Garmin Connect account.
NOTE: Location settings are available for the vívosmart HR+ device only.
1 Press the device key to view the menu.
2 Select X.
3 Select an activity, such as Run or Cardio.
4 Select Outdoor (GPS) or Indoor (No GPS).
5 If your location is set to outdoor, go outside, and wait while the device locates GPS satellites.
   It may take a few minutes to locate satellite signals. When satellites are located, 🌒 appears solid.
6 Press the device key to start the timer.
7 Start your activity.
8 Swipe to view additional data screens.
   NOTE: You can use your Garmin Connect account to customize the data screens that appear (Run Options on Your Garmin Connect Account, page 7).
9 After you complete your activity, press the device key to stop the timer.
10 Select an option:
   • Press the device key to resume the timer.
   • Select ✔ to save the activity and reset the timer. A summary appears.
   • Select ✗ to delete the activity.

Broadcasting Heart Rate Data to Garmin® Devices
You can broadcast your heart rate data from your vívosmart HR/HR+ device and view it on paired Garmin devices. For example, you can broadcast your heart rate data to an Edge® device while cycling, or to a VIRB action camera during an activity.
NOTE: Broadcasting heart rate data decreases battery life.
1 Press the device key to view the menu.
2 Select ☀ > Heart Rate > Broadcast Mode > ✔. The vívosmart HR/HR+ device starts broadcasting your heart rate data, and 🌒 appears.
   NOTE: You can view only the heart rate monitoring screen while broadcasting heart rate data.
3 Pair your vívosmart HR/HR+ device with your Garmin ANT+® compatible device.
   NOTE: The pairing instructions differ for each Garmin compatible device. See your owner's manual.
   TIP: To stop broadcasting your heart rate data, tap the heart rate monitoring screen, and select ✔.

VIRB Remote
The VIRB remote function allows you to control your VIRB action camera using your device. Go to www.garmin.com/VIRB to purchase a VIRB action camera.

Controlling a VIRB Action Camera
Before you can use the VIRB remote function, you must enable the remote setting on your VIRB camera. See the VIRB Series Owner's Manual for more information. You must also enable the VIRB screen on your vívosmart HR/HR+ device (Device Settings on Your Garmin Connect Account, page 6).
1 Turn on your VIRB camera.
2 On your vívosmart HR/HR+ device, swipe to view the VIRB screen.
3 Wait while the device connects to your VIRB camera.
4 Select an option:
   • To record video, select ☀. The video counter appears on the vívosmart HR/HR+ device.
   • To stop recording video, select ☇.
   • To take a photo, select 📸.

Sleep Tracking
While you are sleeping, the device automatically detects your sleep and monitors your movement during your normal sleep hours. You can set your normal sleep hours in the user settings page for more information. You must also enable the remote setting on your Garmin Connect account. Sleep statistics include total hours of sleep, sleep levels, and sleep movement. You can view your sleep statistics on your Garmin Connect account.
NOTE: Naps are not added to your sleep statistics. You can use do not disturb mode to turn off the backlight and vibration alerts (Using Do Not Disturb Mode, page 7).

vívosmart HR Training Features
This manual is for the vívosmart HR and vívosmart HR+ models. The features described in this section apply to the vívosmart HR model only.

vívosmart HR: This device does not have GPS tracking features or location settings.

vívosmart HR+: This device has GPS tracking features and location settings.

Setting the Activity Mode
1 Press the device key to view the menu.
2 Select X.
3 Select an activity.
4 Select ☛ > Activity Mode.
5 Select an option:
   • Select Basic to record an activity without any alerts (Recording a Fitness Activity, page 3).
     NOTE: This is the default activity mode.
   • Select Time, Distance, or Calories to train toward a specific goal using duration alerts.
     TIP: You can use your Garmin Connect account to customize activity mode alerts (Run Options on Your Garmin Connect Account, page 7).
6 Select ✜.
7 Start your activity. Each time you reach the alert value, a message appears and the device vibrates.
Setting Your Heart Rate Alerts
You can set the device to alert you when your heart rate is above or below a target zone or a custom range. For example, you can set the device to alert you when your heart rate is above 180 beats per minute (bpm).

1. Press the device key to view the menu.
2. Select 🔄.
3. Select an activity.
4. Select ↓ > HR Alert.
5. Select an option:
   • To use the range of an existing heart rate zone, select a heart rate zone.
   • To use custom minimum or maximum values, select Custom.

TIP: You can use your Garmin Connect account to define custom zones (Run Options on Your Garmin Connect Account, page 7).

Each time you exceed or drop below the specified range or custom value, a message appears and the device vibrates.

Marking Laps
You can set your device to use the Auto Lap™ feature, which marks a lap automatically at every kilometer or mile. This feature is helpful for comparing your performance over different parts of an activity.

NOTE: The Auto Lap feature is not available for all activities.

1. Press the device key to view the menu.
2. Select 🔄.
3. Select an activity.
4. Select ↓ > Auto Lap > On.
5. Start your activity.

vívosmart HR+ GPS Training Features
This manual is for the vívosmart HR and vívosmart HR+ models. The features described in this section apply to the vívosmart HR+ model only.

vívosmart HR: This device does not have GPS tracking features or location settings.

vívosmart HR+: This device has GPS tracking features and location settings.

Setting the Activity Mode
1. Press the device key to view the menu.
2. Select 🔄.
3. Select an activity.
4. Select ↓ > Activity Mode.
5. Select an option:
   • Select Basic to record an activity without any alerts (Recording a Fitness Activity, page 3).
     NOTE: This is the default activity mode.
   • Select Run/Walk to train using timed running and walking intervals.
     NOTE: This mode is available for the Run activity only.
   • Select Virtual Pacer to train toward a pace goal.
     NOTE: This mode is available for the Run activity only.
   • Select Time, Distance, or Calories to train toward a specific goal using duration alerts.

TIP: You can use your Garmin Connect account to customize activity mode alerts (Run Options on Your Garmin Connect Account, page 7).

1. Start your activity.
   • Each time you reach the alert value, a message appears and the device vibrates.

Virtual Pacer™
Virtual Pacer is a training tool designed to help you improve your performance by encouraging you to run at the pace you set.

Setting Your Heart Rate Alerts
You can set the device to alert you when your heart rate is above or below a target zone or a custom range. For example, you can set the device to alert you when your heart rate is above 180 beats per minute (bpm).

1. Press the device key to view the menu.
2. Select 🔄.
3. Select an activity.
4. Select ↓ > HR Alert.
5. Select an option:
   • To use the range of an existing heart rate zone, select a heart rate zone.
   • To use custom minimum or maximum values, select Custom.

TIP: You can use your Garmin Connect account to define custom zones (Run Options on Your Garmin Connect Account, page 7).

Each time you exceed or drop below the specified range or custom value, a message appears and the device vibrates.

Marking Laps
You can set your device to use the Auto Lap™ feature, which marks a lap automatically at every kilometer or mile. This feature is helpful for comparing your performance over different parts of an activity.

NOTE: The paused time is not saved with your history data.

1. Press the device key to view the menu.
2. Select 🔄.
3. Select an activity.
4. Select ↓ > Auto Lap > On.
5. Start your activity.

Pausing Your Activity Automatically
You can use the Auto Pause™ feature to pause the timer automatically when you stop moving. This feature is helpful if your activity includes stop lights or other places where you need to stop.

NOTE: The Auto Pause feature is not available for all activities.

1. Press the device key to view the menu.
2. Select 🔄.
3. Select an activity.
4. Select ↓ > Auto Pause > On.

Improving Calorie Accuracy
The device displays an estimate of your total calories burned for the current day. You can improve the accuracy of this calculation by walking briskly or running outside for 20 minutes.

1. Swipe to view the calories screen.
2. Select 🕒.

NOTE: 🕒 appears when calories need to be calibrated. This calibration process only needs to be completed once. If you have already recorded a timed walk or run, 🕒 may not appear.
Improving Intensity Minutes Accuracy
The device calculates your time spent participating in moderate to vigorous intensity activities. You can improve the accuracy of this calculation by walking briskly or running outside for 20 minutes.

1  Swipe to view the intensity minutes screen.
2  Select \( \mathbf{1} \).
   \textit{NOTE:} \( \mathbf{1} \) appears when intensity minutes need to be calibrated. This calibration process only needs to be completed once. If you have already recorded a timed walk or run, \( \mathbf{1} \) may not appear.
3  Follow the on-screen instructions.

Acquiring Satellite Signals
The device may need a clear view of the sky to acquire satellite signals.

1  Go outdoors to an open area.
   The device key should be oriented toward the sky.
2  Wait while the device locates satellites.
   It may take 30 to 60 seconds to locate satellite signals.

Improving GPS Satellite Reception
•  Frequently sync the device to your Garmin Connect account:
   ○  Connect your device to a computer using the USB cable and the Garmin Express application.
   ○  Sync your device to the Garmin Connect Mobile app using your Bluetooth enabled smartphone.

   While connected to your Garmin Connect account, the device downloads several days of satellite data, allowing it to quickly locate satellite signals.
•  Take your device outside to an open area away from tall buildings and trees.
•  Remain stationary for a few minutes.

Personal Records
When you complete an activity, the device displays all new personal records you achieved during that activity. Personal records include your fastest time over several typical race distances and your longest run.

Viewing Your Personal Records
1  Press the device key to view the menu.
2  Select \( \mathbf{1} \) > Records.
3  Select a record.

Restoring a Personal Record
You can set each personal record back to the one previously recorded.

1  Press the device key to view the menu.
2  Select \( \mathbf{1} \) > Records.
3  Select a record to restore.
4  Select Use Previous > \( \mathbf{1} \).

Clearing a Personal Record
1  Press the device key to view the menu.
2  Select \( \mathbf{1} \) > Records.
3  Select a record.
4  Select Clear Record > \( \mathbf{1} \).
   \textit{NOTE:} This does not delete any saved activities.
NOTE: Other Bluetooth settings appear only when Bluetooth wireless technology is enabled.

Pair Smartphone: Connects your device with a compatible Bluetooth enabled smartphone. This setting allows you to use Bluetooth connected features using the Garmin Connect Mobile app, including notifications and activity uploads to Garmin Connect.

Notifications: Allows you to enable phone notifications from your compatible smartphone. You can use the Show Calls Only option to display notifications for only incoming phone calls.

Connect Alert: Allows you to enable an alert informing you when your paired smartphone is no longer within Bluetooth wireless technology range.

Display: Sets the device to display notifications in landscape or portrait format.

NOTE: This setting appears only when the device is set to display data in portrait format.

Turning Off Bluetooth Wireless Technology
1 Press the device key to view the menu.
2 Select Bluetooth > Off to turn off Bluetooth wireless technology on your vívosmart HR/HR+ device.

TIP: Refer to the owner's manual for your smartphone to turn off Bluetooth wireless technology.

History

Your device stores up to 14 days of activity tracking and heart rate monitoring data, and up to seven timed activities. You can view your last seven timed activities on your device. You can synchronize your data to view unlimited activities, activity tracking data, and heart rate monitoring data on your Garmin Connect account (Synchronizing Your Data with the Garmin Connect Mobile App, page 1) (Synchronizing Your Data with Your Computer, page 2).

When the device memory is full, your oldest data is overwritten.

Viewing History
1 Press the device key to view the menu.
2 Select 
3 Select an option:
   • On the vívosmart HR device, select an activity.
   • On the vívosmart HR+ device, select Past Activities, and select an activity.

Garmin Connect

You can connect with your friends on your Garmin Connect account. Garmin Connect gives you the tools to track, analyze, share, and encourage each other. Record the events of your active lifestyle including runs, walks, rides, swims, hikes, triathlons, and more. To sign up for a free account, go to www.garminconnect.com/start.

Track your progress: You can track your daily steps, join a friendly competition with your connections, and meet your goals.

Store your activities: After you complete and save a timed activity with your device, you can upload that activity to your Garmin Connect account and keep it as long as you want.

Analyze your data: You can view more detailed information about your activity, including time, distance, heart rate, calories burned, and customizable reports.

Customizing Your Device

Garmin Connect Settings

You can customize your device settings, activity profile settings, and user settings on your Garmin Connect account. Some settings can also be customized on your vívosmart HR/HR+ device.

• From the settings menu in the Garmin Connect Mobile app, select Garmin Devices, and select your device.
• From the devices widget in the Garmin Connect application, select Device Settings.

After customizing settings, sync your data to apply the changes to your device (Synchronizing Your Data with the Garmin Connect Mobile App, page 1) (Synchronizing Your Data with Your Computer, page 2).

Device Settings on Your Garmin Connect Account
From your Garmin Connect account, select Device Settings.

Alarm: Sets an alarm clock time and frequency for your device.

Visible Screens: Allows you to customize the screens that appear on your device.

Default Screen: Sets the home screen that appears after a period of inactivity and when you turn on your device.

Auto Backlight: Allows your device to automatically turn on the backlight when you rotate your wrist toward your body. You can customize your device to use this feature at any time, or only during a timed activity.

NOTE: This setting decreases battery life.

Activity Tracking: Turns activity tracking features on and off, such as the move alert, wrist-based heart rate monitoring, and Move IQ events.

Wrist Worn On: Allows you to customize which wrist the band is worn on. You should customize this setting for screen orientation, and when using the automatic backlight feature.

Screen Orientation: Sets the device to display data in landscape or portrait format.

Time Format: Sets the device to display time in a 12-hour or 24-hour format.

Language: Sets the device language.
Units: Sets the device to display the distance traveled in kilometers or miles.

Pace/Speed: Sets the device to display your pace or speed during a timed activity (vivosmart HR+ device only).

Run Options on Your Garmin Connect Account
From your Garmin Connect account, select Run Options.

Run Mode Alerts: Allows you to customize activity mode alerts, such as your duration alert goals.

Heart Rate Alert: Sets the device to alert you when your heart rate is above or below a target zone or custom range. You can select an existing heart rate zone or define a custom zone.

Auto Lap: Allows your device to mark laps automatically at every kilometer (mile) (Marking Laps, page 4).

Auto Pause: Allows your device to pause the timer automatically when you stop moving (vivosmart HR+ device only).

Data Fields: Allows you to customize the data screens that appear during a timed activity.

User Settings on Your Garmin Connect Account
From your Garmin Connect account, select User Settings.

Custom Step Length: Allows your device to more accurately calculate the distance traveled using your custom step length. You can enter a known distance and the number of steps it takes to cover the distance, and Garmin Connect can calculate your step length.

Daily Steps: Allows you to enter your daily step goal. You can use the Auto Goal setting to allow your device to determine your step goal automatically.

Daily Floors Climbed: Allows you to enter a daily goal for the amount of floors to climb.

Weekly Intensity Minutes: Allows you to enter a weekly goal for the number of minutes to participate in moderate to vigorous intensity activities.

Heart Rate Zones: Allows you to estimate your maximum heart rate and determine custom heart rate zones.

Device Settings
You can customize some settings on your vivosmart HR/HR+ device. Additional settings can be customized on your Garmin Connect account.

Press the device key to view the menu, and select ☰.

Language: Sets the device language.

Time: Sets the device to display time in a 12-hour or 24-hour format, and allows you to set the time manually (Setting the Time Manually, page 7).

Units: Sets the device to display the distance traveled in kilometers or miles.

Activity Tracking: Turns activity tracking and the move alert on and off.

Heart Rate: Turns wrist-based heart rate monitoring and heart rate broadcasting on and off.

Screen Preferences: Allows you to adjust the backlight brightness (Adjusting the Backlight Brightness, page 7) and automatically lock the device after a period of inactivity.

Restore Defaults: Allows you to reset user data and settings (Restoring All Default Settings, page 9).

Setting the Time Manually
By default, the time on the vivosmart HR device is set automatically when you sync your device with a smartphone. The time on the vivosmart HR+ device is set automatically when the device acquires satellite signals and when you sync your device with a smartphone. You can also set the time manually.

1. Press the device key to view the menu.
2. Select an option:
   • On the vivosmart HR device, select ☰ > Time > Set Time.
   • On the vivosmart HR+ device, select ☰ > Time > Set Time > Manual.
3. Select ▲ ▼ to adjust the time of day and date.
4. Select ✔.

Adjusting the Backlight Brightness
1. Press the device key to view the menu.
2. Select ☰ > Screen Preferences > Backlight Brightness.
3. Select ➜ or ➞ to adjust the brightness.

NOTE: The backlight brightness affects battery life.

Using Do Not Disturb Mode
You can use do not disturb mode to turn off the backlight and vibration alerts. For example, you can use this mode while sleeping or watching a movie.

NOTE: You can set your normal sleep hours in the user settings on your Garmin Connect account. The device automatically enters do not disturb mode during your normal sleep hours.

1. Press the device key to view the menu.
2. Select ☰ > On.

appears on the time of day screen.

TIP: To exit do not disturb mode, press the device key, and select ☰ > Off.

Viewing the Alarm Clock
1. Set an alarm clock time and frequency on your Garmin Connect account (Device Settings on Your Garmin Connect Account, page 6).
2. On the vivosmart HR/HR+ device, press the device key to view the menu.
3. Select ☰.

Viewing Device Information
You can view the unit ID, software version, regulatory information, and remaining battery power.

1. Press the device key to view the menu.
2. Select ☰.
### Device Care

**WARNING**

This device contains a lithium-ion battery. See the Important Safety and Product Information guide in the product box for product warnings and other important information.

**NOTICE**

To prevent corrosion, thoroughly clean and dry the contacts and the surrounding area before charging or connecting to a computer. Refer to the cleaning instructions in the appendix.

1. Align the charger posts with the contacts on the back of the device, and press the charger until it clicks.

2. Plug the USB cable into a USB port on your computer.

3. Charge the device completely.

**Tips for Charging Your Device**

- Connect the charger securely to the device to charge it using the USB cable. You can charge the device by plugging the USB cable into a Garmin approved AC adapter with a standard wall outlet or a USB port on your computer. Charging a fully depleted battery takes about 60 to 90 minutes.
- Remove the charger from the device after the battery charge level icon is full and stops flashing.
- View the remaining battery power on the device information screen (Viewing Device Information, page 7).

### Using the Device in Charging Mode

You can interact with the device while charging it with your computer. For example, you can use Bluetooth connected features or customize device settings.

1. Connect the device to your computer using the USB cable.
2. Select to exit USB mass storage mode.

### Device Care

**NOTICE**

Avoid extreme shock and harsh treatment, because it can degrade the life of the product.

Avoid pressing the keys under water. Do not use a sharp object to clean the device.

Do not remove the bands.

Avoid using a sharp object to clean the device. Avoid pressing the keys under water. Damage may result. Avoid chemical cleaners, solvents, and insect repellents that can damage plastic components and finishes. Thoroughly rinse the device with fresh water after exposure to chlorine, salt water, sunscreen, cosmetics, alcohol, or other harsh chemicals. Prolonged exposure to these substances can damage the case.

Do not store the device where prolonged exposure to extreme temperatures can occur, because it can cause permanent damage.

### Cleaning the Device

**NOTICE**

Even small amounts of sweat or moisture can cause corrosion of the electrical contacts when connected to a charger. Corrosion can prevent charging and data transfer.

1. Wipe the device using a cloth dampened with a mild detergent solution.
2. Wipe it dry. After cleaning, allow the device to dry completely.

**TIP:** For more information, go to [www.garmin.com/fitandcare](http://www.garmin.com/fitandcare).

### Troubleshooting

**Is my smartphone compatible with my device?**

The vívosmart HR/HR+ device is compatible with smartphones using Bluetooth Smart wireless technology. Go to [www.garmin.com/ble](http://www.garmin.com/ble) for compatibility information.

**My phone will not connect to the device**

- Enable Bluetooth wireless technology on your smartphone.
- On your smartphone, open the Garmin Connect Mobile app, select or •••, and select Garmin Devices > Add Device to enter pairing mode.
- Press the device key to view the menu, and select > Pair Smartphone to manually enter pairing mode.

**Activity Tracking**

For more information about activity tracking accuracy, go to [garmin.com/ataccuracy](http://garmin.com/ataccuracy).

**My step count does not seem accurate**

If your step count does not seem accurate, you can try these tips.

- Wear the device on your non-dominant wrist.
- Carry the device in your pocket when pushing a stroller or lawn mower.
- Carry the device in your pocket when actively using your hands or arms only.

**NOTE:** The device may interpret some repetitive motions, such as washing dishes, folding laundry, or clapping your hands, as steps.

**The step counts on my device and my Garmin Connect account don’t match**

The step count on your Garmin Connect account updates when you synchronize your device.

1. Select an option:
   - Synchronize your step count with the Garmin Connect application (Synchronizing Your Data with Your Computer, page 2).
   - Synchronize your step count with the Garmin Connect Mobile app (Synchronizing Your Data with the Garmin Connect Mobile App, page 1).

2. Wait while the device synchronizes your data.

**NOTE:** Refreshing the Garmin Connect Mobile app or the Garmin Connect application does not synchronize your data or update your step count.

**My intensity minutes are flashing**

When you exercise at an intensity level that qualifies toward your intensity minutes goal, the intensity minutes flash.
Exercise for at least 10 consecutive minutes at a moderate or vigorous intensity level.

The floors climbed amount does not seem accurate
Your device uses an internal barometer to measure elevation changes as you climb floors. A floor climbed is equal to 3 m (10 ft.).

- Locate the small barometer holes on the back of the device, near the charging contacts, and clean the area around the charging contacts.
  The barometer performance may be affected if the barometer holes are obstructed. You can rinse the device with water to clean the area.
- After cleaning, allow the device to dry completely.
- Avoid holding handrails or skipping steps while climbing stairs.
- In windy environments, cover the device with your sleeve or jacket as strong gusts can cause erratic readings.

Tips for Erratic Heart Rate Data
If the heart rate data is erratic or does not appear, you can try these tips.

- Clean and dry your arm before putting on the device.
- Avoid wearing sunscreen, lotion, and insect repellent under the device.
- Avoid scratching the heart rate sensor on the back of the device.
- Wear the device above your wrist bone. The device should be snug but comfortable.
- Wait until the ❌ icon is solid before starting your activity.
- Warm up for 5 to 10 minutes and get a heart rate reading before starting your activity.
  NOTE: In cold environments, warm up indoors.
- Rinse the device with fresh water after each workout.

Maximizing Battery Life

**•** Turn off the Auto Backlight setting (Device Settings on Your Garmin Connect Account, page 6).
- Decrease the backlight brightness (Device Settings, page 7).
- In your smartphone notification center settings, limit the notifications that appear on your vivosmart HR/HR+ device (Managing Notifications, page 5).
- Turn off smart notifications (Bluetooth Settings, page 5).
- Turn off Bluetooth wireless technology when you are not using connected features (Turning Off Bluetooth Wireless Technology, page 6).
- Stop broadcasting heart rate data to paired Garmin devices (Broadcasting Heart Rate Data to Garmin® Devices, page 3).
- Turn off wrist-based heart rate monitoring (Device Settings, page 7).
  NOTE: Wrist-based heart rate monitoring is used to calculate vigorous intensity minutes and calories burned.

Resetting the Device
If the device stops responding, you may need to reset it. This may result in the loss of data that has not been synced with your Garmin Connect account. You must set the time of day again (Setting the Time Manually, page 7).

1 Hold the device key for 10 seconds.
   The device turns off.
2 Hold the device key for one second to turn on the device.

Restoring All Default Settings
You can restore all of the device settings back to the factory default values.

NOTE: This deletes all user-entered information and activity history.
1 Press the device key to view the menu.
2 Select ☐ > Restore Defaults > ✅.

My device is in the wrong language
You can change the device language selection if you have accidently selected the wrong language on the device.
1 Press the device key to view the menu.
2 Select ☐.
3 Select your language.

My device does not display the correct time
The device updates the time and date when you synchronize your device to a computer or mobile device. You should synchronize your device to receive the correct time when you change time zones, and to update for daylight saving time.
1 Confirm that your computer or mobile device displays the correct local time.
2 Select an option:
   - Synchronize your device to a computer (Synchronizing Your Data with Your Computer, page 2).
   - Synchronize your device to a mobile device (Synchronizing Your Data with the Garmin Connect Mobile App, page 1).
The time and date are updated automatically.

Updating the Software Using Garmin Connect Mobile
Before you can update your device software using the Garmin Connect Mobile app, you must have a Garmin Connect account, and you must pair the device with a compatible smartphone (Pairing Your Smartphone, page 1).
1 Synchronize your device with the Garmin Connect Mobile app (Synchronizing Your Data with the Garmin Connect Mobile App, page 1).
   When new software is available, the Garmin Connect Mobile app automatically sends the update to your device.
2 Follow the on-screen instructions.

Updating the Software Using Garmin Express
Before you can update your device software, you must have a Garmin Connect account, and you must download and install the Garmin Express application.
1 Connect the device to your computer using the USB cable.
   When new software is available, Garmin Express sends it to your device.
2 Disconnect the device from your computer.
   Your device alerts you to update the software.
3 Select an option.

Product Updates
On your computer, install Garmin Express (www.garmin.com /express). On your smartphone, install the Garmin Connect Mobile app.
This provides easy access to these services for Garmin devices:
   - Software updates
   - Data uploads to Garmin Connect
Appendix

Fitness Goals
Knowing your heart rate zones can help you measure and improve your fitness by understanding and applying these principles.

- Your heart rate is a good measure of exercise intensity.
- Training in certain heart rate zones can help you improve cardiovascular capacity and strength.
- Knowing your heart rate zones can prevent you from overtraining and can decrease your risk of injury.

If you know your maximum heart rate, you can use the table (Heart Rate Zone Calculations, page 10) to determine the best heart rate zone for your fitness objectives.

If you do not know your maximum heart rate, use one of the calculators available on the Internet. Some gyms and health centers can provide a test that measures maximum heart rate. The default maximum heart rate is 220 minus your age.

About Heart Rate Zones
Many athletes use heart rate zones to measure and increase their cardiovascular strength and improve their level of fitness. A heart rate zone is a set range of heartbeats per minute. The five commonly accepted heart rate zones are numbered from 1 to 5 according to increasing intensity. Generally, heart rate zones are calculated based on percentages of your maximum heart rate.

<table>
<thead>
<tr>
<th>Zone</th>
<th>% of Maximum Heart Rate</th>
<th>Perceived Exertion</th>
<th>Benefits</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>50–60%</td>
<td>Relaxed, easy pace, rhythmic breathing</td>
<td>Beginning-level aerobic training, reduces stress</td>
</tr>
<tr>
<td>2</td>
<td>60–70%</td>
<td>Comfortable pace, slightly deeper breathing, conversation possible</td>
<td>Basic cardiovascular training, good recovery pace</td>
</tr>
<tr>
<td>3</td>
<td>70–80%</td>
<td>Moderate pace, more difficult to hold conversation</td>
<td>Improved aerobic capacity, optimal cardiovascular training</td>
</tr>
<tr>
<td>4</td>
<td>80–90%</td>
<td>Fast pace and a bit uncomfortable, breathing forceful</td>
<td>Improved anaerobic capacity and threshold, improved speed</td>
</tr>
<tr>
<td>5</td>
<td>90–100%</td>
<td>Sprinting pace, unsustainable for long period of time, labored breathing</td>
<td>Anaerobic and muscular endurance, increased power</td>
</tr>
