WARNING
Garmin® strongly recommends having an experienced installer with the proper knowledge of electrical systems install the device. Incorrectly wiring the power cable can result in damage to the vehicle or the battery and can cause bodily injury. See the Important Safety and Product Information guide in the product box for product warnings and other important information.

The device must be mounted in a suitable and secure location on your motorcycle, based on available power sources and safe cable routing.

### Motorcycle Mount Wiring Harness

- **Motorcycle cradle**
- **12 to 24 Vdc system power (red) with in-line fuse**
- **System ground (black)**

### Installing the Handlebar Base

The device includes parts for two handlebar installation solutions. Custom mounts may require additional hardware.

#### Installing the U-bolt and Handlebar Base

1. Place the U-bolt 1 around the handlebar 2, and thread the ends through the handlebar base 3.

2. Tighten the nuts to secure the base.

**Note:** The recommended torque is 50 lbf-in (5.65 N-m). Do not exceed torque of 80 lbf-in (9.04 N-m).

#### Installing the Handlebar Base to the Clutch-Clamp or Brake-Clamp Brackets

1. Remove the two factory bolts on your clutch-clamp or brake-clamp bracket 1.

2. Thread the new bolts 2 through the handlebar base, spacers 3, and clutch-clamp or brake-clamp bracket.

3. Tighten the bolts to secure the base.

**Note:** Both 1/4 in. standard and M6 bolts are included. Match the size of the factory bolts on your clutch-clamp or brake-clamp bracket.

#### Attaching the Base Plate to the Motorcycle Mount

**Notice**
Direct, sustained contact with the base plate, or any part of the motorcycle, may damage the mount over time. To prevent this kind of damage, you must place the mounting spacers between the mount and base plate, and make sure that no part of the device or mount touches the motorcycle.

1. Thread the M4 x 20 mm panhead screws 1 through the washers 2, cradle, spacers 3, and base plate 4.

2. Tighten the nuts to secure the base plate.

#### Attaching the Base Plate to the Handlebar Base

1. Align the ball of the handlebar base 1 and the ball of the base plate 2 with each end of the double-socket arm 3.
Insert each ball into the double-socket arm.

Tighten the knob slightly.

Adjust for optimal viewing and operation.

Tighten the knob to secure the mount.

Installing Your Device in the Motorcycle Mount

1. Fit the bottom of your device into the cradle.
2. Tilt the device back until it snaps into place.
3. If the latch on top of the mount stays up after you insert the device, press it down.

Removing Your Device from the Motorcycle Mount

1. Press the release button on the side of the mount.
2. Lift out the device.

Mounting Your Device in an Automobile

1. Plug the automotive power cable into the port on the mount.
2. Remove the clear plastic from the suction cup.
3. Clean and dry your windshield and the suction cup with a lint-free cloth.
4. Press the suction cup to the windshield, and flip the lever back toward the windshield.
5. Snap the cradle onto the suction cup arm.
6. Fit the bottom of your device into the cradle.
7. Tilt the device back until it snaps into place.
8. Plug the other end of the automotive power cable into a power outlet.

Getting Started

WARNING

See the Important Safety and Product Information guide in the product box for product warnings and other important information.

- Install the battery (Installing the Battery, page 3).
- Update the maps and software on your device (Product Updates, page 3).
- Mount the device and connect it to power (Installation, page 1).
- Pair your Bluetooth® phone and headset (Pairing Your Phone and Headset, page 13) (optional).
- Acquire GPS signals (Acquiring GPS Signals, page 3).
- Adjust the screen brightness (Adjusting the Screen Brightness, page 4).
- Navigate to your destination (Starting a Route, page 5).

Device Overview

NOTICE

Before mounting the device, check the local laws pertaining to windshield mounting.

WARNING

This product contains a lithium-ion battery. To prevent the possibility of personal injury or product damage caused by battery exposure to extreme heat, store the device out of direct sunlight.

Do not use the suction cup mount on a motorcycle.

See the Important Safety and Product Information guide in the product box for product warnings and other important information.
Installing the Battery
1 Rotate the battery cover D-ring counter-clockwise and remove the battery cover.

2 Locate the lithium-ion battery in the product box.
3 Insert the battery with its cable on top.
4 Insert the battery connector ① into the battery port ②.

5 Close the battery cover and secure the battery cover D-ring.

Product Updates
On your computer, install Garmin Express™ (www.garmin.com/express).
This provides easy access to these services for Garmin devices:
• Software updates
• Map updates
• Product registration

Updating Maps and Software with Garmin Express
You can use the Garmin Express application to download and install the latest map and software updates for your device.
1 If you do not have the Garmin Express application installed on your computer, go to garmin.com/express and follow the on-screen instructions to install it.
2 Open the Garmin Express application.
3 Connect your device to your computer using a USB cable.
   The small end of the cable connects to the USB port ① on your zūmo device, and the large end connects to an available USB port on your computer.

4 In the Garmin Express application, click Add a Device.
The Garmin Express application searches for your device and displays the device name and serial number.
5 Click Add Device, and follow the on-screen instructions to add your device to the Garmin Express application.
   When setup is complete, the Garmin Express application displays the updates available for your device.

6 Select an option:
   • To install all available updates, click Install All.
   • To install a specific update, click View Details, and click Install next to the update you want.
The Garmin Express application downloads and installs the updates onto your device. Map updates are very large, and this process may take a long time on slower internet connections.
   NOTE: If a map update is too large for the internal storage of the device, the software may prompt you to install a microSD™ card in your device to add storage space (Installing a Memory Card for Maps and Data, page 23).

7 Follow the on-screen instructions during the update process to finish installing updates.
   For example, during the update process, the Garmin Express application may instruct you to disconnect and reconnect your device.

Turning the Device On or Off
• To turn the device on, press the power key, or connect the device to power.
• To put the device in power saving mode, press the power key while the device is on.
   While in power saving mode, the screen is off and the device uses very little power, but it can wake instantly for use.
   TIP: You can charge your device faster by putting it in power saving mode while charging the battery.
• To turn off the device completely, hold the power key until a prompt appears on the screen, and select Off.
   The prompt appears after five seconds. If you release the power key before the prompt appears, the device enters power saving mode.

Acquiring GPS Signals
When you turn on your navigation device, the GPS receiver must collect satellite data and establish the current location.  in the status bar indicates the satellite signal strength. The time required to acquire satellite signals varies based on several factors, including how far you are from the location where you last used your navigation device, whether you have a clear view of the sky, and how long it has been since you last used your navigation device. The first time you turn on your navigation device, it may take several minutes to acquire satellite signals.
1 Turn on the device.
Before you can adjust the volume, you must connect your device to a powered mount or a headset using Bluetooth wireless technology.

1. Select **Volume**.
2. Select an option:
   - Use the slider bar to adjust the volume.
   - Select \( \) to mute the device.
   - Select \( \) for additional options.

### Adjusting the Volume

Routing and navigation are calculated differently based on your transportation mode. The current transportation mode is indicated by an icon in the status bar.

- **Automobile mode**
- **Motorcycle mode**
- **Off-road mode**

### Status Bar Icons

The status bar is located at the top of the main menu. The status bar icons display information about features on the device. You can select some icons to change settings or view additional information.

- **GPS signal status**: Hold to view GPS accuracy and acquired satellite information (Viewing GPS Signal Status, page 23).
- **Bluetooth technology status**: Select to view the Bluetooth settings (Bluetooth Settings, page 20).
- **Connected to hands-free calling**: Select to place a phone call (Hands-Free Calling, page 16).
- **Active vehicle profile**: Select to view the vehicle profile settings.
- **Current time**: Select to set the time (Setting the Time, page 20).
- **Battery charge level**.
- **Connected to the Smartphone Link app**: Select to view connected device and subscription information (Pairing Your Phone and Headset, page 13).
- **Temperature**: Select to view the weather forecast (Viewing the Weather Forecast, page 19).
- **Fuel status**: Select to view fuel tracking information.

### Using the On-Screen Buttons

On-screen buttons allow you to navigate the pages, menus, and menu options on your device.

- Select \( \) to return to the previous menu screen.
- Hold \( \) to quickly return to the main menu.
- Select \( \) or \( \) to scroll through lists or menus.
- Hold \( \) or \( \) to scroll faster.
- Select \( \) to see a context-based menu of options for the current screen.

### Adjusting the Screen Brightness

1. Select **Settings > Display > Brightness**.
2. Use the slider bar to adjust the brightness.

### Choosing a Transportation Mode

Select \( \).

### Using the On-Screen Keyboard

See "Language and Keyboard Settings" to change the keyboard layout (Language and Keyboard Settings, page 21).

- Select \( \) to delete a search entry.
- Select \( \) to delete a character.
- Select \( \) to change the keyboard language mode.
- Select \( \) to enter special characters, such as punctuation marks.
- Select \( \) to change character capitalization.

### Using the Large Button Keyboard

You can enable additional keyboard languages or layouts in the language and keyboard settings (Language and Keyboard Settings, page 21).

- Select \( \) or \( \) to view more characters.
- Select \( \) to switch to other keyboard languages and layouts.

### Rider Awareness Features and Alerts

**NOTICE**

The rider alerts and speed limit features are for information only and do not replace your responsibility to abide by all posted speed limit signs and to use safe driving judgment at all times. Garmin is not responsible for any traffic fines or citations you receive for failing to follow all applicable traffic laws and signs.

Your device provides features that can help encourage safer riding and increase efficiency, even when you are riding in a familiar area. The device plays an audible tone or message and displays information for each alert. You can enable or disable the audible tone or message for each type of alert. Not all alerts are available in all areas.

- **School zone or nearby school**: The device plays a tone and displays the distance to and speed limit (if available) for an upcoming school or school zone.
- **Speed limit reduction**: The device plays a tone and displays the upcoming reduced speed limit so you can be prepared to reduce your speed.
- **Speed limit exceeded**: The device plays a tone and displays a red border on the speed limit icon when you exceed the posted speed limit for the current road.
- **Railroad crossing**: The device plays a tone and displays the distance to an upcoming railroad crossing.
- **Animal crossing**: The device plays a tone and displays the distance to an upcoming animal crossing area.
- **Curve**: The device plays a tone and displays the distance to a curve in the road.
- **Slower traffic**: The device plays a tone and displays the distance to slower traffic when you approach slower traffic at a higher speed. Your device must be receiving traffic information to use this feature (Receiving Traffic Data Using Smartphone Link, page 16).

**Fatigue warning**: The device plays a tone and suggests upcoming rest stops after you have been driving for more than two hours without stopping.

### Enabling or Disabling Rider Alerts

You can turn off individual audible rider alerts. Visual alerts appear even when the audible alert is disabled.

1. Select **Settings > Map & Vehicle > Audible Rider Alerts**.
2. Select or clear the check box next to each alert.
Red Light and Speed Cameras

**NOTICE**
Garmin is not responsible for the accuracy of or the consequences of using a red light or speed camera database.

**NOTE:** This feature is not available for all regions or product models.

Information about red light and speed camera locations is available in some areas for some product models. Go to garmin.com/speedcameras to check availability and compatibility, or to purchase a subscription or one-time update. You can purchase a new region or extend an existing subscription at any time.

You can go to mygarmin.com to update the camera database on your device. You should update your device frequently to receive the most up-to-date camera information.

For some devices and regions, basic red light or speed camera data may be included with your device. Included data does not include updates or a subscription.

Viewing Helmet Law Notifications
Helmet law and eye protection notifications may appear on your zumo device the first time your device acquires satellites and when your device approaches a location with motorcycle safety rules.

**NOTICE**
Garmin recommends that all riders wear helmets for safety. Helmet law notifications are for reference only, are subject to change, and are not intended to be considered legal advice. Helmet law notifications are available in the U.S. and Canada only.

Select the notification to view more details.

Searching for Helmet Laws
You can search for helmet laws by state or province.

1. Select Apps > Helmet Guide.
2. Select a state or province.

Navigating to Your Destination

Routes
A route is a path from your current location to one or more destinations.

- The device calculates a recommended route to your destination based on the preferences you set, including the route calculation mode (Changing the Route Calculation Mode, page 5) and avoidances (Avoiding Delays, Tolls, and Areas, page 8).

- The device can automatically avoid roads that are not appropriate for the active vehicle profile.

- You can start navigating to your destination quickly using the recommended route, or you can select an alternate route (Starting a Route, page 5).

- If there are specific roads you need to use or avoid, you can customize the route (Shaping Your Route, page 6).

- You can add multiple destinations to a route (Adding a Location to Your Route, page 6).

Starting a Route

1. Select Where To?, and search for a location (Finding and Saving Locations, page 9).
2. Select a location.
3. Select Go!.

4. Select an option:
   - To start navigating using the recommended route, select Go!.
   - To choose an alternate route, select \( \mathcal{v} \), and select a route. Alternate routes appear to the right of the map.
   - To edit the course of the route, select \( \mathcal{v} > \text{Edit Route} \), and add shaping points to the route (Shaping Your Route, page 6).

   The device calculates a route to the location and guides you using voice prompts and information on the map (Your Route on the Map, page 6). A preview of the major roads in your route appears at the edge of the map for several seconds.

   If you need to stop at additional destinations, you can add the locations to your route (Adding a Location to Your Route, page 6).

Changing the Route Calculation Mode

2. Select an option:
   - Select Faster Time to calculate routes that are faster to drive but can be longer in distance.
   - Select Adventurous Route to calculate routes that prefer curvy roads.
   - Select Off Road to calculate point-to-point routes (without roads).
   - Select Shorter Distance to calculate routes that are shorter in distance but can take more time to drive.

Taking a Route Using Adventurous Routing

Your device can calculate routes that prefer curvy roads, hills, and fewer highways. This feature can provide a more enjoyable ride, but it may increase the time or distance to your destination.

**NOTE:** This feature is not available on all device models or for all map regions.

1. Select Settings > Navigation > Calculation Mode > Adventurous Route > Save.
2. Select Adventurous Route Settings.
3. Use the \( \mathcal{v} \) slider to include more or fewer curves.
4. Use the \( \mathcal{v} \) slider to include more or fewer hills.
5. Use the \( \mathcal{v} \) slider to include more or fewer highways.
6. Start a route (Starting a Route, page 5).

Creating a Round-Trip Route

The device can create a round-trip route using a specified starting location and a distance, duration, or destination.

1. From the home screen, select Apps > Round Trip.
2. Select Start Location.
3. Select a location, and select Select.
4. Select Trip Attributes.
5. Select an option:
   - Select Choose a Distance to plan your route by distance.
   - Select Choose a Duration to plan your route based on time.
   - Select Choose a Destination to plan your route based on a specified location.
6. Enter a distance, duration, or destination.
7. Select an option:
   - If you entered a distance or duration, select Done > Calculate.
   - If you selected a destination, select Select.
8. Select a route, and select Go!.
Starting a Route by Using the Map
You can start route by selecting a location from the map.

1. Select View Map.
2. Drag and zoom the map to display the area to search.
3. If necessary, select Q to filter the displayed points of interest by category.
   Location markers (orious or a blue dot) appear on the map.
4. Select an option:
   • Select a location marker.
   • Select a point, such as a street, intersection, or address location.
5. Select Go!

Going Home
The first time you start a route home, the device prompts you to enter your home location.
1. Select Where To? > Go Home.
2. If necessary, enter your home location.

Editing Your Home Location
1. Select Where To? > > Set Home Location.
2. Enter your home location.

Your Route on the Map
As you travel, the device guides you to your destination using voice prompts and information on the map. Instructions for your next turn or exit, or other actions appear across the top of the map.

Viewing Turns and Directions
While navigating a route, you can view upcoming turns, lane changes, or other directions for your route.
1. From the map, select an option:
   • To view upcoming turns and directions as you navigate, select > Turns.
     The map tool displays the next four turns or directions beside the map. The list updates automatically as you navigate the route.
   • To view the complete list of turns and directions for the entire route, select the text bar at the top of the map.
2. Select a turn or direction (optional).
   Detailed information appears. An image of the junction may appear for junctions on major roadways, if available.

Viewing the Entire Route on the Map
1. While navigating a route, select anywhere on the map.
2. Select .

Adding a Location to Your Route
Before you can add a location to your route, you must be navigating a route (Starting a Route, page 5).
You can add locations to the middle or end of your route. For example, you can add a fuel station as the next destination in your route.

TIP: To create complex routes with multiple destinations or scheduled stops, you can use the trip planner to plan, schedule, and save a trip (Planning a Trip, page 7).
1. From the map, select > Where To?.
2. Search for a location (Finding and Saving Locations, page 9).
3. Select a location.
4. Select Go!.
5. Select an option:
   • To add the location as the next destination in your route, select Add As Next Stop.
   • To add the location to the end of your route, select Add As Last Stop.
   • To add the location and edit the order of destinations in your route, select Add to Active Route.

The device re-calculates the route to include the added location and guides you to the destinations in order.

Shaping Your Route
Before you can shape your route, you must start a route (Starting a Route, page 5).
You can manually shape your route to change its course. This allows you to direct the route to use a certain road or go through a certain area without adding a destination to the route.
1. Touch anywhere on the map.
2. Select .
   The device enters route shaping mode.
3. Select a location on the map.
Navigating to a Saved Trip

You can take a detour for a specified distance along your route or detour around specific roads. This is useful if you encounter construction zones, closed roads, or poor road conditions.

1. From the map, select \(\Rightarrow\) > Change Route.

TIP: If the Change Route tool is not in the map tools menu, you can add it (Enabling Map Tools, page 12).

2. Select an option:
   - To detour your route for a specific distance, select Detour by Distance.
   - To detour around a specific road on the route, select Detour by Road.
   - To find a new route, select Detour.

Stopping the Route

From the map, select \(\Rightarrow\) > Stop.

Taking a Detour

You can take a detour for a specified distance along your route or detour around specific roads. This is useful if you encounter construction zones, closed roads, or poor road conditions.

1. From the map, select \(\Rightarrow\) > Change Route.

TIP: If the Change Route tool is not in the map tools menu, you can add it (Enabling Map Tools, page 12).

2. Select an option:
   - To detour your route for a specific distance, select Detour by Distance.
   - To detour around a specific road on the route, select Detour by Road.
   - To find a new route, select Detour.

Optimizing the Order of Destinations in a Trip

The device can automatically optimize the order of destinations in your trip to create a shorter, more efficient route. The starting location and final destination are not changed when you optimize the order.

While editing a trip, select \(\Rightarrow\) > Optimize Order.

Editing and Reordering Locations in a Trip

1. Select Apps > Trip Planner.
2. Select a saved trip.
3. Select a location.
4. Select an option:
   - To move the location up or down, select \(\Rightarrow\), and drag the location to a new position in the trip.
   - To add a new location after the selected location, select \(\Rightarrow\).
   - To remove the location, select \(\Rightarrow\).

Editing and Saving Your Active Route

If a route is active, you can use the trip planner to edit and save your route as a trip.

1. Select Apps > Trip Planner > My Active Route.
2. Edit your route using any of the trip planner features.
   - The route recalculates each time you make a change.
3. Select Save to save your route as a trip, which you can navigate again later (optional).

Changing Routing Options for a Trip

You can customize how the device calculates the route when you start your trip.

1. Select Apps > Trip Planner.
2. Select a saved trip.
3. Select the vehicle profile icon, and select the vehicle you plan to use while navigating the trip (optional).
4. Select \(\Rightarrow\) > Trip Settings.
5. Select an option:
   - To add shaping points to your trip, select Shape Route, and follow the on-screen instructions (Shaping Your Route, page 6).
   - To change the calculation mode for the trip, select Route Preference (Changing the Route Calculation Mode, page 5).

When you start navigating the trip, the device automatically switches to the selected vehicle profile.

Scheduling a Trip

You can add scheduling information to each location in your trip, including the desired arrival time and layover duration at each location. This can help you plan your departure to reach locations in your trip on time.

1. Select Apps > Trip Planner.
2. Select a trip.
3. Select \(\Rightarrow\) > Trip Settings > Edit Schedule.
4. Select a location, and follow the on-screen instructions to enter the schedule information.

TIP: If you need to schedule multiple locations in the trip, you should start from the beginning of the trip and work toward the end.
5. Repeat step 4 to enter schedule information for additional locations.
6. When finished, select Save.

When you navigate the trip, you should depart by the time shown under the starting point to reach your stops and destinations by the scheduled time. The schedule is an estimate...
Avoiding Toll Stickers

Privacy Settings

location and enable the travel history feature

Using Suggested Routes

Before you can use this feature, you must save at least one location and enable the travel history feature (Device and Privacy Settings, page 21).

Using the myTrends™ feature, your device predicts your destination based on your travel history, the day of the week, and the time of day. After you have driven to a saved location several times, the location may appear in the navigation bar on the map, along with the estimated time of travel, and traffic information.

Select the navigation bar to view a suggested route to the location.

Avoiding Delays, Tolls, and Areas

Avoiding Traffic Delays on Your Route

Before you can avoid traffic delays, you must be receiving traffic information (Receiving Traffic Data Using Smartphone Link, page 16).

By default, the device optimizes your route to avoid traffic delays automatically. If you have disabled this option in the traffic settings (Traffic Settings, page 20), you can view and avoid traffic delays manually.

1. While navigating a route, select Traffic.
2. Select Alternate Route, if available.
3. Select Go!

Avoiding Toll Roads

Your device can avoid routing you through areas that require tolls, such as toll roads, toll bridges, or congestion areas. The device may still include a toll area in your route if no other reasonable routes are available.

2. Select an option:
   - NOTE: The menu changes based on your area and the map data on your device.
   - Select Toll Roads.
   - Select Tolls and Fees > Toll Roads.
3. Select an option:
   - To be asked each time before routing through a toll area, select Always Ask.
   - To always avoid tolls, select Avoid.
   - To always allow tolls, select Allow.
4. Select Save.

Avoiding Toll Stickers

NOTE: This feature is not available in all areas.

The map data on your device may contain detailed toll sticker information for some countries. You can avoid or allow toll stickers for each country.

2. Select a country.

3. Select an option:
   - To be asked each time before routing through a toll area, select Always Ask.
   - To always avoid tolls, select Avoid.
   - To always allow tolls, select Allow.
4. Select Save.

Avoiding Road Features

Custom Avoidances

Custom avoidances allow you select specific areas or sections of road to avoid. When the device calculates a route, it avoids these areas and roads unless no other reasonable route is available.

Avoiding a Road

2. Select Add Avoid Road.
3. Select the starting point of the section of road to avoid, and select Next.
4. Select the ending point of the road section, and select Next.
5. Select Done.

Avoiding an Area

2. If necessary, select Add Avoidance.
3. Select Add Avoid Area.
4. Select the upper-left corner of the area to avoid, and select Next.
5. Select the lower-right corner of the area to avoid, and select Next.
   The selected area is shaded on the map.
6. Select Done.

Disabling a Custom Avoidance

You can disable a custom avoidance without deleting it.

2. Select an avoidance.
3. Select Disable.

Deleting Custom Avoidances

2. Select an option:
   - To delete all custom avoidances, select .
   - To delete one custom avoidance, select the avoidance, and select Delete.

Navigating Off Road

If you are not following roadways as you navigate, you can use Off Road mode.

2. Select Calculation Mode > Off Road > Save.
   The next route will be calculated as a straight line to the location.

Fuel Tracking

You can set your device to estimate your fuel usage, warn you when you approach the maximum estimated fuel distance, and suggest fuel stops based on your estimated fuel range. When fuel tracking is enabled, indicates the current fuel status.

White: Fuel tracking is disabled, or the device is not connected to the motorcycle mount.
Enabling Dynamic Fuel Stops

Setting a Low Fuel Warning
You can set the device to warn you when the tank is low on fuel.

NOTE: The estimated fuel range.

You can set the device to suggest fuel stops based on your tracking must be enabled.

Before you can enable fuel tracking, the device must be in motorcycle mode, placed in the motorcycle mount.

When you enable fuel tracking, a fuel gauge appears on the trip computer (Viewing the Trip Information Page, page 12).

1 Fill your fuel tank.
2 Select Apps > Fuel Settings > Fuel Tracking.
3 Select Distance Per Tank.
4 Enter the distance the vehicle travels on a tank of gas and select Done.

Setting a Low Fuel Warning
You can set the device to warn you when the tank is low on fuel.

NOTE: The device must be connected to the motorcycle mount to give low fuel warnings.

1 Enable fuel tracking (Enabling Fuel Tracking, page 9).
2 Select Fuel Tank Warning.
3 Enter a distance, and select Done.
When you have only enough fuel left to travel the distance you entered, a low fuel warning appears on the map page.

Reseting the Fuel Tank Mileage
When you refill your fuel tank, you should reset the fuel tank mileage on your device to more accurately track your remaining fuel.

Select Apps > Fuel Settings > Reset Fuel Tank.

Enabling Dynamic Fuel Stops
Before you can enable dynamic fuel stops, the device must be in motorcycle mode or off road mode and placed in the motorcycle mount.

You can set the device to suggest fuel stops based on your estimated fuel range.

Select Apps > Fuel Settings > Dynamic Fuel Stops.

Finding and Saving Locations
The maps loaded in your device contain locations, such as restaurants, hotels, auto services, and detailed street information. The Where To? menu helps you find your destination by providing several methods to browse, search, and save this information.

• Enter search terms to quickly search all location information (Finding a Location Using the Search Bar, page 9).
• Browse or search pre-loaded points of interest by category (Points of Interest, page 9).
• Search and check into Foursquare® points of interest (Searching Foursquare Points of Interest, page 10).
• Use search tools to find specific locations, such as addresses, intersections, or geographic coordinates (Search Tools, page 10).
• Search near a different city or area (Changing the Search Area, page 9).
• Save your favorite locations to find them quickly in the future (Saving Locations, page 11).
• Return to recently found locations (Viewing Recently Found Locations, page 10).

Finding a Location Using the Search Bar
You can use the search bar to search for locations by entering a category, brand name, address, or city name.

1 Select Where To?.
2 Select Enter Search in the search bar.
3 Enter all or part of the search term.
   Suggested search terms appear below the search bar.
4 Select an option:
   • To search for a type of business, enter a category name (for example, "movie theaters").
   • To search for a business name, enter all or part of the name.
   • To search for an address near you, enter the house number and street name.
   • To search for an address in another city, enter the house number, street name, city, and state.
   • To search for a city, enter the city and state.
   • To search for coordinates, enter latitude and longitude coordinates.
5 Select an option:
   • To search using a suggested search term, select the term.
   • To search using the text you entered, select Q.
6 If necessary, select a location.

Viewing Search Results on the Map
You can view the results of a location search on the map instead of in a list.

1 From the location search results, select A.
   The nearest location in your search results appears on the map. B indicates the locations of other search results.
2 Select one or more options:
   • To view more search results, touch and drag the map.
   • To select another location, select Q.
   • To view details and routes for the selected location, select the location description at the bottom of the map.
   • To start navigation to the selected location, select Go!

Changing the Search Area
By default, the device searches near your current location. You can also search other areas, such as near your destination, near another city, or along your active route.

1 From the main menu, select Where To?.
2 Select Q.
3 Select an option.

Points of Interest
A point of interest is a place that you may find useful or interesting. Points of interest are organized by category and can include popular travel destinations such as gas stations, restaurants, hotels, and entertainment venues.

Finding a Location by Category
1 Select Where To?.
2 Select a category, or select Categories.
3 If necessary, select a subcategory.
4 Select a location.

Searching Within a Category
After you have performed a search for a point of interest, certain categories may display a Quick Search list that shows the last four destinations you selected.

1 Select Where To? > Categories.
Navigating to Points of Interest Within a Venue
You can create a route to a point of interest (POI) within a larger venue, such as a store in a shopping mall or a specific terminal in an airport.

1. Select Where To? > Enter Search.
2. Select an option:
   • To search for the venue, enter the name or address of the venue, select Q, and go to step 3.
   • To search for the POI, enter the name of the POI, select Q, and go to step 5.
3. Select the venue.
   A list of categories appears below the venue, such as restaurants, car rentals, or terminals.
4. Select a category.
5. Select the POI, and select Go!.

The device creates a route to the parking area or venue entrance closest to the POI. When you arrive at the destination, a checkered flag indicates the recommended parking area. A labeled point indicates the location of the POI within the venue.

Exploring a Venue
You can view a list of all points of interest located within each venue.

1. Select a venue.
2. Select \( \text{Explore this Venue} \).

Foursquare
Foursquare is a location-based social network. Your device includes pre-loaded Foursquare points of interest, which are indicated by the Foursquare logo in your location search results.

For additional features, you can connect to your Foursquare account using Smartphone Link on your compatible smartphone. When you connect to your Foursquare account using Smartphone Link, you can view Foursquare location details, check in to a location, and search for points of interest in the online Foursquare database.

Searching Foursquare Points of Interest
You can search for Foursquare points of interest loaded on your device. When you connect to your Foursquare account using Smartphone Link, the search provides the most up-to-date results from the online Foursquare database and customized results from your Foursquare user account.

Select Where To? > Categories > Foursquare.

Connecting to Your Foursquare Account
1. Connect your device to Smartphone Link (Pairing Your Phone and Headset, page 13).
2. On your smartphone, open the Smartphone Link app.
3. Open the Smartphone Link app settings, and select Foursquare > Login.
4. Enter your Foursquare login information.

Viewing Foursquare Location Details
Before you can view Foursquare location details, you must connect to a supported phone running Smartphone Link and log in to your Foursquare account.

You can view detailed Foursquare location information, such as user ratings, restaurant pricing information, and hours of operation.

1. From the location search results, select a Foursquare point of interest.
2. Select \( \text{Check In} \).

Checking in with Foursquare
Before you can check in with Foursquare, you must connect to a supported phone running Smartphone Link and log in to your Foursquare account.

1. Select Apps > Foursquare > Check In.
2. Select a point of interest.
3. Select \( \text{Check In} \).

Search Tools
Search tools allow you to search for specific types of locations by responding to on-screen prompts.

Finding an Address
NOTE: The order of the steps may change depending on the map data loaded on your device.

1. Select Where To?.
2. If necessary, select Searching Near to change the search area (Changing the Search Area, page 9).
3. Select Address.
4. Follow the on-screen instructions to enter address information.
5. Select the address.

Finding an Intersection
You can search for an intersection or junction between two streets, highways, or other roads.

2. Follow the on-screen instructions to enter street information.
3. Select the intersection.

Finding a City
2. Select an option:
   • Select a city from the list of nearby cities.
   • To search near another location, select Searching Near (Changing the Search Area, page 9).
   • To search for a city by name, select Enter Search, enter a city name, and select Q.

Finding a Location Using Coordinates
You can find a location using latitude and longitude coordinates. This can be helpful when geocaching.

2. If necessary, select \( \text{Change Coordinates} \), and change the coordinate format or datum.
3. Enter the latitude and longitude coordinates.
4. Select View on Map.

Viewing Recently Found Locations
Your device stores a history of the last 50 locations you have found.

Select Where To? > Recent.

Clearing the List of Recently Found Locations
Select Where To? > Recent > \( \text{Clear} \) > Yes.
Finding Your Last Parking Spot
When you disconnect the device from vehicle power while the device is on, your current location is saved as a parking spot.

   Select Apps > Last Spot.

Viewing Current Location Information
You can use the Where Am I? page to view information about your current location. This feature is helpful if you need to tell emergency personnel your location.

   From the map, select the vehicle.

Finding Emergency Services and Fuel
You can use the Where Am I? page to find the nearest hospitals, police stations, and fuel stations.

1 From the map, select the vehicle.
2 Select Hospitals, Police Stations, Fuel, or Roadside Assist.

NOTE: Some service categories are not available in all areas.

A list of locations for the selected service appears, with the nearest locations at the top.
3 Select a location.
4 Select an option:
   • To navigate to the location, select Go!.
   • To view the phone number and other location details, select .

Getting Directions to Your Current Location
If you need to tell another person how to get to your current location, your device can give you a list of directions.

1 From the map, select the vehicle.
2 Select > Directions to Me.
3 Select a starting location.
4 Select Select.

Adding a Shortcut
You can add shortcuts to the Where To? menu. A shortcut can point to a location, a category, or a search tool.

The Where To? menu can contain up to 36 shortcut icons.
1 Select Where To? > Add Shortcut.
2 Select an item.

Removing a Shortcut
1 Select Where To? > > Remove Shortcut(s).
2 Select a shortcut to remove.
3 Select the shortcut again to confirm.
4 Select Save.

Saving Locations
Saving a Location
1 Search for a location (Finding a Location by Category, page 9).
2 From the search results, select a location.
3 Select .
4 Select Save.
5 If necessary, enter a name, and select Done.

Saving Your Current Location
1 From the map, select the vehicle icon.
2 Select Save.
3 Enter a name, and select Done.
4 Select OK.

Editing a Saved Location
1 Select Where To? > Saved.
2 If necessary, select a category.
3 Select a location.
4 Select .
5 Select > Edit.
6 Select an option:
   • Select Name.
   • Select Phone Number.
   • Select Categories to assign categories to the saved location.
   • Select Change Map Symbol to change the symbol used to mark the saved location on a map.
7 Edit the information.
8 Select Done.

Assigning Categories to a Saved Location
You can add custom categories to organize your saved locations.

NOTE: Categories appear in the saved locations menu after you have saved at least 12 locations.
1 Select Where To? > Saved.
2 Select a location.
3 Select .
4 Select > Edit > Categories.
5 Enter one or more category names, separated by commas.
6 If necessary, select a suggested category.
7 Select Done.

Deleting a Saved Location
NOTE: Deleted locations cannot be recovered.
1 Select Where To? > Saved.
2 Select > Delete Saved Places.
3 Select the box next to the saved locations to delete, and select Delete.

Sharing a Saved Location
After you save a location, you can share it with other compatible Garmin devices using Bluetooth wireless technology or a memory card.

1 Select Where To? > Saved.
2 If necessary, select a category.
3 Select a location.
4 Select .
5 Select > Share.
6 Follow the on-screen instructions to share location information.

Using the Map
You can use the map to navigate a route (Your Route on the Map, page 6) or to view a map of your surroundings when no route is active.

1 Select View Map.
2 Touch anywhere on the map.
3 Select an option:
   • Drag the map to pan left, right, up, or down.
   • To zoom in or out, select + or –.
   • To switch between North Up and 3-D views, select .
Map Tools

Map tools provide quick access to information and device functions while you view the map. When you activate a map tool, it appears in a panel at the edge of the map.

Stop: Stops navigation of the active route.
Change Route: Allows you to take a detour or skip locations in your route.
Up Ahead: Displays upcoming locations along the route or the road on which you are traveling (Up Ahead, page 12).
Turns: Displays a list of upcoming turns in your route (Viewing Turns and Directions, page 6).
Trip Data: Displays customizable trip data, such as speed or mileage (Viewing Trip Data from the Map, page 12).
Volume: Adjusts the master audio volume.
Brightness: Adjusts the screen brightness.
Phone: Displays a list of recent phone calls from your connected phone, and displays in-call options while a phone call is active (Using In-Call Options, page 16).
Traffic: Displays traffic conditions along your route or in your area (Viewing Upcoming Traffic, page 12).
Weather: Displays weather conditions for your area.
photoLive: Displays live traffic cameras from your photoLive subscription (photoLive Traffic Cameras, page 19).
Report Camera: Allows you to report a speed or red light camera. This tool is available only when you have speed or red light camera data on your device and you have an active connection to the Smartphone Link app (Paireing Your Phone and Headset, page 13).

Viewing a Map Tool
1. From the map, select ⟩.
2. Select a map tool.
   The map tool appears in a panel at the edge of the map.
3. When you are done using the map tool, select ✗.

Enabling Map Tools
By default, only the most commonly used map tools are enabled in the map tools menu. You can add up to 12 tools to the menu.
1. From the map, select ⟩ > 📚.
2. Select the check box next to each tool to add.
3. Select Save.

Up Ahead
The Up Ahead tool provides information about upcoming locations along your route or the road on which you are traveling. You can view upcoming points of interest, such as restaurants, fuel stations, or rest areas. When traveling on a highway, you can also view information and available services for upcoming exits and cities, similar to the information on highway road signs.

You can customize three categories to show in the Up Ahead tool.

Viewing Upcoming Locations
1. From the map, select ⟩ > Up Ahead.
2. Select an option:
   • To view the next upcoming location in each category, select 📚, if necessary.
   • To view information and available services for upcoming highway exits or cities, select 🏛.

NOTE: This option is available only while you are traveling on a highway or when your route includes a highway.

3. Select an item to view a list of locations for that category, exit, or city.

Customizing the Up Ahead Categories
You can change the location categories that appear in the Up Ahead tool.
1. From the map, select ⟩ > Up Ahead.
2. Select a category.
3. Select ⟩.
4. Select an option:
   • To move a category up or down in the list, select and drag the arrow next to the category name.
   • To change a category, select the category.
   • To create a custom category, select a category, select Custom Search, and enter the name of a business or category.
5. Select Done.

Trip Information

Viewing Trip Data from the Map
Before you can view trip data on the map, you must add the tool to the map tools menu (Enabling Map Tools, page 12).

   From the map, select ⟩ > Trip Data.

Customizing the Trip Data Fields
Before you can customize the data that appears in the trip data map tool, you must add the trip data tool to the map tools menu (Enabling Map Tools, page 12).
1. From the map, select ⟩ > Trip Data.
2. Select a trip data field.
3. Select an option.
   The new trip data field appears in the trip data map tool.

Viewing the Trip Information Page
The trip information page displays your speed and provides statistics about your trip.

NOTE: If you make frequent stops, leave the device turned on, so it can accurately measure elapsed time during the trip.

   From the map, select Speed.

Viewing the Trip Log
Your device keeps a trip log, which is a record of the path you have traveled.

   2. Select the Trip Log check box.

Resetting Trip Information
1. From the map, select Speed.
2. Select ⏹️ > Reset Field(s).
3. Select an option:
   • When not navigating a route, select Select All to reset every data field except the speedometer, on the first page.
   • Select Reset Trip Data to reset the information on the trip computer.
   • Select Reset Max. Speed to reset the maximum speed.
   • Select Reset Trip B to reset the odometer.

Viewing Upcoming Traffic
You can view traffic incidents coming up along your route or along the road on which you are traveling.

1. While navigating a route, select ⟩ > Traffic.
The nearest upcoming traffic incident appears in a panel on the right side of the map.

2 Select the traffic incident to view additional details.

**Viewing Traffic on the Map**
The traffic map shows color-coded traffic flow and delays on nearby roads.

1 From the main menu, select Apps > Traffic.
2 If necessary, select ☐ > Legend to view the legend for the traffic map.

**Searching for Traffic Incidents**
1 From the main menu, select Apps > Traffic.
2 Select ☐ > Incidents.
3 Select an item in the list.
4 If there is more than one incident, use the arrows to view additional incidents.

**Customizing the Map**

**Customizing the Map Layers**
You can customize which data appear on the map, such as icons for points of interest and road conditions.

1 Select Settings > Map & Vehicle > Map Layers.
2 Select the layers to include on the map, and select Save.

**Changing the Map Data Field**
1 From the map, select a data field.  
**NOTE:** You cannot customize Speed.
2 Select a type of data to display.

**Changing the Map Perspective**
1 Select Settings > Map & Vehicle > Driving Map View.
2 Select an option:
   • Select Track Up to display the map in two dimensions (2-D), with your direction of travel at the top.
   • Select North Up to display the map in 2-D with north at the top.
   • Select 3-D to display the map in three dimensions.
3 Select Save.

**Bluetooth Connected Features**
The device has several Bluetooth connected features for your compatible smartphone. Some features require you to install the Smartphone Link app on your smartphone. Go to garmin.com/smartphonelink for more information.

**Smart notifications:** Displays phone notifications and messages on your device. This feature is not available for all languages and all smartphones.

**LiveTrack:** Allows you to share your ride location with contacts on your smartphone or social media accounts.

**Hands-free calling:** Allows you to place and receive phone calls using your device, and allows you to use the device as a hands-free speaker phone.

**Send locations to device:** Allows you to send locations from your smartphone to your navigation device.

**Media streaming:** Streams audio from your smartphone to your headset and provides Bluetooth media controls on your zūmo device.

**Pandora® internet radio:** Streams music from Pandora internet radio to your headset and allows you to change stations, view artist and track information, change tracks, rate tracks, and more on your zūmo device.

**Spotify® streaming music:** Streams music from Spotify streaming music service to your headset and allows you to browse and play your music and playlists, view artist and track information, rate tracks, and more on your zūmo device.

**Foursquare check in:** Allows you to check in to Foursquare locations using your zūmo device.

**Weather updates:** Sends real-time weather conditions and alerts to your device.

**Garmin Live Services:** Provides subscription-based services to view live data on your device, such as traffic conditions, parking, and advanced weather forecasts.

**Bluetooth Feature Requirements**
Some features require a phone, a headset, or a specific app on your smartphone.

**Pairing Your Phone and Headset**
You must pair your zūmo device with your phone and Bluetooth headset to use several Bluetooth features. After the devices are paired, they connect automatically when they are turned on and within range.

Some features require the Smartphone Link app. You can connect to the Smartphone Link app during the pairing process or later.

1 On your phone, enable Bluetooth wireless technology, and set the phone to be discoverable.

2 Place the zūmo device and your phone within 3 m (10 ft.) of each other.

3 On the zūmo device, select Settings > Bluetooth > .Connect.

4 Follow the on-screen instructions to pair your phone with your device.

5 On the zūmo device, select .

**TIP:** If the initial Bluetooth settings screen does not appear, you can select Settings > Bluetooth > Search for Devices to pair your headset.

6 Follow the on-screen instructions to pair your headset with your device.

7 From the app store on your phone, install and open the Smartphone Link app (optional).

8 If you are pairing with an Apple® device, a security code appears on the zūmo screen.

9 If necessary, enter the security code on your phone within 30 seconds.
Bluetooth Feature Status Icons
Status icons appear in the Bluetooth settings next to each paired device.
Select Settings > Bluetooth.
• A gray icon indicates the feature is disabled or disconnected for that device.
• A colored icon indicates the feature is connected and active for that device.

Setting Up Bluetooth Features for Your Apple Device
By default, all compatible Bluetooth features are enabled when you pair your phone. You can enable, disable, or customize certain features.

Connecting to the Smartphone Link App on Your Apple Device
Before you can connect to the Smartphone Link app, you must pair and connect your zūmo device with your phone.
If you did not connect to the Smartphone Link app during the pairing process, you can connect to it for additional Bluetooth features. The Smartphone Link app communicates with your phone using Bluetooth Smart technology. The first time you connect to the Smartphone Link app on an Apple device, you must enter a Bluetooth Smart security code.
1. From the app store on your phone, install the Smartphone Link app.
2. On your phone, open the Smartphone Link app.
   A security code appears on the zūmo device screen.
3. On your phone, enter the code.

Disabling Hands-Free Calling for Your Apple Device
You can disable hands-free calling and remain connected to your phone for hands-free calling.
1. Select Settings > Bluetooth.
2. Select the phone name used for hands-free calling.
   TIP: Your phone may connect to hands-free calling and data using two different names. 📞 appears colored next to the phone name used for hands-free calling.
3. Clear the Phone calls check box.

Disabling Smartphone Link Data and Smart Notifications for Your Apple Device
You can disable Smartphone Link data and smart notifications and remain connected to your phone for hands-free calling.
1. Select Settings > Bluetooth.
2. Select the phone name connected to Smartphone Link data and notifications.
   TIP: Your phone may connect to hands-free calling and data using two different names. 📞 and 📫 appear blue next to the phone name used for data and notifications.
3. Clear the Smartphone Services check box.

Showing or Hiding Notification Categories for Your Apple Device
You can filter the notifications shown on your device by showing or hiding categories.
1. Select Settings > Bluetooth.
2 Select the phone name connected to Smartphone Link data and notifications.
   TIP: Your phone may connect to hands-free calling and data using two different names. 📞 and 📫 appear colored next to the phone name used for data and notifications.
3. Select Smart Notifications.
4. Select the check box next to each notification to show.

Setting Up Bluetooth Features for Your Smartphone with Android™
By default, all compatible Bluetooth features are enabled when you pair your phone. You can enable, disable, or customize certain features.

Connecting to the Smartphone Link App on Your Android Smartphone
Before you can connect to the Smartphone Link app, you must pair and connect your zūmo device with your phone.
If you did not connect to the Smartphone Link app during the pairing process, you can connect to it for additional Bluetooth features.
1. From the app store on your phone, install the Smartphone Link app.
2. On your phone, open the Smartphone Link app.

Disabling Bluetooth Features for Your Smartphone with Android
You can disable specific Bluetooth features and remain connected to other features.
1. Select Settings > Bluetooth.
2. Select the phone name.
3. Select an option:
   • To disable hands-free calling, clear the Phone calls check box.
   • To disable Smartphone Link data and smart notifications, clear the Smartphone Link check box.
   • To disable specific app notifications, use the settings in the Smartphone Link app.

Showing or Hiding Notifications for Your Smartphone with Android
You can use the Smartphone Link app to select which types of notifications appear on your zūmo device.
1. On your phone, open the Smartphone Link app.
2. Select 📬.
3. Verify the Smart Notifications check box is selected.
4. From the Notifications section, select Settings.
   A list of notification categories and apps appears.
5. Select an option:
   • To enable or disable a notification, select the toggle switch next to the category or app name.
   • To add an app to the list, select +.

Enabling or Disabling Bluetooth Features for Your Headset
By default, all compatible Bluetooth features are enabled when you pair your headset. You can enable or disable certain features.
1. Select Settings > Bluetooth.
2 Select the headset name.
3. Select an option:
   • To disconnect the headset, clear the Headset check box.
• To disable audio from streaming media, clear the **Media Audio** check box.

### Smartphone Link

**Smartphone Link** is a phone application that allows you to synchronize location data with your phone and access live information using your phone data connection. Your device transfers data from Smartphone Link using Bluetooth wireless technology. Live information is available through free and subscription-based plans from Garmin Live Services (*Garmin Live Services*, page 15).

Saved locations and recently found locations are synchronized with your phone each time your device connects to Smartphone Link.

### Downloading Smartphone Link

Smartphone Link is available for some smartphones. Go to [www.garmin.com/smartphonelink](http://www.garmin.com/smartphonelink) or see the application store for your phone for compatibility and availability information.

**Download Smartphone Link** from the application store on your supported phone.

See your phone owner’s manual for information on downloading and installing applications.

### Sending a Location from Your Phone to Your Device

**Smartphone Link** is registered as a navigation application on your phone.

1. From your phone, select the button to start navigating to a location (see the owner's manual for your phone).

2. From the application menu, select **Smartphone Link**.

The next time you connect your device to your phone, the location is transferred to the recently found items on your device.

### Garmin Live Services

Before you can use Garmin Live Services, your device must be connected to a supported phone running Smartphone Link (*Pairing Your Phone and Headset*, page 13).

Connecting to Smartphone Link provides access to Garmin Live Services. Garmin Live Services provides free and subscription-based plans to view live data on your device, such as traffic conditions and weather.

Some services, like weather, are available as separate apps on your device. Other services, like traffic, enhance the existing navigation features on your device. Features that require access to Garmin Live Services display the Smartphone Link symbol and appear only when the device is connected to Smartphone Link.

### Subscribing to Garmin Live Services

Before you can subscribe to Garmin Live Services, you must install the Smartphone Link app on your phone.

1. Start the Smartphone Link app on your phone (*Pairing Your Phone and Headset*, page 13).

2. Select **My Account**.

   A list of services and subscription prices appears.

3. Select a service.

4. Select the price.

5. Select **Subscribe**.

6. Follow the on-screen instructions.

### Smart Notifications

While your device is connected to the Smartphone Link app, you can view notifications from your smartphone on your zumo device, such as text messages, incoming calls, and calendar appointments.

**NOTE:** You may need to wait a few minutes to receive notifications on your navigation device after it connects to the Smartphone Link app. [ ] appears colored in the Bluetooth settings when smart notifications are connected and active (*Bluetooth Feature Status Icons*, page 14).

### Receiving Notifications

**NOTICE**

Do not read or reply to notifications while driving.

Before your zumo device can receive notifications, you must connect it to your smartphone and to the Smartphone Link app. From most pages, a popup appears when the device receives a notification from your smartphone. If the device is moving, you must verify you are a passenger and not the driver before you can view notifications.

**NOTE:** If you are viewing the map, notifications appear in a map tool.

- To ignore a notification, select **OK**.
  - The popup closes, but the notification remains active on your phone.
- To view a notification, select **View**.
- To listen to the notification, select **View > Play**.
  - The device reads the notification using text-to-speech technology. This feature is not available for all languages.
- To perform additional actions, such as dismissing the notification from your phone, select **View**, and select an option.

**NOTE:** Additional actions are available for only some notification types and must be supported by the app generating the notification.

### Receiving Notifications while Viewing the Map

**NOTICE**

Do not read or reply to notifications while driving.

Before your zumo device can receive notifications, you must connect it to your smartphone and to the Smartphone Link app. When you are viewing the map, new notifications appear in a map tool at the edge of the screen. If the device is moving, you must verify you are a passenger and not the driver before you can view notifications.

- To ignore a notification, select [ ].
  - The popup closes, but the notification remains active on your phone.
- To view a notification, select the notification text.
- To listen to the notification, select **Play Message**.
  - The device reads the notification using text-to-speech technology. This feature is not available for all languages.
- To perform additional actions, such as dismissing the notification from your phone, select **View**, and select an option.

**NOTE:** Additional actions are available for only some notification types and must be supported by the app generating the notification.

### Viewing the List of Notifications

You can view a list of all active notifications.

1. Select **Apps > Smart Notifications**.
   - The list of notifications appears. Unread notifications appear black, and previously read notifications appear gray.

2. Select an option:
   - To view a notification, select the notification description.
   - To listen to a notification, select [ ].
Hands-Free Calling
NOTE: While most phones and headsets are supported and can be used, it cannot be guaranteed that a particular phone or headset can be used. All features may not be available for your phone.

Using Bluetooth wireless technology, your device can connect to your mobile phone and wireless headset or helmet to become a hands-free device. To determine whether your device with Bluetooth technology is compatible with your device, go to www.garmin.com/bluetooth.

Placing a Call
Dialing a number
1 Select Apps > Phone > Dial.
2 Enter the number.
3 Select Dial.

Calling a Contact in Your Phone Book
Your phone book is loaded from your phone to the device each time your phone and the device connect. It may take a few minutes for the phone book to be available. Some phones do not support this feature.
1 Select Apps > Phone > Phone Book.
2 Select a contact.
3 Select Call.

Calling a Location
1 Select Apps > Phone > Browse Categories.
2 Select a point of interest.
3 Select Call.

Receiving a Call
When you receive a call, select Answer or Ignore.

Using the Call History
Your call history is loaded from your phone to the device each time your phone and the device connect. It may take a few minutes for the call history to be available. Some phones do not support this feature.
1 Select Apps > Phone > Call History.
2 Select a category.
   A list of calls appears, with the most recent calls at the top.
3 Select a call.

Using In-Call Options
While on a call, you can select in-call options from the map.
• To transfer audio to your phone, select .
  TIP: You can use this feature if you want to turn off your device and remain on the call, or if you need privacy.
• To use the dial pad, select .
  TIP: You can use this feature to use automated systems, such as voice mail.
• To mute the microphone, select .
• To hang up, select .

Saving a Home Phone Number
TIP: After you save a home number, you can edit the home number by editing “Home” in your list of saved locations (Editing a Saved Location, page 11).
1 Select Apps > Phone > > Set Home Number.
2 Enter your phone number.
3 Select Done.

Calling Home
Before you can call home, you must enter a phone number for your home location.
Select Apps > Phone > Call Home.

Disconnecting a Bluetooth Device
You can temporarily disconnect a Bluetooth device without deleting it from the paired devices list. The Bluetooth device can connect to your zūmo device automatically in the future.
1 Select Settings > Bluetooth.
2 Select the device to disconnect.
3 Clear the check box next to the name of your paired device.

Deleting a Paired Phone
You can delete a paired phone to prevent it from automatically connecting to your device in the future.
1 Select Settings > Bluetooth.
2 Select the phone, and select Unpair device.

Traffic
NOTICE
Garmin is not responsible for the accuracy or timeliness of the traffic information.

Traffic information may not be available in all areas or countries. For information about traffic and coverage areas, go to www.garmin.com/traffic.
• Traffic alerts appear on the map when there are traffic incidents along your route or in your area.
• The device must be connected to Smartphone Link with an active traffic subscription to receive traffic information.

Receiving Traffic Data Using Smartphone Link
The Live Traffic service provides real-time traffic data.
1 Download Smartphone Link onto your compatible phone (Downloading Smartphone Link, page 15).
2 Subscribe to the Live Traffic service (Subscribing to Garmin Live Services, page 15).
3 Connect the device to the phone running Smartphone Link (Pairing Your Phone and Headset, page 13).

Enabling Traffic
You can enable or disable traffic data.
1 Select Settings > Traffic.
2 Select the Traffic check box.

Using the Apps

Setting Up LiveTrack Sharing and Inviting Viewers
The first time you use the LiveTrack feature, you must set up the feature and invite viewers.
1 Connect to Smartphone Link (Pairing Your Phone and Headset, page 13).
2 On your smartphone, open the Smartphone Link app, and select LiveTrack.
3 Enter a user name, and select Next.
4 Enter one or more contacts to invite.
   You can enter either the contact name or email address.
Starting a LiveTrack Session on Your Phone

Before you can start a LiveTrack session from your phone, you must pair your phone with your device and connect to Smartphone Link (Pairing Your Phone and Headset, page 13).

1. On your smartphone, open Smartphone Link.
2. Select LiveTrack.
3. Select a sharing option.
4. Select Start LiveTrack.
5. Follow the on screen instructions.

Changing Stations
1. Select Apps > Pandora®.
2. Select 🎧.
3. Select a station.

Spotify

Spotify is a digital music service that gives you access to millions of songs.

TIP: Spotify integration requires the Spotify application be installed on your mobile phone. A compatible mobile digital device and premium subscription is required, where available. Go to www.garmin.com.

This product incorporates Spotify software which is subject to third party licenses found here: www.spotify.com/connect/third-party-licenses. Soundtrack every journey with Spotify. Play songs and artists you love, or let Spotify entertain you.

Tracks

A track is a recording of your path. The track log contains information about the recorded path, including time, location, and elevation information.

Viewing Track Information
1. Select Apps > Tracks > Active.
2. Select a track.
   - The track is displayed on the map.
3. Select ⏮.
4. Select an option:
   - To save the track, select Save Track.
   - To save the track as a trip, select Save as Trip.
   - To view an elevation plot of the track, select Elevation Profile.

TracBack®

Following Your Recent Track

The TracBack feature records a track of your recent movement. You can retrace your recent track back to where you started.

1. Select Apps > TracBack.
   - Your recent track appears on the map.
2. Select Go!.

Saving Your Recent Track as a Trip

You can save your recent track as a trip, which you can navigate later using the trip planner (Navigating to a Saved Trip, page 7).

1. Select TracBack.
   - Your recent track appears on the map.
2. Select ⏮ > Save as Trip.
3. Enter a name, and select Done.

Tire Pressure

WARNING

Use of the Tire Pressure Monitor System is not a substitute for proper tire maintenance, and it is the driver’s responsibility to maintain correct tire pressure, even if under-inflation has not reached the level to trigger the low tire pressure alert. Failure to maintain proper tire pressure can result in loss of control of the vehicle, which may lead to serious personal injury or death.

The Garmin Tire Pressure Monitor System is available as a separate accessory. The tire pressure feature is not compatible with all zūmo models. Go to www.garmin.com/zumo for accessory and compatibility information.

Media Player

The media player can play music or audio from these sources.
- Music files stored on your zūmo device.
- Music files stored on a phone or media player connected to the motorcycle mount USB port.
- Line-in audio connected to the motorcycle mount line-in audio jack.
- Bluetooth audio from a paired phone.
- Pandora internet radio.
- Spotify streaming music service.

Playing Media
1. Select Apps.
2. Select an option:
   - Select Pandora® to open the media player with the media source set to Pandora.
   - Select Spotify to open the media player with the media source set to Spotify.
   - Select Media Player to open the media player to the most recently selected media source.
3. Select an option:
   - To change the media source, select 🎧.
   - To choose a track, station, playlist, or music file, select 🎧.

Adding the Media Player Tool to the Map

The media player map tool enables you to control the media player from your map.

1. Select Settings > Map & Vehicle > Map Tools > Media Player.
2. Open the map.
3. Select 🔞 > Media Player.
   - The media player controls appear on the map.

Changing the Media Source

You can change the source from which media is played on your device.

1. Select Apps > Media Player > 🎧.
2. Select a media source.

Pandora Service

Pandora is free personalized radio that offers effortless and endless music enjoyment and discovery. Pandora integration requires a compatible mobile device with the Pandora application installed. For more information on compatible mobile devices visit www.pandora.com/everywhere/mobile.

NOTE: Pandora is currently available in the United States, Australia, and New Zealand.
Setting Up the Tire Pressure Sensors
Before you can set up the tire pressure sensors, you must have the battery and the numerical stickers included with each sensor. You also must have a compatible zūmo device.

The sensors communicate wirelessly with your compatible zūmo device. You can monitor tire pressure and receive low-pressure alerts on your zūmo device.

1. Remove the cap ① from the sensor ② by rotating the cap counter-clockwise.

2. If you have already installed the battery in the sensor, remove the battery.

3. On your zūmo device, select Apps > Tire Pressure.

4. Select a vehicle profile that matches the tire configuration of your vehicle.

5. Bring the sensor close to the zūmo device.

6. On your zūmo device, select the number next to the tire to which the sensor will be paired.

7. Within 30 seconds, on the sensor, insert the battery ③ into the battery holder ④ with the positive side facing up.

The zūmo device searches for the sensor and displays a confirmation message when the sensor pairs successfully.

TIP: If the sensor does not pair successfully, you should remove the sensor battery, and repeat steps 6 and 7.

8. Enter the recommended pressure for the tire.

9. Enter the minimum pressure for the tire.

The zūmo device triggers a low-pressure alert when the sensor reports a tire pressure reading lower than this value.

10. Replace and fully tighten the cap on the sensor.

11. On the sensor, affix the numerical sticker that corresponds to the tire number you selected in step 6.

12. Repeat this procedure for each remaining sensor.

Installing the Sensors on Your Tires

WARNING

The Tire Pressure Monitor System is for use with metal tire valve stems only. Installation of the Tire Pressure Sensors on non-metal tire valve stems may cause tire and/or tire valve stem damage which could result in serious personal injury or death.

TIP:

If the sensor does not pair successfully, you should remove the sensor battery, and repeat steps 6 and 7.

Before you install the sensors on your tires, you should set up the sensors with your zūmo device.

1. Remove the existing valve stem caps from your vehicle tires.

2. On your zūmo device, select Apps > Tire Pressure to view the vehicle profile diagram.

3. Install the sensors onto the tire valve stems by tightening them clockwise.

NOTE: You must install each sensor onto the correct tire based on the vehicle profile diagram and the numerical stickers affixed to the sensors during the setup process.

4. Rotate the wheels by hand to verify the sensors have adequate clearance and do not interfere with vehicle equipment.

Tire Pressure Alerts

The device alerts you using pop-up messages, icons on the map, and symbols in the tire pressure app.

When an alert exists for a sensor, the number next to the corresponding tire appears red in the tire pressure app. The symbols below the number appear red to indicate the active alerts for that sensor.

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>⬆️</td>
<td>Low tire pressure</td>
</tr>
<tr>
<td>⬼</td>
<td>Low sensor battery</td>
</tr>
<tr>
<td>⚠️</td>
<td>Sensor not connected</td>
</tr>
</tbody>
</table>

Tire Pressure Sensor Sleep Mode

When you park your vehicle and turn off your zūmo device, the tire pressure sensor enters a power-saving sleep mode after several minutes. The sensor does not transmit information to the zūmo device while in sleep mode. This can cause your zūmo device to report the sensor is disconnected.

The next time your vehicle moves, the sensor exits sleep mode and automatically reconnects to the zūmo device. It may take up to 30 seconds to reconnect.

Using the Compass

NOTE: You must be moving for the compass to determine your direction.

You can navigate using a GPS compass.

Select Apps > Compass.

VIRB® Remote

The VIRB remote function allows you to control your VIRB action camera using your device. Go to www.garmin.com/VIRB to purchase a VIRB action camera.

Controlling a VIRB Action Camera

Before you can use the VIRB remote function, you must enable the remote setting on your VIRB camera. See the VIRB Series Owner’s Manual for more information.

1. Turn on your VIRB camera.

2. On your zūmo device, select Apps > VIRB Remote > Connect.
Editing a Service Record

You can edit the comment, odometer reading, and date of a service record.

1. Select Apps > Service History.
2. Select a service category.
3. Select Add Record.
4. Enter the odometer reading, and select Next.
5. Enter a comment (optional).
6. Select Done.

Adding Service Categories

You can add custom categories (Adding Service Categories, page 19).

1. Select Apps > Service History.
2. Select Add Category.
3. Enter a category name, and select Done.

Deleting Service Categories

When you delete a service category, all service records in the category are also deleted.

1. Select Apps > Service History.
2. Select Delete Categories.
3. Select the service categories to delete.
4. Select Delete.

Renaming Service Categories

1. Select Apps > Service History.
2. Select Rename Category.
3. Enter a name, and select Done.

Deleting Service Records

1. Select Apps > Service History.
2. Select a service category.
4. Select the service records to be deleted.
5. Select Delete.

Editing a Service Record

You can edit the comment, odometer reading, and date of a service record.

1. Select Apps > Service History.
2. Select a category.
3. Select a field.
4. Enter the new information, and select Done.

Viewing Help Files

Select Apps > Help to view the full owner’s manual.

Searching Help Topics

Select Apps > Help > Q.

Viewing the Weather Forecast

Before you can use this feature, your device must be receiving weather data. You can connect your device to the Smartphone Link app to receive weather data (Pairing Your Phone and Headset, page 13).

1. Select Apps > Weather.
2. If necessary, select a city.

Viewing Weather Alerts

Before you can use this feature, you must purchase Advanced Weather service using Smartphone Link.

1. Select Apps > Weather.
2. If necessary, select a city.

Checking Road Conditions

Before you can use this feature, you must purchase Advanced Weather service using Smartphone Link.

1. Select Apps > Weather.
2. If necessary, select a city.
3. Select Road Conditions.

photoLive Traffic Cameras

photoLive traffic cameras provide live images of traffic conditions on major roadways and intersections. You can save cameras that you plan to view regularly.

Saving a Traffic Camera

Before you can use this feature, you must subscribe to the photoLive service, and your device must be connected to a supported phone running Smartphone Link (Smartphone Link, page 15).

1. Select Apps > photoLive.
2. If necessary, select a road.
3. Select an intersection.
4. Select Save.

Viewing a Traffic Camera

Before you can view a traffic camera, you must save a traffic camera (Saving a Traffic Camera, page 19).

1. Select Apps > photoLive.
2. Select a camera.
Viewing Previous Routes and Destinations
Before you can use this feature, you must enable the travel history feature (Device and Privacy Settings, page 21).
You can view your previous routes and places you have stopped on the map.
Select Apps > Where I’ve Been.

Customizing the Device

Map and Vehicle Settings
Select Settings > Map & Vehicle.
Vehicle: Sets the icon that represents your position on the map.
Driving Map View: Sets the perspective on the map.
Map Detail: Sets the level of detail on the map. More detail may cause the map to draw slower.
Map Theme: Changes the color of the map data.
Map Layers: Sets the data that appears on the map page (Customizing the Map Layers, page 13).
Audible Rider Alerts: Enables an audible alert for each type of rider alert (Rider Awareness Features and Alerts, page 4).
Auto Zoom: Automatically selects the zoom level for optimal use of your map. When disabled, you must zoom in or out manually.

myMaps: Sets which installed maps the device uses.

Enabling Maps
You can enable map products installed on your device.

TIP: To purchase additional map products, go to http://buy.garmin.com.
1 Select Settings > Map & Vehicle > myMaps.
2 Select a map.

Navigation Settings
Select Settings > Navigation.
Route Preview: Shows a preview of the major roads in your route when you start navigation.
Calculation Mode: Sets the route calculation method.
Off-Route Recalculation: Sets recalculation preferences when navigating away from an active route.
Fatigue Warning: Alerts you when you have been driving for a long period without a break.
Avoidances: Sets road features to avoid on a route.
Custom Avoidances: Allows you to avoid specific roads or areas.
Toll Roads: Sets preferences for avoiding toll roads.
Tolls and Fees: Sets preferences for avoiding toll roads and toll stickers.
NOTE: This feature is not available in all areas.
Restricted Mode: Disables all functions that require significant operator attention and could become a distraction while driving.
GPS Simulator: Stops the device from receiving a GPS signal, and saves battery power.
Calculation Mode Settings
Select Settings > Navigation > Calculation Mode.
The route calculation is based on road speeds and vehicle acceleration data for a given route.
Faster Time: Calculates routes that are faster to drive but can be longer in distance.
Shorter Distance: Calculates routes that are shorter in distance but can take more time to drive.
Off Road: Calculates a direct line from your location to your destination.
Adventurous Route: Calculates routes that prefer curvy roads.
NOTE: This feature is not available in all areas.

Setting a Simulated Location
If you are indoors or not receiving satellite signals, you can use the GPS to set a simulated location.
1 Select Settings > Navigation > GPS Simulator.
2 From the main menu, select View Map.
3 Tap the map twice to select an area.
The address of the location appears at the bottom of the screen.
4 Select the location description.
5 Select Set Location.

Bluetooth Settings
Select Settings > Bluetooth.
Bluetooth: Enables Bluetooth wireless technology.
Search for Devices: Searches for nearby Bluetooth devices.
Friendly Name: Allows you to enter a friendly name that identifies your device on other devices with Bluetooth wireless technology.

Disabling Bluetooth
1 Select Settings > Bluetooth.
2 Select Bluetooth.

Display Settings
Select Settings > Display.
Color Mode: Allows you to select day or night color mode. If you select the Auto option, the device automatically switches to day or night colors based on the time of day.
Brightness: Allows you to adjust the display brightness.
Display Timeout: Allows you to set the amount of idle time before your device enters sleep mode while using battery power.
Screenshot: Allows you to take a picture of the device screen.
Screenshots are saved in the Screenshot folder of the device storage.

Traffic Settings
Select Settings > Traffic.
Traffic: Enables traffic. The Smartphone Link app and a subscription to live traffic service are required.

Units and Time Settings
To open the Units and Time settings page, from the main menu, select Settings > Units & Time.

Current Time: Sets the device time.
Time Format: Allows you to select a 12-hour, 24-hour, or UTC display time.
Units: Sets the unit of measure used for distances.
Position Format: Sets the coordinate format and datum used for geographical coordinates.

Setting the Time
1 From the main menu, select the time.
2 Select an option:
   • To set the time automatically using GPS information, select Automatic.
To set the time manually, drag the numbers up or down.

**Language and Keyboard Settings**

To open the Language and Keyboard settings, from the main menu, select **Settings > Language & Keyboard**.

**Voice Language**: Sets the language for voice prompts.

**Text Language**: Sets all on-screen text to the selected language.

*NOTE*: Changing the text language does not change the language of user-entered data or map data, such as street names.

**Keyboard Language**: Enables keyboard languages.

**Proximity Alerts Settings**

*NOTE*: You must have custom points of interest (POIs) loaded for proximity points alerts to display.

*NOTE*: This feature is not available in all areas.

Select **Settings > Proximity Alerts**.

**Audio**: Sets the style of alert that plays when you approach proximity points.

**Alerts**: Sets the type of proximity points for which alerts are played.

**Device and Privacy Settings**

To open the device settings, select **Settings > Device**.

**About**: Displays the software version number, the unit ID number, and information on several other software features.

**EULAs**: Displays the end-user license agreements.

*NOTE*: You need this information when you update the system software or purchase additional map data.

**Position Reporting**: Shares your position information with Garmin to improve content.

**Travel History**: Allows the device to record information for the myTrends, Where I’ve Been, and Trip Log features.

**Clear Travel History**: Clears your travel history for the myTrends, Where I’ve Been, and Trip Log features.

**Restoring Settings**

You can restore a category of settings or all settings to the factory default values.

1. Select **Settings**.
2. If necessary, select a settings category.
3. Select **> Restore**.

---

---

*The device withstands incidental exposure to water of up to 1 m for up to 30 min. For more information, go to [www.garmin.com/waterrating](http://www.garmin.com/waterrating).*

**Charging the Device**

*NOTE*: This Class III product shall be powered by an LPS power supply.

You can charge the battery in the device using any of these methods.

- Install the device in the mount, and connect the mount to vehicle power.
- Connect the device to a computer using a USB cable. The device may charge slowly when connected to a computer. Some portable computers may not charge the device.
- Connect the device to an optional power adapter accessory, such as a wall power adapter.

You can purchase an approved Garmin AC-DC adapter suitable for home or office use from a Garmin dealer or [www.garmin.com](http://www.garmin.com).

---

**Device Maintenance**

### Device Care

*NOTICE*

Avoid dropping your device.

Do not store the device where prolonged exposure to extreme temperatures can occur, because it can cause permanent damage.

Never use a hard or sharp object to operate the touchscreen, or damage may result.

### Cleaning the Outer Casing

*NOTICE*

Avoid chemical cleaners and solvents that can damage plastic components.

1. Clean the outer casing of the device (not the touchscreen) using a cloth dampened with a mild detergent solution.
2. Wipe the device dry.

### Cleaning the Touchscreen

1. Use a soft, clean, lint-free cloth.
2. If necessary, lightly dampen the cloth with water.
3. If using a dampened cloth, turn off the device and disconnect the device from power.
4. Gently wipe the screen with the cloth.

### Avoiding Theft

- Remove the device and mount from sight when not in use.
- Remove the residue left on the windshield by the suction cup.
- Do not keep your unit in the glove compartment.
- Register your device at [http://my.garmin.com](http://my.garmin.com).
Reseting the Device
You can reset your device if it stops functioning.
   Hold the power key for 12 seconds.

Removing the Device, Mount, and Suction Cup

Removing the Device from the Mount
1 Press the release tab or button on the mount.
2 Tilt the device forward.

Removing the Mount from the Suction Cup
1 Turn the device mount to the right or left.
2 Apply pressure until the socket on the mount releases the ball on the suction cup.

Removing the Suction Cup from the Windshield
1 Flip the lever on the suction cup toward you.
2 Pull the tab on the suction cup toward you.

Changing the Fuse in the Vehicle Power Cable

NOTICE
When replacing the fuse, do not lose any of the small pieces and make sure they are put back in the proper position. The vehicle power cable does not work unless it is assembled correctly.

If your device does not charge in your vehicle, you may need to replace the fuse located at the tip of the vehicle adapter.
1 Rotate the end piece counter clockwise to unlock it.
2 Remove the end piece, the silver tip, and the fuse.
3 Insert a new fast-blow fuse that has the same current, such as 1 A or 2 A.
4 Place the silver tip in the end piece.
5 Push in the end piece and rotate it clockwise to lock it back into the vehicle power cable.

TIP: You may need to use a coin to remove the end piece.

Troubleshooting

The suction cup will not stay on my windshield
1 Clean the suction cup and windshield with rubbing alcohol.
2 Dry with a clean, dry cloth.
3 Mount the suction cup (Installation, page 1).

My device is not acquiring satellite signals
• Verify the GPS simulator is turned off (Navigation Settings, page 20).
• Take your device out of parking garages and away from tall buildings and trees.
• Remain stationary for several minutes.

The device does not charge in my vehicle
• Check the fuse in the vehicle power cable (Changing the Fuse in the Vehicle Power Cable, page 22).

• Verify the vehicle is turned on and is supplying power to the power outlet.
• Verify the interior temperature of the vehicle is within the charging temperature range indicated in the specifications.
• Verify the fuse is not broken in the vehicle power outlet.

My battery does not stay charged for very long
• Decrease the screen brightness (Display Settings, page 20).
• Shorten the display timeout (Display Settings, page 20).
• Decrease the volume (Adjusting the Volume, page 4).
• Disable Bluetooth wireless technology (Disabling Bluetooth, page 20).
• Put the device in power saving mode when not in use (Turning the Device On or Off, page 3).
• Keep your device away from extreme temperatures.
• Do not leave your device in direct sunlight.

My device does not appear as a removable drive on my computer
On most Windows® computers, the device connects using Media Transfer Protocol (MTP). In MTP mode, the device appears as a portable device and not as a removable drive. MTP mode is supported by Windows 7, Windows Vista®, and Windows XP Service Pack 3 with Windows Media Player 10.

My device does not appear as a portable device on my computer
On Mac® computers and some Windows computers, the device connects using USB mass storage mode. In USB mass storage mode, the device appears as a removable drive or volume, and not as a portable device. Windows versions prior to Windows XP Service Pack 3 use USB mass storage mode.

My device does not appear as either a portable device or a removable drive or volume on my computer
1 Disconnect the USB cable from your computer.
2 Turn off the device.
3 Connect the USB cable to your device and to a USB port on your computer.
   TIP: The USB cable must connect to a USB port on your computer, not to a USB hub.

The device turns on automatically and goes into MTP mode or USB mass storage mode. A picture of the device connected to a computer appears on the device screen.
NOTE: If you have several network drives mapped on your computer, Windows may have trouble assigning drive letters to your Garmin drives. For information about assigning drive letters, see the help file for your operating system.

My phone will not connect to the device
• Select Settings > Bluetooth.
   The Bluetooth field must be set to Enabled.
• Enable Bluetooth wireless technology on your phone and bring your phone within 33 ft. (10 m) of the device.
• Go to www.garmin.com/bluetooth for more help.
Installing a Memory Card for Maps and Data
You can install a memory card to increase the storage space for
maps and other data on your device. You can purchase memory
cards from an electronics supplier, or go to www.garmin.com
/maps to purchase a memory card with pre-loaded Garmin
mapping software. The device supports microSD memory cards
from 4 to 32 GB.
1 Locate the map and data memory card slot on your device
(Device Overview, page 2).
2 Insert a memory card into the slot.
3 Press it in until it clicks.

Data Management
You can store files on your device. The device has a memory
card slot for additional data storage.
NOTE: The device is not compatible with Windows 95, 98, Me,
Windows NT®, and Mac OS 10.3 and earlier.

About Memory Cards
You can purchase memory cards from an electronics supplier,
or purchase pre-loaded Garmin mapping software
(www.garmin.com). In addition to map and data storage, the
memory card can be used to store files such as maps, images,
geocaches, routes, waypoints, and custom POIs.

Connecting the Device to Your Computer
You can connect the device to your computer using a USB
cable.
1 Plug the small end of the USB cable into the port on the
device.
2 Plug the larger end of the USB cable into a port on your
computer.
   A picture of your device connected to a computer appears on
the device screen.
   Depending on your computer operating system, the device
appears as either a portable device, a removable drive, or a
removable volume.

Transferring Data From Your Computer
1 Connect the device to your computer (Connecting the Device
to Your Computer, page 23).
   Depending on your computer operating system, the device
appears as either a portable device, a removable drive, or a
removable volume.
2 On your computer, open the file browser.
3 Select a file.
4 Select Edit > Copy.
5 Browse to a folder on the device.
   NOTE: For a removable drive or volume, you should not
place files in the Garmin folder.
6 Select Edit > Paste.

Disconnecting the USB Cable
If your device is connected to your computer as a removable
drive or volume, you must safely disconnect your device from
your computer to avoid data loss. If your device is connected to
your Windows computer as a portable device, it is not necessary
to safely disconnect.
1 Complete an action:
   • For Windows computers, select the Safely Remove
     Hardware icon in the system tray, and select your device.
   • For Mac computers, drag the volume icon to the trash.
2 Disconnect the cable from your computer.

Viewing GPS Signal Status
Hold for three seconds.

Purchasing Additional Maps
1 Go to your device product page at garmin.com .
2 Click the Maps tab.
3 Follow the on-screen instructions.

Purchasing Accessories
Go to garmin.com/accessories.
